This is a synoptic examination paper. It requires the synthesis and integration of knowledge to demonstrate a broader and deeper understanding of the connections that exist between the various modules that make up the course of study. Where appropriate you are asked to draw upon and integrate issues relevant to global participation in physical activity.

Answer two questions.

1. “Modern sport is not just about athletic prowess and competition between individuals and teams. It is also about commercialism and media influence.”
Critically analyse this statement. [25]
2. What conflicting issues are in motion when discussing the Olympics and why do countries bid so vigorously for the right to host the games? [25]
3. Discuss the issues which contribute to developing participation in physical activity in the UK and one other country that you have studied. [25]
