Duration: 2 hours

Candidate forename				Candidate surname			
Centre numb	er			Candidate nu	ımber		

INSTRUCTIONS TO CANDIDATES

- Write your name, centre number and candidate number in the boxes above. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer Section A and one question from Section B.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Write your answer to each question in the space provided. If additional space is required, you should use the lined pages at the end of this booklet. The question number(s) must be clearly shown.
- Do not write in the bar codes.

INFORMATION FOR CANDIDATES

- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is 60.
- The quality of your written communication will be taken into account in the marking of your answer to Section B.
- This document consists of 20 pages. Any blank pages are indicated.

Transport taxes

The UK government applies taxation throughout the transport market in order to change behaviour and to raise revenue.

These taxes include excise duty on the purchase of petrol and diesel, Vehicle Excise Duty on cars (generally known as road tax) and the most recent tax, Air Passenger Duty (APD).

APD is an indirect tax which is charged on each individual passenger flying from UK airports. It was first introduced in 1994 and is now charged at four different 'bands' depending on the distance of the flight. The UK is not the only country with such an indirect tax. Other European countries have similar taxes. Ireland has an Air Travel Tax and Germany introduced a departure tax in January 2011.

The following article discusses the impact of APD on the UK economy. It is followed by Fig. 1 which shows the changes in passenger numbers and the level of APD revenues since 2003/4.

APD: a tax on all your dreams

The growth of low-cost airlines followed deregulation of European Union (EU) air transport in the 1990s and resulted in increased competition in the air passenger market. As a result, air travel became more affordable and British families started to travel longer distances for their annual holiday. Twenty years later, after a succession of increases in APD, up by as much as 333% in six years, you could be forgiven for thinking that the government was trying to make flying, once again, a luxury.

The number of passengers taking flights from UK airports fell between 2007 and 2010. Air passengers flying from the UK are already the most heavily taxed in the world. On average they pay almost nine times more duty than people flying from other European airports. In fact the UK Treasury collected almost twice as much in passenger taxes in 2011 than all other European countries combined.

The Chancellor of the Exchequer has received many complaints about APD. These include those from businesses, tourist boards, MPs, the British Chambers of Commerce and the World Tourism Council.

Total passengers (millions)	Total revenue from APD (£millions)
90.9	791
98.1	864
102.5	905
106.1	971
107.9	1994
102.1	1862
96.7	1856
93.7	2155
97.9	2605
	(millions) 90.9 98.1 102.5 106.1 107.9 102.1 96.7 93.7
