9702/33

Advanced Practical Skills 1

October/November 2010

CONFIDENTIAL INSTRUCTIONS

Great care should be taken to ensure that any confidential information given does not reach the candidates either directly or indirectly.

No access to the Question Paper is permitted in advance of the examination.

If you have any problems or queries regarding these Instructions, please contact CIE
by e-mail: international@cie.org.uk,
by phone: +44 1223 553554,
by fax +44 1223 553558,
stating the Centre number, the nature of the query and the syllabus number quoted above.

This document consists of **6** printed pages and **2** blank pages.

Preparing apparatus

These instructions detail the apparatus required for the experiments in the Question Paper. It is essential that absolute confidentiality is maintained in advance of the examination: the contents of these instructions must not be revealed either directly or indirectly to candidates.

No access is permitted to the Question Paper in advance of the examination.

If you have problems or queries regarding these instructions, please contact CIE:

by e-mail: international@cie.org.uk,

or by telephone: +44 1223 553554,

or by fax: +44 1223 553558,

stating the nature of the query and quoting the syllabus and paper numbers (9702/33).

It is assumed that the ordinary apparatus of a Physics laboratory will be available.

Number of sets of apparatus

The number of sets of apparatus provided for each experiment should be $\frac{1}{2} N$, where N is the number of candidates taking the examination. There should, in addition, be a few spare sets of apparatus available in case problems arise during the examination.

Organisation of the examination

Candidates should be allowed access to the apparatus for each experiment for one hour only. After spending one hour on one experiment, candidates should change over to the other experiment. The order in which a candidate attempts the two experiments is immaterial.

Assistance to Candidates

Candidates should be informed that, if they find themselves in real difficulty, they may ask the Supervisor for practical assistance, but that the extent of this assistance will be reported to the Examiner, who may make a deduction of marks.

Assistance should only be given:

when it is asked for by a candidate,

or as directed in the Notes sections of these instructions,

or where apparatus is seen to have developed a fault.

Assistance should be restricted to enabling candidates to make observations and measurements. Observations and measurements must not be made for candidates, and no help should be given with data analysis or evaluation.

All assistance given to candidates must be reported on the Supervisor's Report Form.

Faulty apparatus

In cases of faulty apparatus (not arising from a candidate's mishandling) that prevent the required measurements being taken, the Supervisor may allow extra time to give the candidate a fair opportunity to perform the experiment as if the fault had not been present. The candidate should use a spare copy of the Question Paper when the fault has been rectified or when working with a second set of apparatus.

Supervisor's Report

The Supervisor should complete the Supervisor's Report Form on pages 7 and 8 and enclose it in the envelope containing the answers of the candidates. If more than one envelope is used, a copy of the report must be enclosed in each envelope.

Question 1**Apparatus requirements (per set of apparatus unless otherwise specified)**

1 m length of flexible inextensible thread (e.g. thin string).

Pendulum bob. See Note 1.

100 g slotted mass.

Stopwatch reading to 0.1 s or better.

Retort stand, boss and clamp.

Split cork or two small wooden blocks to hold the thread in the clamp.

Protractor.

Metre rule with a millimetre scale.

Fiducial marker (e.g. an optical pin embedded in a cork).

Notes

- 1 Attach the pendulum bob to one end of the thread.
- 2 If the apparatus is to be used by another candidate, then it should be restored to its original state.

Information required by Examiners

Sample set of numerical results, clearly labelled "Supervisor's Results" and obtained out of sight of the candidates.

Question 2**Apparatus requirements (per set of apparatus unless otherwise specified)**

D.c. power supply that is able to provide a constant output voltage in the range 1 V – 1.5 V (e.g. 1.5 V dry cell in holder) with terminals.

Digital ammeter or multimeter set to the range 0 – 200 mA.

Analogue voltmeter with a range of 0 – 5 V (with the 1 V terminal taped if necessary) with a precision of 0.1 V.

Two equal lengths of resistance wire. See Note 1.

Switch.

A rheostat or other variable resistor with a maximum resistance of at least $8\ \Omega$, capable of carrying a current of 0.5 A, with the slider initially set at half the maximum resistance.

Access to a micrometer screw gauge.

Metre rule with a millimetre scale.

Ten connecting wires. Four of the wires should each have a crocodile clip attached to one end.

Notes

- 1 The two equal lengths of resistance wire must be of the same material but different diameters. Each should have a resistance in the range $5\ \Omega$ – $10\ \Omega$ and the resistance of the two wires should differ by at least $1\ \Omega$.

The wire of higher resistance should be labelled 'A' near to its middle and the wire of lower resistance should be labelled 'B'.

e.g.

A: 1 m length of 32 swg (diameter 0.27 mm) constantan

B: 1 m length of 30 swg (diameter 0.32 mm) constantan

or

A: 50 cm length of 32 swg (diameter 0.27 mm) nichrome

B: 50 cm length of 30 swg (diameter 0.32 mm) nichrome

- 2 If the apparatus is to be used by another candidate, then it should be restored to its original state. If a dry cell has been used as the power supply, its voltage should be checked and a new cell supplied if necessary.

Information required by Examiners

Sample set of numerical results, clearly labelled "Supervisor's Results" and obtained out of sight of the candidates.

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (UCLES) to trace copyright holders, but if any items requiring clearance have unwittingly been included the publisher will be pleased to make amends at the earliest possible opportunity.

University of Cambridge International Examinations is part of the Cambridge Assessment Group. Cambridge Assessment is the brand name of University of Cambridge Local Examinations Syndicate (UCLES), which is itself a department of the University of Cambridge.

This form should be completed and sent to the Examiner with the scripts.

SUPERVISOR'S REPORT FORM

General Certificate of Education Advanced Subsidiary Level and Advanced Level

October/November Session 2010

The Supervisor's Report should give full details of:

- (a) any help given to a candidate (including the nature of the help given and the name and candidate number of the candidate);
- (b) any cases of faulty apparatus (including the nature of the problem, the action taken to rectify it, any additional time allowed, and the name and candidate number of the candidate);
- (c) any accidents that occurred during the examination;
- (d) any other difficulties experienced by candidates, or any other information that is likely to assist the Examiner, especially if this information cannot be discovered in the scripts.

Cases of individual hardship, such as illness, bereavement or disability, should be reported direct to CIE on the normal Special Consideration form.

Information required by Examiners

For each question, please enclose a sample set of numerical results, obtained out of sight of the candidates and clearly labelled "Supervisor's Results".
