Mark Scheme

Mathematics and Statistics B *(MBM5)*

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available to download from the AQA Website:

Key to Mark Scheme

| | | |
|---------------------------|---|---------------------|
| M | mark is for | method |
| m | mark is dependent on one or more M marks and is for | method |
| A | mark is dependent on M or m marks and is for | accuracy |
| B | mark is independent of M or m marks and is for | method and accuracy |
| E | mark is for | explanation |
| ✓ or ft or F | follow through from previous | incorrect result |
| CAO | correct answer only | |
| AWFW | anything which falls within | |
| AWRT | anything which rounds to | |
| AG | answer given | |
| SC | special case | |
| OE | or equivalent | |
| A2,1 | 2 or 1 (or 0) accuracy marks | |
| -x EE | deduct x marks for each error | |
| NMS | no method shown | |
| PI | possibly implied | |
| SCA | substantially correct approach | |
| c | candidate | |
| SF | significant figure(s) | |
| DP | decimal place(s) | |

Abbreviations used in Marking

| | |
|---------------------|-------------------------------|
| MC – x | deducted x marks for mis-copy |
| MR – x | deducted x marks for mis-read |
| ISW | ignored subsequent working |
| BOD | given benefit of doubt |
| WR | work replaced by candidate |
| FB | formulae booklet |

Application of Mark Scheme

No method shown:

| | |
|---------------------------------------|---------------------------------------|
| Correct answer without working | mark as in scheme |
| Incorrect answer without working..... | zero marks unless specified otherwise |

More than one method/choice of solution:

| | |
|--|---|
| 2 or more complete attempts, neither/none crossed out | mark both/all fully and award the mean mark rounded down |
| 1 complete and 1 partial attempt, neither crossed out | award credit for the complete solution only |

Crossed out work

do not mark unless it has not been replaced

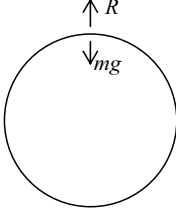

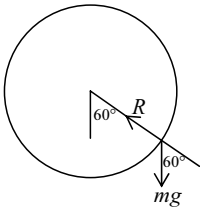

Alternative solution using a correct or partially
correct method

award method and accuracy marks as
appropriate
