Tuesday 10 January 2012 Time: 1 hour 30 minute		Paper Reference 6GS01/01
You must have: Insert (enclosed) Calculator		Total Marks

# **Instructions**

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
  - there may be more space than you need.
- Do not return the insert with the question paper.

# Information

- The total mark for this paper is 90.
- The marks for **each** question are shown in brackets
  - use this as a guide as to how much time to spend on each question.
- Quality of written communication will be taken into account in the marking of your answers
  - you should take particular care with your spelling, punctuation, grammar and clarity of expression.

# **Advice**

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

Turn over ▶

## **SECTION A**

# **Answer ALL questions.**

You should aim to spend no more than 20 minutes on this section.

Choose an answer A, B, C or D, and put a cross in the box ⋈.

If you change your mind, put a line through the box ⋈

and then mark your new answer with a cross ⋈.

Use the information below to help you answer questions 1 to 5.

Country	Total household waste per person (kg per year)	Household waste recycled per person (kg per year)
UK	600	90
Netherlands	600	375
Greece	420	40
Finland	450	90
France	590	190

•	vvnici	ı cot	untry recycles the smallest percentage of its household waste?
	X	A	UK

C Netherlands

**B** Greece

D Finland

X

(Total for Question 1 = 1 mark)

2 To the nearest kg, the yearly mean amount of recycled waste per person in the five countries is

■ A 90 kg

■ B 157 kg

# Later retirement may delay the onset of dementia

A study of 1,320 people with dementia found that those who retired later developed dementia later. Professor Simon Lovestone, Scientific Adviser to the Alzheimer's Research Trust which funded the study, concluded: "The intellectual stimulation that older people gain from the workplace may prevent a decline in mental abilities."

Dr Susanne Sorensen, Head of Research at the Alzheimer's Society, said: "People who retire early often do so because of conditions like diabetes, which increase the risk of dementia. It could also be that working helps keep mind and body active, which may reduce the risk of dementia."

Caring for the 700,000 Britons with dementia, most of whom have Alzheimer's, costs a staggering £17 billion a year.

·

30	In the UK, the monarch is both Head of State and Head of the Church of England. However, religious hatred and discrimination against individuals because of their religion are illegal. Until 1994, many shops were prevented from opening on Sundays because Sunday was still seen as a Christian "day of rest". Yet for many years, the law has permitted many practices, such as divorce and abortion, which conflict with the beliefs of some religions.
	To what extent can Britain be described as a secular state?

### **Crime and Punishment**

The prison population in Britain soared to 85,000 in 2010, raising questions about both the purposes and effectiveness of imprisonment. Locking criminals away stops them offending and may satisfy our desire for retribution against those who have committed serious offences, but do these short-term objectives justify the yearly cost of £3 billion\*? We already spend more of our money on the prison system than the USA or any other EU country.

In the 1990s we were told that "prison works", yet nearly 50% of prisoners reoffend within one year of being released. For serial offenders who have been imprisoned more than 10 times, this figure rises to 70%. Despite this obvious failure of penal policy, British politicians have engaged in what has been described as an "arms race", as they compete to throw ever more public money into the prison building programme. Even as crime rates have fallen, prison sentences have increased for a wide variety of offences. At the same time new offences have attracted custodial sentences and prisoners released on parole have been recalled in greater numbers.

Reoffending is estimated to cost Britain £11 billion a year, yet efforts to rehabilitate or re-educate prisoners have traditionally been seen as soft options, rather than serious attempts to solve an enduring problem. Most prisoners are male, have a drug problem, a very poor standard of education and suffer from mental illness. When released, 30% of prisoners have nowhere to live, yet there is a clear correlation between homelessness and reoffending. Many of the destitute on our streets or clogging up the prison system are ex-servicemen, unable to reintegrate into society.

Murderers and armed robbers need to be locked away but we need to stop and think seriously about how we punish other offenders. Compared to Holland, France and Switzerland, we imprison almost 50% more offenders, yet our rate of reoffending is the highest. As Ken Clarke said in 2010, banging up criminals may make us feel better but we need more effective ways of dealing with crime.

\* 1 billion = 1,000,000,000
