**ADDITIONAL MATERIALS**

In addition to this examination paper, you will need a calculator.

**INSTRUCTIONS TO CANDIDATES**

Use black ink or black ball-point pen.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer all the questions in Section A. You may use continuation paper on page 10 if necessary, taking care to number the continuation correctly.

Answer **one** question from Section B.

You are advised to spend no more than one hour on Section A.

**INFORMATION FOR CANDIDATES**

The number of marks is given in brackets at the end of each question or part-question. Section A has 40 marks and Section B has 20 marks.

You are reminded that assessment will take into account the quality of written communication used in answers that involve extended writing (Section B).

You are reminded that the essay questions in Section B are synoptic and so will test understanding of the connections between the different elements of the subject.

**SECTION A**

*Answer all questions in this section.*

Examiner  
only

1. The diagram below shows the cost and revenue curves for a profit-maximising monopolist in the long-run situation.

AR = Average Revenue  
MR = Marginal Revenue  
AC = Average Cost  
MC = Marginal Cost

- (a) Using the letters in the diagram identify:
- (i) the monopolist's profit-maximising output; [1]
  - .....
  - (ii) the monopolist's abnormal profit. [1]
  - .....
- (b) Explain why a monopolist is able to earn abnormal profits in the long-run. [3]

**7. MPC to hold interest rates at 0.5%**

Bank of England Governor Mervyn King has fought off demands from some members of the Monetary Policy Committee (MPC) to raise interest rates. They wanted interest rates to rise from 0.5% to at least 1%. Figures out next week are expected to show inflation for January 2011 jumped above 4%, more than 2% above the MPC’s inflation target of 2%, with the prospect of it nearing 5% before the summer.

However, King has insisted that even a modest rise in interest rates could harm the recovery, which is already threatened by Government spending cuts and weak domestic demand. Government figures last month revealed that the economy’s Gross Domestic Product (GDP) fell by 0.5% in the final quarter of 2010.

MPC member Andrew Sentance has consistently argued that rates need to rise before businesses begin to raise prices and workers start to increase wage demands to cope with higher inflation.

*Adapted from the Guardian, 2 February 2011*

Discuss whether the Monetary Policy Committee (MPC) was right to keep interest rates at 0.5%. [6]

**SECTION B**

*Answer one question from this section.*

- 9. To what extent should governments intervene to correct market failure? [20]
- 10. “Many UK industries are dominated by a few large firms.” How far is this situation bad for the UK economy? [20]
- 11. Discuss the view that the Government should encourage an increase in the number of mergers between UK firms. [20]

**Answer the question from Section B using the following pages.**
