

## PAPER 1 HUMAN UNIT 2 Settlement Dynamics

**Recommended Prior Knowledge** Some of the ideas in this unit may be familiar from IGCSE. However the unit is self contained and does not depend upon prior knowledge.

**Context** This unit consists of the study of urban and rural settlements and the processes which produce them.

**Outline** The interaction and inter-relationships of rural and urban settlements are a fundamental aspect of the subject and it should be appreciated that settlement changes over time and space. Therefore the 'dynamics of the unit title is its underpinning principle.

Content	Objectives	Terminology	Teaching Strategies (TS) and Activities (A)	Resources
Relationships between settlements (2.1)	Knowledge and understanding of the distinction between urban and rural	<b>Rural urban</b>	<p><b>TS.</b> Provide two images: 1. Rural 2. Urban Challenge the class to define the terms on the basis of the attributes shown by each image. Usually photographs are the most appropriate images but it could be a passage from a novel, a cartoon, a painting, a poem etc. Be inventive.</p> <p><b>A.</b> A spider diagram could be built up from the image and other characteristics added as the class think of ideas associated with urban and rural environments. It does not take long but is an effective way of introducing the new unit.</p> <p><b>TS.</b> Introduce the idea of rural and urban areas as systems with inputs and outputs in order to maintain the links with the physical core. Suggest that they are both subject to change and processes that result in change over time. Hence the unit title <b>Settlement dynamics</b></p>	<p>Nagle CS Chap 1. Ross p.269 Prosser p.179 Nagle p.205</p> <p>Carr has several relevant chapters 11-16 and good case studies</p>
	Knowledge of the meaning of the term settlement and understanding of the idea of settlement hierarchy	<b>Settlement Function</b>	<p>Definition of a settlement. (2.1)</p> <p><b>TS</b> Difficulty of defining settlements. For instance, request suggestions for difference between a village and a town. Possible criteria:</p> <ul style="list-style-type: none"> <li>• population size</li> <li>• physical size</li> <li>• functions</li> </ul>	<p>Nagle CS Chap 1</p> <p>Flint and Flint p.42 Nagle p.249</p>

<p>Urban trends and Issues of urbanisation (2.3)</p>	<p>Knowledge of process of urbanisation</p> <p>Knowledge and understanding of the processes associated with urbanisation</p>	<p><b>Range</b> <b>Order</b> <b>Threshold</b> <b>Population</b> <b>High order/low order goods</b> <b>Convenience/comparison goods</b></p> <p><b>Sphere of influence</b></p> <p><b>Primate city</b> <b>Rank-size rule</b></p> <p><b>Urbanisation</b> <b>Urban growth</b></p>	<ul style="list-style-type: none"> <li>• Discussion will focus on these central ideas. Give examples of different countries and their own classifications. <b>See Fig.1</b></li> </ul> <p><b>A.</b> Provide a list of functions and a selection of settlements in tabulated form. A tick is placed in the box if the function is likely to be found in that settlement. <b>See Fig.2</b></p> <p><b>TS.</b> This then provides a basis for discussion and leads into:</p> <ul style="list-style-type: none"> <li>• Range</li> <li>• Threshold population</li> <li>• Order of a good high/low/convenience/comparison</li> <li>• Sphere of influence</li> </ul> <p>Once these are defined and understood then size and spacing can be introduced. Simple Christaller model of fewer higher order settlements more widely spaced and the principles underlying the model. <b>Central Place theory will not be examined;</b> however, it is possible to introduce the hexagonal model if desired. Not essential, the principles are sufficient.</p> <p><b>TS.</b> Suggest that so far the study has been a static one and now it is necessary to consider the processes.</p> <p><b>Settlements change over time. (2.3)</b> Growth- introduce idea of the primate city-definition- suggest the idea of rank-size simply. Do not need detail but it helps to endorse the idea of the primate</p>	<p>Waugh p.406-7 Nagle p.252</p> <p>Bowen and Pallister 220-222 Nagle AS P.219-221</p> <p>Ross p.273 Waugh 404 Nagle p.291 Prosser p.180</p> <p>Bowen and Pallister p184-191- very good on processes and effective use of photographic images Guinness &amp; Nagle 67 – 70</p> <p>Ross p.270-1 Hart p.191 Nagle AS p.206-213 Waugh p.418-9 Prosser p.189</p>

<p>Urban Structure (2.4)</p>	<p>Knowledge and understanding of the structure and dynamics of urban areas</p>	<p><b>Urban sprawl</b>  <b>CBD</b>  <b>Inner city</b>  <b>Suburb</b>  <b>Suburbanisation</b>  <b>Push-pull factors</b>  <b>Rural-urban fringe</b>  <b>Rural urban continuum</b></p> <p><b>Bid-rent theory</b>  <b>PLVI</b></p> <p><b>Cultural enclaves</b>  <b>CBD</b>  <b>Inner City</b>  <b>Suburb</b>  <b>Urban deprivation</b>  <b>Ethnic segregation</b></p>	<p>Growth links to the idea of <b>urbanisation</b>  Definition, distinguish between urbanisation and urban growth.  Causes and consequences of urbanisation in LEDCs and MEDCs</p> <p><b>MEDCs e.g. UK</b>  Historical background-19c Urbanisation, Industrial revolution, i.e. Primary to secondary industry rural-urban migration as a consequence. Growth of the inner city, suburbanisation. Outward unplanned growth- urban sprawl. Car culture in the US could be mentioned for comparative purposes.</p> <p><b>A. Annotate a diagram to show the rural-urban continuum</b> See Fig. 3</p> <p><b>Consequences: URBAN STRUCTURE</b></p> <p><b>TS. Introduce</b> Bid rent theory to establish location of the concentric rings. A simple graph of land value plotted against distance from the centre ( PLVI) demonstrates changing land use across the urban area.  <b>A.</b> Need to explain and a graph can be built up and annotated  <b>TS.</b> The idea of a model to simplify the complexities of the reality of land use in the urban area. <b>Burgess model.</b>  <b>Other models: Harris and Ullmann and Hoyt. Mann’s application to the UK.</b></p> <p><b>Consider</b> the pattern, details of characteristics of each area, e.g. Housing density, type, age etc. Land use residential, industrial, retail, leisure infrastructure: <b>CBD, Inner City, cultural enclaves, suburbs.</b>  <b>Vertical as well as horizontal functional zonation.</b> E.g. CBD office space above ground floor retail.</p>	<p>Chaps .2 and 3 Nagle CS  Hart p.197  Flint and Flint p.29  Nagle p.26-9  Nagle p.270-1  Nagle p.258-9  Hart p.195-very good on push-pull factors  Prosser p.188  Witherick p454 and Waugh p.516 Rural urban cont.</p> <p>Waugh p.425 and Nagle p.272  Bid rent</p> <p><b>Models- Flint p.54-6</b>  <b>Ross p.276</b>  <b>Waugh p.420-3</b>  <b>Prosser p.184</b>  <b>Nagle AS P.227-231</b>  <b>Bowen and Pallister p215</b></p> <p>Hart p.243-5  Nagle AS p.240-244  <b>CBD-</b> Nagle AS p.256-8  Waugh p.430-436  Prosser p.191  <b>Nagle p.276</b>  <b>Flint and Flint p.69</b>  <b>Inner city Nagle p.277</b>  <b>Prosser p.203-6</b>  <b>Nagle AS p.254-6</b></p>
------------------------------	---	---	---	--

<p>Urbanisation (2.3)</p>		<p><b>Multi-ethnicity</b></p> <p><b>Informal economy</b></p> <p><b>Counterurbanisation Re-urbanisation gentrification</b></p> <p><b>hypermarket science park business park Gatekeepers</b></p> <p><b>Brownfield Greenfield site Pedestrianisation Bus lanes Photochemical smog</b></p>	<p>(Might consider delimitation of the CBD and possible urban field work at this point) Reasons: Invasion and succession may not only be the result of economic factors also political, e.g. planning and changing govt. E.g. Johannesburg illustrates beautifully how the post apartheid govt resulted in corporate business relocating to a northern suburb (Sandton) whilst the CBD was invaded by the black population who succeeded in taking over the high-rise, high value locations in the CBD with their small businesses (often ground floor retail and first floor services) and informal economy.</p> <p>These are the processes responsible for the urban structure outlined above</p> <p>TS. <b>Change in urban areas:</b> Counter urbanisation, reurbanisation and gentrification need to be introduced and discussed</p> <ul style="list-style-type: none"> <li>• Retail-out of town shopping and hypermarkets in suburban locations,</li> <li>• manufacturing and service industries to outer edge of urban space i.e. Suburban locations</li> <li>• growth of cultural enclaves</li> </ul> <p>Reasons for the changes: economic, social, political</p> <p><b>Consequences of urbanisation:</b></p> <ul style="list-style-type: none"> <li>• <b>Use of vacant land- brownfield v greenfield sites</b></li> <li>• Housing</li> <li>• Congestion-transport</li> <li>• Pollution</li> </ul>	<p><b>Waugh p.437-441</b></p> <p>Cultural enclaves esp.Carr p.175</p> <p>Bowen and Pallister p.184-191 Chap 6 in Nagle CS Bowen and Pallister p.204-208 Counterurbanisation and re-urbanisation Chap 7 Flint and Flint Ross p.289 and Hart p.234 very good on gentrification Nagle p.283 Carr p. 210 Hart p. 237-very good on gatekeepers</p> <p>Carr p.209 Merry Hill Waugh p.458-9 Bluewater Ross p.297 good on retailing issues</p> <p>Ross p.285-6 and Hart p.195-204 Los Angeles case study Ross p.292-3 Waugh p.446</p>
-------------------------------	--	--	---	---

		<p><b>Urban renewal</b> <b>Decentralisation</b> <b>Green belt</b> <b>New Town</b></p> <p><b>Informal settlement</b> <b>Shanty town</b> <b>Squatter settlement</b></p> <p><b>Self-help schemes</b> <b>site and services schemes</b> <b>Rural growth poles</b> <b>Top- down bottom – up strategies</b> <b>Multiplier effect</b> <b>Green revolution</b></p>	<ul style="list-style-type: none"> <li>• Unemployment</li> </ul> <p><b>Management of these problems.</b> Strategies like: <b>Green Belts, New Towns out of town retail, decentralisation, and Local Authority Planning policy.</b></p> <p>These points could be taught via a case Study of a city in an MEDC. E.g. London</p> <p><b>LEDCs</b> <b>A case Study</b> should be selected (2.3)</p> <p>TS. Causes: <b>Rural- Urban migration.</b> Push-pull factors cross reference to MEDCs as well. <b>See Fig.4</b> for an introductory resource to discuss the push-pull factors. A springboard for discussion about the factors both in general terms and in relation to the example.</p> <ul style="list-style-type: none"> <li>• Environmental factors e.g. land use and productivity</li> <li>• Human factors eg. Characteristics of the population</li> <li>• The magnet of the urban area</li> </ul> <p>should be considered. This links back to migration and carrying capacity in Unit 1.2 and 1.3</p> <p><b>Consequences of LEDC urbanisation (2.3)</b></p> <ul style="list-style-type: none"> <li>• Informal settlements- Shanty towns/squatter settlements</li> </ul> <p>Location, characteristics, problems management of these areas within the urban structure. <b>A.</b> Analyse a map of location of informal settlements <b>Fig.5</b></p> <p>Could compare a photo of a squatter settlement with that of an inner city area-describe, annotate and explain <b>See Fig.6</b></p> <p>Compare the structure of an LEDC city with that of an MEDC city.</p>	<p>Nagle CS Chap 4 and 5 Hart p.2-4-211 very good Flint and Flint p.131 and 141 Nagle AS p. 245-253 very good Nagle 280-2 Ross p.305-6 and Carr p.222 London Docklands-urban renewal Ross p.281 Bradford case study</p> <p>Nagle AS p. 259-264 Case Study of Sao Paulo Nagle CS Chap 9 and 10 Ross 319-310 Waugh p.442-451 Good case studies of Cairo Nairobi and Singapore Nagle p.294 Cairo and South Africa p.295-6</p>
