

(i) Oxygen is made during

combustion

digestion

photosynthesis

respiration.

(j) Scurvy is caused by

bacteria

smoking

too little vitamin C

too much animal fat.

(10)

2. Amanda is trying to learn which parts of the body do which jobs. She has written down a list of parts and a list of jobs. Unfortunately, the two lists have got muddled up. Match the parts of the body with the right job. The first one has been done for you.

Parts of the body	Jobs
skeleton	pumps blood round the body
stomach	feeds a developing fetus
placenta	protects organs from damage
biceps muscle	digests food
heart	lifts the forearm and hand
