VRAAG 1
TYDNOUKEURIGHEIDSTOETS

Die tydnoukeurigheidstoets moet in dubbel- of $1\frac{1}{2}$ reëlaafstand op slegs een kant van die bladsy getik word. Gebruik kantruimtes van 10° . 'n Minimum van 35 w.p.m. word verwag en die grense word deur (.....) aangedui.

Mense het vandag die gerief van hul geldsake elektronies te hanteer. Maar inkopies met plastiekgeld beteken dat 'n mens se rande direk uit jou bankrekening onttrek word. Die meeste mense is al gewoond aan die outomatiese tellermasjien, en nou gaan ons ook te doen kry met elektroniese inkopies.

Banke hanteer al hoe meer tjeks, en miljoene kredietkaartstrokies word jaarliks uitgereik. Dit is dus geen wonder dat banke gretig is om hul administratiewe werk te verminder nie. Om die stroom te keer, bestee banke baie tyd en geld om 'n stelsel van kontantvrye inkopies te ontwikkel. Dit is iets waarna kleinhandelaars en banke al lank uitsien.

Tans is daar verskeie maniere om vir goedere te betaal. Vir eers op die tradisionele wyse, naamlik kontant. Dit is eenvoudig, maar stygende pryse het dit heel onprakties gemaak.

Weens toenemende grypdiefstalle in groot winkels is dit vandag baie veiliger om eerder 'n tjekboek of 'n kredietkaart te gebruik.

As jy 'n lopende rekening by 'n bank het, kry jy 'n tjekboek, hou deeglik rekord van jou uitgawes op die genommerde teenblaadjies. Die bank stuur maandeliks 'n staat, en jy betaal kommissie na gelang van die bedrag van die tjek. Hiernaas kan jy 'n spaarrekening by 'n bank of 'n bouvereniging open en 'n debietkaart gebruik om kontant te trek.

Kasregisters in supermarkte raak al hoe meer gevorderd sodat die verbruiker vir sy aankope sal kan betaal en terselfdertyd kontant sal kan onttrek. 'n Paar winkels in die land het reeds die gerief. Jy kan jou krediet- of debietkaart betaal.

QUESTION 1
TIMED ACCURACY TEST

The timed accuracy test is to be typed in double line or 1½ spacing on one side of the paper only. Use margins of 10°. A minimum of 35 w.p.m. is expected and the limits are marked by (....).

TIME: 10 minutes

People today are offered the facility of controlling their money electronically. Shopping with plastic means that money is withdrawn directly from an account. Most people are already familiar with the procedure of drawing cash from automatic teller machines. We are now faced with electronic shopping.

Banks process an ever-increasing number of cheques. Millions of credit card receipts are issued every year and banks are keen to cut down on their paperwork. To reduce the number of cheques and receipts that come flooding in daily from retailers, they are spending a good deal of time and money developing schemes for cash free shopping. This system is good news for the banks and the retailers.

There are now several ways a consumer can pay for goods. Of course, there is the traditional method of using cash. Although this is simple, rising costs have made it impractical.

Due to the high incidence of pick-pocketing in large stores, it has become safer to carry either a cheque book or a credit card to make large purchases.

If you have a current account at a bank, you are issued with a cheque book and should keep a record of your transactions on the numbered sheet attached to the cheque to enable you to keep record of your spending. You also receive a monthly statement from the bank and are charged a fee per cheque transaction. Another option is to operate a savings account at the bank or a building society and use a debit card to draw cash.

Skandering is 'n stelsel waardeur 'n gerekenariseerde kasregister 'n staafkode op die produk lees vir 'n beskrywing van die produk en die prys. 35 w.p.m.

Die kasregister is gekoppel aan 'n hoofrekenaar wat al die toepaslike inligting bevat oor die goedere wat in die winkel verkoop word. Foute ontstaan alleen weens inligting wat verkeerd geprogrammeer is. As die prys van 'n produk of 'n artikel op die 40 w.p.m.
rak verskil van die prys op die rekenaar, betaal die verbruiker die prys op die rekenaar.

Die verbruiker word teen die soort onreëlmatigheid beskerm deurdat hy 'n kasregisterstrokie ontvang waarop die naam, grootte en prys van elke artikel verskyn, 45 w.p.m.
sodat hy tuis alles sorgvuldig kan nagaan. Die kasregisterstrokie dui die datum en die tyd van aankope aan, asook die nommer van die kassier en die winkel waar die transaksie gedoen is.

As jy dit kan bekostig, kan jy jou geldsake van jou huis 50 w.p.m.
af hanteer. Dit word tuisbank genoem. Tuisbank is reeds sedert die middel jare tagtig in Brittanje beskikbaar. Daar is twee basiese stelsels. Die een is gekoppel aan 'n videoteksstelsel deur die televisieskerm. Die ander stelsel werk deur 55 w.p.m.

Tills in supermarkets have become so sophisticated that consumers will be able to pay both for purchases and draw cash simultaneously. A few stores in South Africa have this facility already, 35 w.p.m.
You will be able to use a credit or a debit card at the point of sale.

Scanning is simply a system whereby a computerised till reads a barcode on a product to access the description and price.

The till is computerised and linked to a mainframe 40 w.p.m.
computer which stores all the relevant information on the products stocked in the store. Any errors are caused by human incompetence. If the store marks a price on the shelf edge below the product and enters a different price in the computer, the 45 w.p.m.
computer will charge you accordingly.

The consumer is protected against this type of discrepancy by receiving a detailed printout slip describing each item by name, size and price. You have the opportunity to double check the list yourself. The till 50 w.p.m.
slip will record the date and time of purchase, the number of the till and the name of the store where the transaction took place.

If you can afford it, you will be able to conduct your own finances from home. This is called home banking.
Home 55 w.p.m.
