INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen.

Write your name, centre number and candidate number in the spaces at the top of this page.

INFORMATION FOR CANDIDATES

Questions in this paper are based on the context of Garth View Farm Shop.

The exam consists of two parts:

Time allowed for Part A: 1 hour

- The Tender (40 marks)

Time allowed for Part B: 2 hours

- The Recommendation (20 marks)
- The Implementation (40 marks)

A short break is permitted between parts A and B.

Quality of Written Communication will be assessed in the response to Question 7.

INTRODUCTION

Garth View Farm Shop

INVITATION TO TENDER

Garth View Farm Shop sells locally produced food and a selection of delicacies from around the world. The Farm Shop business is owned by Mrs Megan Rees. The business is expanding and new premises are being built. The shop sells produce to customers daily but also takes a large number of orders for home delivery.

There will be a new building for the:

- General Store
- Butcher
- Delicatessen
- Office

Customers will be able to buy fruit and vegetables from the General Store, meat and poultry from the Butcher and dairy products from the Delicatessen. The administration will take place in the new Office.

Orders for delivery will be taken over the telephone in the Office or over the counter in the General Store, the Butcher and the Delicatessen.

There will be a team of staff and a manager in each of; the General Store, Butcher and Delicatessen. There will be several administrators working in the Office with Megan Rees.

Garth View Farm Shop has decided to obtain tenders for the contract to design and install a network system to enable electronic communication in the new building.

As an IT consultant specialising in network solutions you have been invited to tender for this contract and have this opportunity to demonstrate your subject expertise by completing a number of tasks.

“Hello. I am the owner of Garth View Farm Shop. We need a network to operate our new business. I would like to know more about the benefits and disadvantages of using a network.”

1. (a) One benefit of a network is being able to share hardware. Give **three other** benefits of networking computers. [3]

.....

.....

.....

.....

.....

- (b) Identify **two** disadvantages of using networks compared with stand alone computers. [2]

.....

.....

.....

“Hello again. I am aware that networks use different transmission methods to communicate. I would like you to demonstrate your knowledge and understanding of transmission methods.”

2. (a) Describe the difference between serial and parallel transmission giving an advantage of parallel transmission. [2]

.....

.....

.....

.....

- (b) Define **each** transmission method named below. [3]

Simplex

.....

.....

Half Duplex

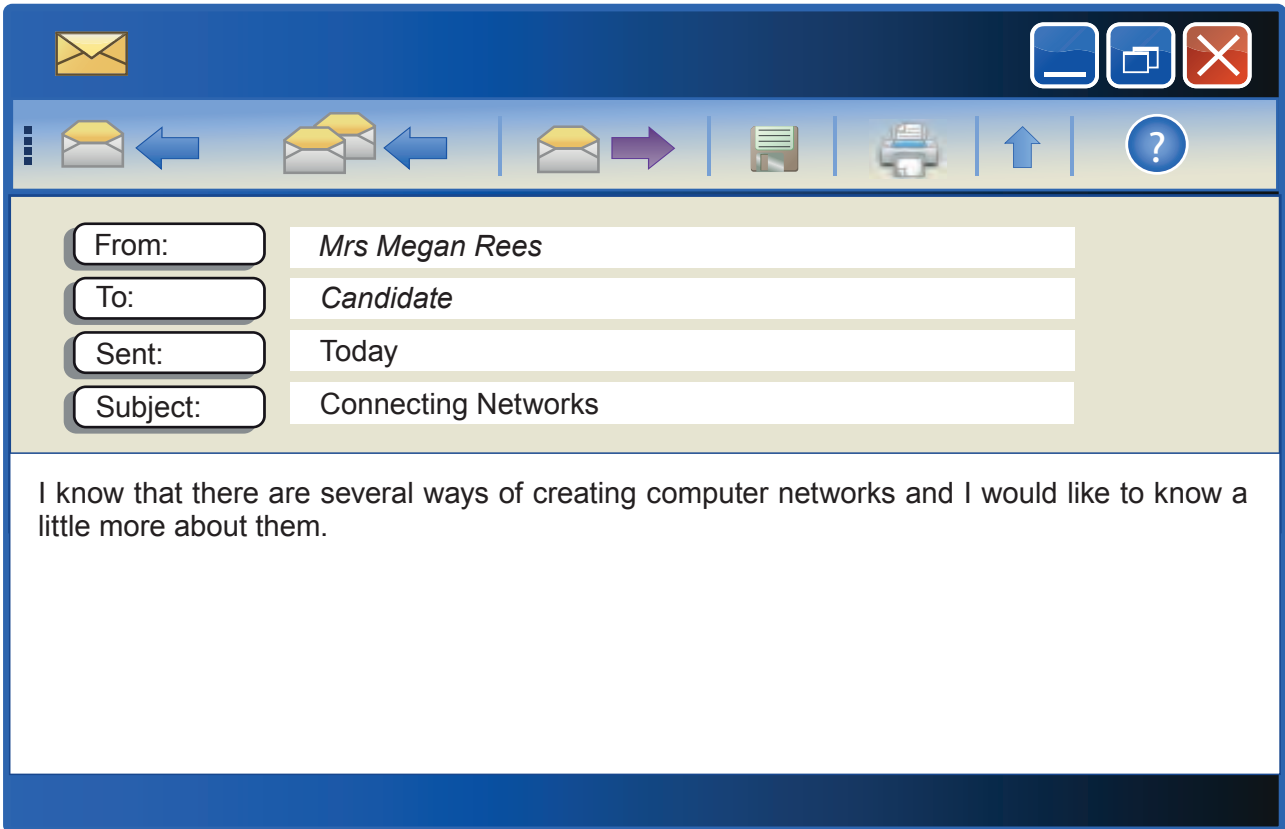

.....

.....

Duplex

3. (a) Identify the hardware required to allow communication over a Wireless Local Area Network (WLAN). [2]

.....

.....

.....

.....

(b) Give **two** benefits and **one** possible problem for a business using a WLAN. [3]

.....

.....

.....

.....

.....

4. (a) Local Area Networks are often connected using Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP) cables. Describe **in detail** the physical difference between STP and UTP cables giving **one** advantage and **one** disadvantage of using STP compared with UTP. [4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (b) Wide Area Networks are often connected using fibre optic cables. State **three** advantages of using fibre optic cables compared with UTP or STP. [3]

.....

.....

.....

.....

.....

.....

“Hello. I am concerned about the security of the data that will be stored on our new network and would like to know more about network operating and accounting software.”

5. State **two** facilities provided by network operating and accounting software.

[2]

.....

.....

.....

.....

“I am aware that networks use different switching methods to communicate. I would like some information about packet switching.”

6. (a) Data transmitted on a Wide Area Network is broken into packets before transmission. The contents of a packet will typically include the destination address and the actual data to be transmitted.

Identify **two** other data items in a typical packet and **describe** the role of that data. [4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

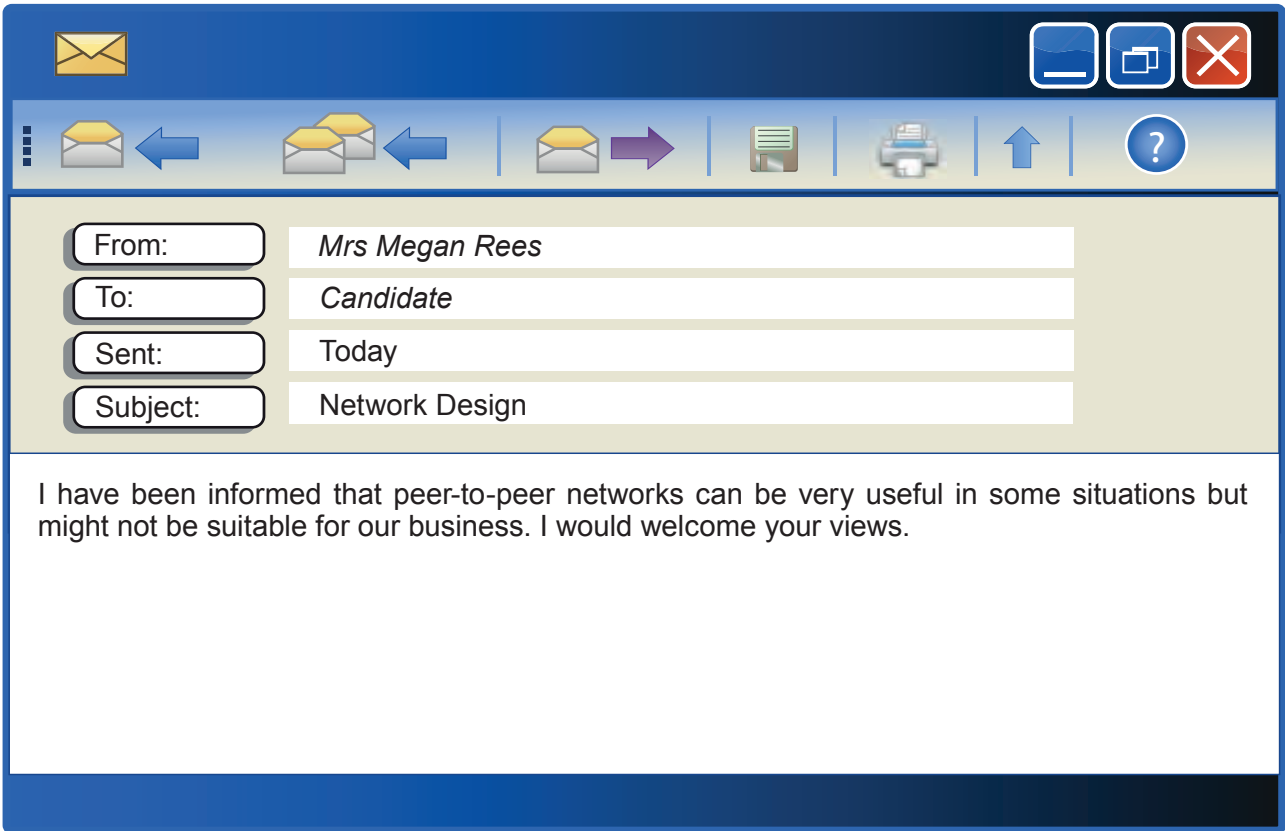

- (b) Explain the role of a router in a network using packet switching. [2]

.....

.....

.....

.....

7. Describe **in detail** a peer-to-peer network and a client-server network. Give reasons why you would recommend Garth View Farm Shop should install a client-server network as opposed to a peer-to-peer network. [10]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....
