Thursday 19 May 2011 – A		Paper Reference 6GS01/01
You must have: Insert (enclosed) Calculator		Total Marks

## **Instructions**

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** guestions.
- Answer the questions in the spaces provided
  - there may be more space than you need.
- Do not return the insert with the question paper.

## Information

- The total mark for this paper is 90.
- The marks for **each** question are shown in brackets
  - use this as a guide as to how much time to spend on each question.
- Quality of written communication will be taken into account in the marking of your answers
  - you should take particular care with your spelling, punctuation, grammar and clarity of expression.

### **Advice**

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

#### **SECTION A**

Answer ALL questions.
You should aim to spend no more than 20 minutes on this section.

Choose an answer A, B, C or D, and put a cross in the box  $\boxtimes$ . If you change your mind, put a line through the box  $\bowtie$  and then mark your new answer with a cross  $\boxtimes$ .

Use the information below to help you answer questions 1 to 5.

## **Animal Testing in the UK**

In the UK, tests using live vertebrates must be licensed under the Animals Act of 1986. The Act aims to minimise the amount of pain inflicted during tests. The Act does not apply to the use of invertebrates such as fruit flies.

In 2002, mice accounted for 84% of a total of 2.65 million animals used. Mice are used so often because 99% of human genes have an equivalent in mice. A surprisingly large proportion of the total number of animals, some 710 000, were genetically modified.

1 The sentence "In the UK, tests using live vertebrates must be licensed under the

	Animal	s A	ct of 1986" contains
	$\times$	A	only fact
	$\times$	В	only opinion
	X	C	both fact and opinion
	$\times$	D	no fact or opinion
			(Total for Question 1 = 1 mark)
2			nce "A surprisingly large proportion of the total number of animals, some vere genetically modified" contains
	$\times$	A	only fact
	$\boxtimes$	В	only opinion
	$\boxtimes$	C	both fact and opinion
	$\boxtimes$	D	no fact or opinion
			(Total for Question 2 = 1 mark)

3	To the testing		rest 1000, how many vertebrates other than mice were used in animal 2002?
	$\times$	A	365 000
	×	В	424 000
	×	C	596 000
	×	D	710 000
			(Total for Question 3 = 1 mark)
4			rest 1%, what percentage of the vertebrates used for testing in 2002 were y modified?
	$\times$	A	26%
	$\times$	В	27%
	$\times$	C	28%
	$\times$	D	29%
			(Total for Question 4 = 1 mark)
5	Based of		the passage, what is the most likely reason that the Act does not apply to
	×	A	the Act only applies to animals which are genetically modified
	×	В	there are no similarities between the DNA of humans and the DNA of fruit flies
	×	C	insects do not feel pain in the same way as animals such as mammals
	×	D	only a small number of fruit flies are used in tests
			(Total for Question 5 = 1 mark)
6	Which	one	e of the following would be a suitable topic for scientific investigation?
	×	A	is there life after death?
	×	В	should we spend more money on cancer research?
	×	C	are nuclear weapons immoral?
	×	D	is there life on other planets?
			(Total for Question 6 = 1 mark)

/	in the	cop	pernican model of the solar system
	X	A	other planets and the Sun orbit the Earth
	×	В	other planets orbit the Sun and the Sun orbits the Earth
	X	C	the Earth and other planets orbit the Sun
	×	D	the Earth orbits the Sun and other planets orbit the Earth
			(Total for Question 7 = 1 mark)
8	"Intelli	gen	nt Design" is an argument used to support
	X	A	Darwinism
	×	В	Reductionism
	×	C	Universalism
	×	D	Creationism
			(Total for Question 8 = 1 mark)
	Read tl	ne f	following list and then answer Questions 9 and 10.
	(iii) (iv) (v)	th th ele	ructure of DNA uclear weapons eory of relativity e internet ectric cars e law of gravitation
9	Which	one	e of the following combinations refers only to scientific discoveries?
	X	A	(i) (ii) and (vi)
	X	В	(i) and (iii)
	X	C	(iii) (iv) and (v)
	$\times$	D	(ii) (iv) and (v)
_			(Total for Question 9 = 1 mark)
10	Which	one	e of the following combinations refers only to technological developments?
	X	A	(i) and (ii)
	$\times$	В	(i) and (iii)
	X	C	(ii) (iv) and (vi)
	$\times$	D	(ii) (iv) and (v)
			(Total for Question 10 = 1 mark)

		which there is a formal separation between religious beliefs and practices
and t		peration of the state is best described as titular
X		popular
×		secular
×		insular
	U	
		(Total for Question 11 = 1 mark)
I <b>2</b> Whic	h one	e of the following best describes civil liberties in the UK?
$\times$	A	civil liberties can be suspended in emergencies
X	В	civil liberties cannot be suspended in emergencies
$\times$	C	civil liberties are not determined by law
$\times$	D	civil liberties apply only to adults
		(Total for Question 12 = 1 mark)
<b>13</b> "Com	nmon	law" is
$\times$	A	the set of laws passed by Parliament
$\boxtimes$	В	concerned only with the punishment of offenders
X	C	the set of laws applied most frequently
X	D	based on custom or precedent
		(Total for Question 13 = 1 mark)
I <b>4</b> Whic	:h one	e of the following is true of a magistrates' court?
×	A	magistrates can only impose fines
×	В	there is no jury in a magistrates' court
×	C	magistrates deal only with motoring offences
×	D	an appeal against a sentence can be dealt with in a magistrates' court
		(Total for Question 14 = 1 mark)

<b>15</b> In t	ne con	itext of punishment, rehabilitation means that prisoners
X	A	receive training to help their return to normal life
X	В	pay compensation to their victims
X	C	demonstrate that their criminal behaviour has stopped
X	D	receive help with accommodation when released
		(Total for Question 15 = 1 mark)
		Use the information below to help you answer questions 16 to 20.
		The History of Antiseptics
	184 look He k was mat pass Whe mor theo	Assa Semmelweiss was working in the maternity clinic of Vienna Hospital in 7. He noticed that mortality rates were considerably higher for mothers seed after by trainee doctors than for mothers looked after by midwives. Knew that trainee doctors carried out post-mortem examinations without hing their hands afterwards. They then went on to treat women in the ternity clinic. Semmelweiss thought that perhaps the trainee doctors were sing on "infectious particles" from post-mortems to the expectant mothers. Then he persuaded the trainee doctors to wash their hands between treatments, traility rates fell significantly. Semmelweiss' ideas eventually led to germory and the control of other infections by the use of antiseptics.
HOS	•	n 1847" contains  only fact
X		only opinion
X		both fact and opinion
X		no fact or opinion
	D	(Total for Question 16 = 1 mark)
<b>17</b> The	phras	e "He noticed mortality rates were considerably higher" contains
X	A	only fact
X	В	only opinion
×	C	both fact and opinion
X	D	no fact or opinion
		(Total for Question 17 = 1 mark)

$\times$	Α	hypothesis
×	В	theory

#### Do cars have a future?

Among the most obvious signs of our dependence on fossil fuels, are our clogged roads and motorways. The 30 million vehicles in the UK are using up our shrinking resources and make a significant contribution to our carbon footprint, as well as emitting other pollutants. With rising public concern about the environment and sustainability, car manufacturers are now investing heavily in research on alternatives to the traditional internal combustion engine (ICE) powered by petrol or diesel fuel, which is only about 20% efficient.

In the short term, there are several alternatives put forward as replacement fuels for ICEs. Biofuels, such as bioethanol, are derived from vegetation and are claimed to be "carbon neutral". This ignores any other carbon cost associated with the fuel, as well as arguments about deforestation and the use of agricultural land. Another possibility is the use of hydrogen gas. This would only reduce carbon emissions if it could be produced from water by electrolysis, using electricity from renewables or nuclear power stations. There are also concerns about the safety of cars equipped with highly pressurised hydrogen gas containers as well as difficulties with refuelling.

In the longer term, electric vehicles may present a more viable alternative. The mechanical simplicity of electric motors helps to make them 4 times more efficient than ICE powered cars and vans. However, the overall efficiency and any saving in carbon emissions depend on the method of electricity generation. A coal-fired power station is typically 35% efficient, unless waste heat energy can be used in a combined heat and power scheme. Some 80% of our electricity is still produced from the burning of fossil fuels. Electric vehicles also need an energy store. If this is provided by batteries, electric vehicles have a low range and a long recharge time. One development that might eventually overcome some of these problems is the fuel cell, which reacts hydrogen with oxygen to produce electricity. Water is the only waste product in this process.

Any addiction needs a cure or a fix. Some argue that our addiction to the personal mobility and freedom which cars give us can be cured by improved public transport, combined with changes in behaviour and work patterns. But we don't need to suffer the misery of withdrawal because the evidence shows clearly that a fix is possible. Our love affair with the car is not over yet.
