Materials required for examination

Items included with question papers

Nil

Candidates may use any calculator EXCEPT those with the facility for symbolic algebra, differentiation and/or integration. Thus candidates may NOT use calculators such as the Texas Instruments TI 89, TI 92, Casio CFX 9970G, Hewlett Packard HP 48G..

Instructions to Candidates

Your candidate details are printed next to the bar code above. Check that these are correct and sign your name in the signature box above.
 If your candidate details are incorrect, or missing, then complete ALL the boxes above.
 When a calculator is used, the answer should be given to an appropriate degree of accuracy.
 You must write your answer for each question in the space following the question.
 If you need more space to complete your answer to any question, use additional answer sheets.

Information for Candidates

A booklet 'mathematical Formulae and Statistical Tables' is provided.
 Full marks may be obtained for answers to ALL questions.
 This paper has 9 questions.

Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled.
 You must show sufficient working to make your methods clear to the examiner. Answers without working may gain no credit

3. The trapezium rule, with the table below, was used to estimate the area between the curve $y = \sqrt{x^3 + 1}$, the lines $x = 1$, $x = 3$ and the x -axis.

x	1	1.5	2	2.5	3
y	1.414	2.092	3.000		

- (a) Calculate, to 3 decimal places, the values of y for $x = 2.5$ and $x = 3$. (2)
- (b) Use the values from the table and your answers to part (a) to find an estimate, to 2 decimal places, for this area. (4)

5.

Figure 1

The shaded area in Fig. 1 shows a badge ABC , where AB and AC are straight lines, with $AB = AC = 8$ mm. The curve BC is an arc of a circle, centre O , where $OB = OC = 8$ mm and O is in the same plane as ABC . The angle BAC is 0.9 radians.

- (a) Find the perimeter of the badge. (2)

- (b) Find the area of the badge. (5)

Leave
blank

A large rectangular area with rounded corners, containing 25 horizontal dotted lines for writing.

6. At the beginning of the year 2000 a company bought a new machine for £15 000. Each year the value of the machine decreases by 20% of its value at the start of the year.

(a) Show that at the start of the year 2002, the value of the machine was £9600. (2)

When the value of the machine falls below £500, the company will replace it.

(b) Find the year in which the machine will be replaced. (4)

To plan for a replacement machine, the company pays £1000 at the start of each year into a savings account. The account pays interest at a fixed rate of 5% per annum. The first payment was made when the machine was first bought and the last payment will be made at the start of the year in which the machine is replaced.

(c) Using your answer to part (b), find how much the savings account will be worth immediately after the payment at the start of the year in which the machine is replaced. (4)

Leave
blank

A large rectangular area with rounded corners, containing 25 horizontal dotted lines for writing.

8.

Figure 2

Leave blank

The line with equation $y = x + 5$ cuts the curve with equation $y = x^2 - 3x + 8$ at the points A and B , as shown in Fig. 2.

(a) Find the coordinates of the points A and B . (5)

(b) Find the area of the shaded region between the curve and the line, as shown in Fig. 2. (7)
