- (a) (i) By referring to the table, explain what is meant by [4]

Data _____

Information _____

(ii) By referring to the figures for the Men's Department, explain what is meant by knowledge. [3]

A secretary enters the sales figures into the following spreadsheet.

	D	E	F	G
3	Department	Target Sales (£)	Actual Sales (£)	Target achieved?
4	Men	15 000	12 314	N
5	Women	20 000	21 304	Y
6	Children	10 000	10 312	Y
7				
8	Total	45 000	43 930	N

(b) Describe how the contents of each of the following cells could be calculated by the spreadsheet. [4]

E8 _____

G4 _____

(c) The contents of cell F4 should be 12341.

- (i) Name and describe the type of error which has occurred. [2]**

Name _____

Description _____

- (ii) Explain how verification can be used to detect errors. [3]**

(d) The product code for a particular item is **45667**, where 7 is the modulus 11 check digit.

Show how this check digit is calculated. [6]

BLANK PAGE

(Questions continue overleaf)

2 One of the main components of the CPU is internal memory.

(a) Explain how each of the following is used in a typical computer. [4]

ROM _____

RAM _____

(b) Name and describe two of the other main components of the CPU. [6]

Name _____

Description _____

Name _____

Description _____

3 A hotel has a number of interactive terminals for use by guests.

(a) Each terminal can be used to access the Internet.

(i) Describe the main features of a typical web browser. [4]

(ii) Describe the main features of a typical search engine. [4]

Guests can access the terminals using speech input.

- (b)** Identify **two** hardware components required specifically for speech input. [2]

1. _____

2. _____

- (c)** Identify **two** software components required specifically for speech input. [2]

1. _____

2. _____

- (d)** Identify **two** benefits and **two** drawbacks of using speech input. [4]

Benefits

1. _____

2. _____

Drawbacks

1. _____

2. _____

- (e)** The speech input application was developed using open source software.

Explain what is meant by open source software. [4]

4 A company's LAN is connected to the Internet.

(a) Name and describe **two** different types of LAN topology. [6]

Name _____

Description _____

Name _____

Description _____

(b) Explain the purpose of each of the following network resources. [6]

Switch _____

Proxy server _____

(c) TCP/IP is the main communication protocol used on the Internet.

(i) Explain what is meant by a communications protocol. [3]

(ii) Describe the main features of the IP part of this protocol. [3]

(d) Describe **two reasons why the company should consider selling its products using the Internet. [4]**

1. _____

2. _____

5 An organisation introduces a new database system.

- (a)** During the development of the system, a feasibility study was carried out.

Explain what is meant by social feasibility. [3]

(b) Describe what happens during the design stage of an ICT system. [6]

(c) The information system was tested.

Describe the main features of [6]

Application testing _____

Acceptance testing _____

(d) Describe two advantages of a custom-built system over an off-the-shelf system. [4]

1. _____

2. _____

(e) Explain what happens during system changeover. [4]

6 EFTPOS technology is used extensively in supermarkets.

(a) Describe the main features of EFTPOS technology. [4]

(b) Describe one benefit and one drawback of this use of EFTPOS for: [8]

The supermarket

Benefit _____

Drawback _____

Customers

Benefit _____

Drawback _____

Supermarkets use RFID technology.

(c) Describe the main features of RFID technology. [4]

(d) Describe one advantage of using RFID instead of barcode for stock control. [2]
