Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initial(s) and signature.

Check that you have the correct question paper.

This question paper contains a separate set of questions for each of the three options. Candidates should attempt only the TWO options for which they have been prepared.

For each option attempted, answer ALL of the questions in Section A and ONE question in Section B. Write your answers in the spaces provided in this question paper.

Indicate which question you are answering by marking the box (🗵).

If you change your mind, put a line through the box (🔀) and then indicate your new question with a cross (🔘). Do not use pencil. Use blue or black ink.

Show all the steps in any calculations and state the units.

Information for Candidates

The marks for the various parts of questions are shown in round brackets: e.g. (2).

The total mark for this paper is 100.

There are 5 questions in each option of this question paper.

There are 28 pages in this question paper. Any blank pages are indicated.

Advice to Candidates

This question paper is designed to give you the opportunity to make connections between different areas of economics and business and to use skills and ideas developed throughout the course in new contexts. You should include in your answers relevant information from the whole of your course, where appropriate.

You will be assessed on your ability to organise and present information, ideas, descriptions and arguments clearly and logically, taking into account your use of grammar, punctuation and spelling.

OPTION 1 – WHAT IS THE GLOBAL FUTURE?

If this option is attempted, answer ALL the questions in Section A and ONE question chosen from Section B.

If you answer Option 1 put a cross in this box \square .

SECTION A

Read carefully the material provided in Evidence A and then answer ALL the questions that follow.

Evidence A

These shoes were made for dumping

In July 2005, the European Commission (EC) concluded that Vietnam had dumped bicycles into the European Union (EU) market, and imposed an import tariff of 34.5% on bicycles from Vietnam. The EC accused Vietnam (together with China) of doing the same thing with leather shoes; this was quite harmful to the Vietnamese economy, because Europe is Vietnam's most important market for footwear, accounting for 70% of exports.

5

The EC dumping investigation against Vietnamese and Chinese leather shoes was started after the European Confederation of Footwear Industries (CEC), which makes 40% of the leather shoes sold in the EU, complained.

The EC said Vietnam dumped leather shoes by selling them at 23% less than a fair price, according to its calculations based on production costs in a "comparable country", while China sold its products at 80% less.

10

In reaching its decision to impose tariffs, the EC compared Vietnamese shoe prices against Brazilian shoe prices. Vietnam believes that this comparison is misleading since the average per capita income in Brazil is about US\$2,700 while it is just \$400 in Vietnam.

15

The CEC claims that a sharp increase of cheap shoes made in Vietnam (and China) has reduced sales of EU-made leather shoes. It shows that Vietnam exported 78.1 million pairs of leather shoes to the European market in 2002, and hoped to export 139.6 million in 2005. EU figures also show that from 2002 to 2004, the average price of Vietnamese shoes sold in its market dropped 30% while their volume increased 79%. The market share of Vietnamese products also increased sharply, from 11% to 15%.

20

Consequently, shoe production in the EU has dropped while imports have increased significantly. In 2000, the industry produced around 1 billion pairs, but in 2004 it only produced 704 million. In the meantime, imports increased from 836 million in 1998 to 1.62 billion in 2004.

25

Leave blank

British retailers and importers have called for action to lift curbs on cheap Chinese and Vietnamese clothing and footwear coming into the country. Retailers warn that protectionist measures will not save jobs and may mean that consumers could face higher prices. David Willetts, the shadow trade secretary believes that tariffs and quotas are bad news for the poorest people in our country – for whom the price of their clothes matters – and for retail, which has been hit hard enough in the last year."

If this option is attempted, answer ALL the questions in Section A and ONE question chosen from Section B.

If you answer Option 2 put a cross in this box \square .

SECTION A

Read carefully the material provided in Evidence A and B and then answer ALL the questions that follow.

Evidence A

Migrants boost UK's growth

Eastern European migrants have brought powerful benefits to Britain's economy since 10 new countries joined the European Union in 2004, according to recent research.

Peter Spencer, the author, says 'As a direct result, the UK workforce has become younger, more flexible and economical, easing the pensions burden and keeping interest rates lower than many commentators could have predicted'.

5

Britain was one of only three EU members to give citizens of the new member countries full rights to come and join its workforce. The 300,000 or so people who have chosen to do so have helped to keep inflation under control, and their taxes will boost the Treasury's coffers by £300m this year.

Heather Stewart, economics correspondent, Observer, Sunday 23 April 2006

Evidence B

Economist Intelligence Unit ranks Denmark as best place to do business

Denmark will be the best place in the world to conduct business over the next five years, according to the latest business environment rankings from the Economist Intelligence Unit.

The country's liberalising policies of recent years mean that Denmark's labour market receives a high score for its increasingly flexible, as well as highly educated workforce. Denmark also stands to benefit from improvements to its tax regime, which should become even more transparent, and from reform of local government, which should increase efficiency and reduce pressure on the central government.

OPTION 3 – COMPETITION, CONFLICT OR CONSENSUS?

If this option is attempted, answer ALL the questions in Section A and ONE question chosen from Section B.

If you answer Option 3 put a cross in this box \square .

SECTION A

Read carefully the material provided in Evidence A and B and then answer ALL the questions that follow.

Evidence A

A view of intangible assets from Cranfield University

Intangible assets and intellectual capital are sources of value and a source for sustainable business performance in today's competitive market. They are the sources of competitive advantages and above normal financial returns. Unlike physical resources that can only be used for one activity at a time – intangible assets can be deployed at the same time in multiple uses. For example the case of the knowledge to produce a specific drug, a brand such as Virgin, or even the corporate culture.

http://www.som.cranfield.ac.uk/som/research/centres/cbp/research/managing_intangible_assets/managing_intangible_assets.asp

Evidence B

Unilever to sell Birds Eye brand

Unilever, the world's second-biggest food and detergent company, is feeling the effect of increasing competition. It has agreed to sell most of its European frozen-foods unit to Permira Funds for 1.73 billion euros (\$2.21 billion) to focus on more profitable brands. The brands up for sale include Birds Eye and Igloo frozen foods. Unilever has decided to keep the Findus brand in Italy. The company employs 3,500 workers at a fish factory in Hull and at frozen vegetable operations in Lowestoft, Suffolk.

The decision to sell Birds Eye and the other businesses came amid pressure on frozen food sales from other areas such as fresh meat and chilled foods. Unilever's Chief Executive believes that the sale of its frozen foods business is the best way of increasing value for its shareholders.

Union leaders are demanding talks with senior management at the Birds Eye fish factory in Hull to seek assurances over the jobs of its 600 strong workforce and their pensions.

They are concerned that the new owner may cut staff to reduce costs and boost profits, signifying the end to the partnership approach with the GMB Trade Union. The close relationship with unions led to a thriving learning culture where the workforce had the confidence to cope with change.
