1 Study the extract below and answer parts (a) and (b) which follow.

***Class-based Politics***

Britain is a particularly class-conscious society. The class divisions created by the Industrial Revolution remained almost unchanged until the 1940s, although they have been very much modified by economic and industrial changes since. The working class relied on collective action to improve their situation while the middle class relied on individualistic solutions. A consequence of this was that the working class increasingly supported Labour, with its message that state intervention could help them, while the 'solid' middle class increasingly turned to the Conservative Party.

2 Study the extract below and answer parts (a) and (b) which follow.

**Voting Behaviour**

*Tactical voting* increased generally in the 1980s and 1990s, boosting the strength of non-Conservative parties. In the case of the Liberal Democrats it was particularly important, helping to double their tally of seats from 20 to 46 in 1997, despite a small decline in their share of the vote. Some tactical voting continued in 2001, particularly between Labour and Liberal Democrat supporters. Studies suggest that the amount of tactical voting has risen slightly in recent years to about 10% of all votes cast. However, the degree of tactical voting should not be exaggerated.

3 Study the extract below and answer parts (a) and (b) which follow.

**The Additional Member System (AMS)**

The additional member system (AMS) has been created in order to combine the advantages of local constituency links with greater *proportionality*. Each voter has two votes – one for the constituency MP and the other for a party list. The constituency MP is voted in under either the alternative vote system or the first-past-the-post system, with other MPs elected from either a regional or national list. The list seats are allocated to help compensate, or act as a corrective, for the disproportionality of the constituency vote.

- (a) Explain the term *proportionality* used in the extract. (8 marks)
- (b) Assess the disadvantages of the additional member system (AMS). (22 marks)

4 Study the extract below and answer parts (a) and (b) which follow.

**Referendums**

Referendums have, quite suddenly, become an accepted part of the political scene. For a long time British politicians would have nothing to do with them. After all, referendums were difficult to square with the sovereignty of Parliament, disciplined and programmatic parties, and ideas of strong government. Since then, and particularly since the election of a Labour Government in 1997, referendums have become commonplace; indeed, in 1999 some commentators wondered whether they might be leading to *voter fatigue*.

- (a) Explain the term *voter fatigue* used in the extract. (8 marks)
- (b) Assess the effectiveness of the measures designed to increase participation, such as electoral reform and greater use of referendums. (22 marks)
