

Moderators' Report Principal Moderator Feedback

June 2011

Applied GCE
6964 01 – Programming

Edexcel is one of the leading examining and awarding bodies in the UK and throughout the world. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers.

Through a network of UK and overseas offices, Edexcel's centres receive the support they need to help them deliver their education and training programmes to learners.

For further information, please call our GCE line on 0844 576 0025, our GCSE team on 0844 576 0027, or visit our website at www.edexcel.com.

If you have any subject specific questions about the content of this Moderators' Report that require the help of a subject specialist, you may find our **Ask The Expert** email service helpful.

Ask The Expert can be accessed online at the following link:

<http://www.edexcel.com/Aboutus/contact-us/>

Alternatively, you can contact our ICT Advisor directly by sending an email to Gareth on ictsubjectadvisor@EdexcelExperts.co.uk.

You can also telephone 0844 372 2186 to speak to a member of our subject advisor team.

General Comments

It was nice to see most centres submitting the sample required on one disk and including the e-sheets and candidate authentication sheets all labelled according to the correct naming conventions as detailed in the document "Moderation of ePortfolios: Guidance for Centres".

Many candidates' eportfolios were in the correct file formats, within the stated file size of 25 MB and most contained a clear index file which started the eportfolio. It was good to see many assessors giving clear feedback in the e-sheets explaining the assessment decisions made and marks awarded. See the section on admin at the end of this report which details some poor practice relating to the submission of work for moderation.

It was pleasing to see that the majority of centres were assessing to National Standards with sound assessment decisions made across the board. Centres/Assessors clearly understand what is required and how to apply the mark bands for this unit.

There were very few instances of Centres adopting a very structured approach with all candidates producing very similar evidence this window, which is excellent.

The majority of candidates had included a copy of the functional specification which really did make moderation easier as the moderators had something to compare the program against.

However, there are still instances where executable versions of the programs are not being included. It is imperative that the moderator can access this. Also, occasionally the exe files did not run properly – usually down to absolute paths to files etc. Candidates should ensure relative paths are used.

For Strands A and B, assessors tended to be generous in relation to the evidence of the use of global variables and the use of a suitable variety of selection and iteration structures, and other complex features, as these could not always be found where marks and assessment comments indicated that they were present. This also applies to the effective use of controls and events – often the evidence did not show this very clearly, especially where there were problems getting the programs to run – other evidence tended to be not quite sufficient

Comments on Strand A

It was nice to see that very, very few candidates included what they had done here as opposed to what they were going to do. However, it is worthwhile reiterating that screenshots of the final system are not design, and that it is the level of detail within the design that leads to the mark band placement. For the top of the higher mark bands the design needs to be detailed with, at mark band two, explanations of how input data will be validated and at mark band three identification of the processing to be carried out in each event. At times, Assessors were generous in relation to the evidence of the use of global variables and the use of a suitable variety of selection and iteration structures and other complex features, as these could not always be found where marks and assessment comments indicated they were present. This also applies to the effective use of controls and events – at times the evidence did not show this very clearly, especially where there were problems getting the programs to run and supporting documentation was not detailed. Please take note of the comments given in strand B regarding programs that are of a simplistic nature.

Comments on Strand B

There were very few instances of simplistic programs being included this moderation window and some very good examples of systems that could well be classed as 'professional level'. However, it must be pointed out once again that simplistic programs that appear to meet the strand criterion if a 'tick box' approach is used are not acceptable. Programs have to be of appropriate complexity to open up all of the mark bands. Very simple programs will limit the marks available in strands A to D to mark band 1.

Standard ways of working are important in this strand. With regards to programming code this includes good use of object names, indentation and comments clearly explaining the purpose of the code. There was some excellent, clear evidence of this but not across the board and it is very important.

Please take note of the comments made with regards to global variables etc in strand A too as it also applies to this strand.

Comments on Strand C

Please see comment given in strand B with regards to programs of a simplistic nature. On the whole evidence for this strand was good with some very detailed test plans and results including changes made etc.

Comments on Strand D

Please see comment given in strand B with regards to programs of a simplistic nature. On the whole the evidence for this strand was good ie both documents had been included and assessors were correctly awarding marks.

Comments on Strand E

It was nice to see that there was very little evidence of candidates being placed in too high a mark band in this strand in this moderation window. Where the higher marks had been awarded most candidates had included

an evaluation that was well rounded and included an evaluation of the quality of the user and technical documentation and the efficiency of the final program including data structures.

Grade Boundaries

Centres are reminded that the GCE in Applied ICT is an Awarded qualification. As such, grade boundaries are subject to review each series for both written paper and coursework units.

Grade boundaries for this, and all other papers, can be found on the website on this link:

<http://www.edexcel.com/iwantto/Pages/grade-boundaries.aspx>
