## Mark Scheme

#### **Important Notice**

Mark schemes have been issued on the basis of **one** copy per Assistant Examiner and **two** copies per Team Leader.

#### JUNE 2007 MARK SCHEME

### Page 1 of 4 FIANL DEART

1		<ul> <li>Storage that allows reading of professionally produced material (CD ROM drive DVD)/necessary to input game instructions to her hard drive.</li> <li>Memory stick (floppy disk, CDRW)/ to save her half finished work and transpor it to a different machine</li> <li>Colour printer/Inkjet/Bubble jet/to produce hard copy of her work to hand in.</li> <li>Network Card/Modem and phone line/Broadband,ADSL,ISDN/to allow access to internet to facilitate use of e-mail.</li> <li>(2 per -, 1 for peripheral, 1 for explanation, max 8)</li> </ul>	
		(Eps., From Perspersion)	••
2	a)	<ul> <li>The user is far slower than the processor in making decisions</li> <li>The peripherals are slower than the processor</li> <li>This means that the processor has to wait</li> </ul>	101
		(1 per -, max 2)	[2]
	b)	Any suitable for batch processing. E.g. Utility bills/bank statements	[1]
	c)	- Data is prepared off - hie / upint at passed of pariferal - User is not provided direct access to processor/user is offline - Processor services more than 1 peripheral	
		<ul> <li>Carried out at off-peak times so that processor time not so important</li> <li>(1 per -, max 2)</li> </ul>	[2]
3	a)	<ul> <li>Commissioner is the expert in the field of the problem while the analyst is the expert in what is possible with a computer.</li> <li>Need to ensure that both understand the scale of the solution planned</li> <li>otherwise a different problem may be solved.</li> </ul>	9
		(1 per -, max 2)	[2]
	b)	<ul> <li>Interview/interviewee can think about responses/interviewer can alter question</li> <li>Questionnaire/large number of people's views can be included in short time</li> <li>Existing documentation/see all the necessary inputs and outputs required for the system/obtain ideas for the formatting.</li> <li>Observation/obtain an unvarnished view of what goes on in present solution.</li> </ul>	
		(1 per method, 1 for suitable advantage, max 2 methods, max 4)	[4]
	c)	<ul><li>(i) - Ensures that all users' requirements have been met</li><li>(ii) - Acts as a contract/makes sure analyst is paid.</li></ul>	[2]
	d)	<ul> <li>Adjustments in one stage of process may affect inputs necessary to that stage</li> <li>Requirements may alter as design becomes apparent</li> <li>Final stage for any system is obsolescence, therefore new version needs to be produced.</li> </ul>	
		(1 per -, max 2)	[2]

#### JUNE 2007 MARK SCHEME

4	a)	``	- Deletes everything on surface of disk  - Divides surface of disk into smaller areas  - to allow for storage and recovery of data items.  (1 per -, max 2)  - Scans the files on a computer system/received files  - to detect viruses	[2]
			- and remove viruses when they have been detected. (1 per -, max 2)	[2]
	b)		<ul> <li>Provides security measures (passwords/user IDs)/to protect files from unauthor access/identify user</li> <li>Provides an HCI/to allow communication with user</li> <li>Controls the hardware/to allow data to travel from one part of the system to another.</li> <li>Provides translators/so that software can be converted into form useable by the computer.</li> <li>Manages interrupts/handling requests from external units and prioritising needs (2 per -, max 4)</li> </ul>	•
5	a)		<ul> <li>Ensuring that data input matches data collected</li> <li>Done by double entry/onscreen techniques.</li> </ul>	[2]
	b)		<ul> <li>Any sensible application needing data to be accurate e.g. inputting details of bacheques.</li> <li>e.g. because whole application based on accuracy/bank needs to be trusted</li> </ul>	ank [2]
6	a)		7, 0, 4, (Must be in correct order. If > 3 answers, mark first 3 and deduct 1 for error)	[3]
	b)		e.g. 4, 6, 3, 7, 1, /Answer is not a whole number 0, /Can algorithm cope with no input 4, -6, 3, 7, 1/Can algorithm cope with negative numbers 4, 6, 6, 6, 6,/Can algorithm cope with equal values for B and C (1 for sensible data with reason, max 3)	[3]
7			<ul> <li>Inappropriate sites</li> <li>generally inappropriate like pornography</li> <li>Specifically inappropriate to that society</li> <li>Danger to structure of society because other views shown</li> <li>e.g. Hollywood type movies/Make-up/Consumer goods</li> <li>Easy access to consumer goods damaging local traders</li> <li>Everything available on Internet so no need to go out</li> <li>Work can be sent through Internet</li> <li>changing work practices like socialising</li> <li>Religion undermined because</li> <li>exposes people to new, contradictory views</li> <li>(1per -, max 7)</li> </ul>	[7]
			( iper -, iliax / )	ני ז

#### JUNE 2007 MARK SCHEME

8	a)		<ul> <li>The file is all the details of all the cars, it comprises</li> <li>a number of records, each containing data about a car</li> <li>Each item of data in a record is called a field e.g. price.</li> </ul>	[3]
	b)		- The records are of a predetermined size because each field is of a fixed size.	[2]
	c)		<ul> <li>Colour: Characters/Text/String/alphanumeric</li> <li>Engine size: Integer/Real</li> <li>Air Con: Boolean</li> <li>Price: Currency/Real/integer</li> </ul>	[4]
9	a)	•	<ul> <li>Set of application programs</li> <li>appropriate to many areas</li> <li>with associated documentation,</li> <li>(1 per -, max 2)</li> <li>Parts of package can share data/communicate with others</li> <li>Common layout make use/training easier</li> <li>Includes additional facilities which allow complex tasks to be performed</li> <li>(1 per -, max 2)</li> </ul>	[2] [2]
	b)		<ul> <li>File of records of car sales</li> <li>searched for date = current date</li> <li>Standard form of letter exists</li> <li>with fields identified</li> <li>which are completed with reference to data on data fields.</li> <li>Finished letters are then printed ready for sending.</li> <li>(1 per -, max 5)</li> </ul>	[5]
10	a)		<ul> <li>Geographic distribution</li> <li>Hardware used for communication</li> <li>(1 per -, max 1)</li> </ul>	[1]
	b)	•	<ul> <li>Bit rate is the number of bits transferred in a given time period</li> <li>Word processing uses text files requiring</li> <li>non time sensitive transfer of data</li> <li>meaning a small/low bit rate is acceptable.</li> <li>Video is time sensitive</li> <li>meaning a large/high bit rate is necessary.</li> <li>(1 per -, max 4)</li> <li>Touch sensitive screen</li> <li>showing list of options</li> <li>which call up other lists of options</li> <li>limited number of options means ease for user and</li> <li>security for system</li> <li>(1 per -, max 3)</li> </ul>	[4] [3]
	c)		- RSI /ergonomic hardware/regular breaks - eyestrain/correctly positioned monitor/anti glare screen/regular breaks - radiation/use low radiation monitor/limit time spent at terminal. (2 per -, 1 for issue, 1 for measure, max 2-, max 4)	[4]

[2]

until free location foundvalue inserted at free location

(1 per -, max 1 method, max 2)
