(a) M1 for a correct expression for s^2, follow through their mean, beware it is very "sensitive"

$167.94 \rightarrow \frac{999.63..}{35} \rightarrow 28.56...$

$167.9 \rightarrow \frac{1483.24..}{35} \rightarrow 42.37...$

$168 \rightarrow \frac{274}{35} \rightarrow 7.82$

These would all score M1A0

Use of 36 as the divisor (= 26.3…) is M0A0

(b) M1 for substituting their values in $\bar{x} \pm z \times \frac{5.1 \text{ or } s}{\sqrt{36}}$ where z is a recognizable value from tables

1st A1 follow through their mean and their z (to 2dp) in $\bar{x} \pm z \times \frac{5.1}{\sqrt{36}}$

Beware: $167.94 \pm 2.5758 \times \frac{5.1^2}{36} \rightarrow (166.07..,169.8..)$ but scoresB1M0A0A0A0

Correct answer only in (b) scores 0/5

2nd & 3rd A marks depend upon 2.5758 **and** M mark.

3rd M1 for attempting d^2.

1st A1 for $\sum d^2 = 10$

4th M1 for correct use of the r_s formula

(ii) 3rd B1 for the correct critical value - depends upon their H_1: $\rho > 0$ needs 0.7143, $\rho \neq 0$, 0.7857

The H_1 may be in words so B0B1 is possible. If no H_1 award for 0.7143 only.

5th M1 for a correct statement relating their r_s and their cv (may be implied by correct comment)

3rd A1ft follow through their r_s and their cv. Comment in context. Must mention judges.

M1 for standardising with their mean and standard deviation (ignore direction of inequality)

(b) 1st M1 for attempting to find Y. Need to see $\pm(M - 1.5W)$ or equiv. May be implied by Var(Y).
1st A1 for a correct value for their E(Y) i.e. usually ± 9. Do not give M1A1 for a "lucky" ± 9.

3rd M1 for attempt to calculate the correct probability. Must be attempting a probability > 0.5.

Must attempt to standardise with a relevant mean and standard deviation

Using $\sigma^2_M = 11$ or $\sigma^2_W = 10$ is not a misread.

1st A1 for a fully correct expression

2nd B1 for ± 1.96 but only if their H_1 is two-tail (it may be in words so B0B1 is OK)
