# **Mark Scheme**

2008 examination - January series

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available to download from the AQA Website: www.aqa.org.uk

## **PYA4 ASSESSMENT OBJECTIVE 1**

|       | Content          | Detail and accuracy                      | Organisation & structure  | Breadth and depth                                 |
|-------|------------------|--|---------------------------|---|
| 12-11 | Substantial      | Accurate and well-<br>detailed           | Coherent                  | Substantial evidence of both and balance achieved |
| 10-9  | Slightly limited | Accurate & reasonably detailed           | Coherent                  | Evidence of both but imbalanced                   |
| 8-7   | Limited          | Generally accurate & reasonably detailed | Reasonably constructed    | Increasing evidence of breadth and/or depth       |
| 6-5   | Basic            | Generally accurate, lacks detail         | Reasonably constructed    | Some evidence of breadth and/or depth             |
| 4-3   | Rudimentary      | Sometimes flawed                         | Sometimes focused         |   |
| 2-0   | Just discernible | Weak/muddled/<br>inaccurate              | Wholly/ mainly irrelevant |   |

## **PYA4 ASSESSMENT OBJECTIVE 2**

|       | Evaluation is               | Material is used     | Selection and elaboration                      |
|-------|-----------------------------|----------------------|--|
| 12-11 | Thorough                    | Highly effective     | Appropriate selection and coherent elaboration |
| 10-9  | Slightly limited            | Effective            | Appropriate selection and elaboration          |
| 8-7   | Limited                     | Reasonably effective | Reasonable elaboration                         |
| 6-5   | Basic                       | Restricted           | Some evidence of elaboration                   |
| 4-3   | Superficial and rudimentary | Not effective        | No evidence of elaboration                     |
| 2-0   | Muddled and incomplete      |                      | Wholly or mainly irrelevant                    |

#### **General Note**

In general, and unless otherwise indicated by the specific question and its marking scheme, description of research studies may be credited as AO1 or AO2. The critical element for AO2 credit is whether the research study is *explicitly* introduced as part of evaluation/commentary and findings/conclusions similarly linked as part of sustained evaluation/commentary ('topped and tailed'). If this is the case then the *whole* presentation of a research study should be credited as AO2. Otherwise the study may earn AO1 marks.

#### **SECTION A: SOCIAL PSYCHOLOGY**

1 Total for this question: 24 marks

Outline and evaluate **one or more** theories of the origins of prejudice.

(24 marks)

#### **A01**

AO1 requires the candidate to outline one or more theories of the origins of prejudice. These could include theories based on personality, such as Adorno's Authoritarian personality, or more socially-based approaches such as realistic conflict theory (eg Sherif's Robber cave studies) or social identity theory. Candidates who choose to cover more than one theory will clearly show a breadth/depth trade-off.

This is an area where candidates are likely to use studies as *illustrations* of theories, especially, for instance, in relation to realistic conflict theory. Unless studies are explicitly used as AO2 they should be considered for AO1 credit if genuinely adding to the outline of theories.

Material on the maintenance and reduction of prejudice is unlikely to be relevant. However studies in these areas *could* throw light on the origins of prejudice, and if used explicitly in this way can earn credit.

#### AO2

Evaluation of theories can be accomplished in various ways. Research evidence is a key area, especially if used as part of sustained and explicit evaluation. Other possibilities include the relevance of theories to social and cultural trends, and the use of alternative models to assess a target theory. If alternative models are introduced but not used as effective evaluation ie as part of sustained and focused commentary) they may still earn AO1 marks as additional theories of the origins of prejudice. However explicit comparison of alternative theories can be credited as AO2.

#### **AO1:** Outline of one or more theories of the origins of prejudice.

| Band   | Mark Allocation  | Marks |
|--------|--|-------|
| Band 3 | Outline of one or more theories of the origins of prejudice is                                       | 12-11 |
| Top    | substantial. It is accurate and well-detailed. The organisation and                                  |       |
|        | structure of the answer are <b>coherent</b> , with <b>substantial evidence</b> of breadth and depth. |       |
| Band 3 | Outline of one or more theories of the origins of prejudice is <b>slightly</b>                       | 10-9  |
| Bottom | limited. It is accurate and reasonably detailed. The organisation                                    |       |
|        | and structure of the answer are <b>coherent</b> , with evidence of breadth and depth.                |       |
| Band 2 | Outline of one or more theories of the origins of prejudice is <b>limited</b> .                      | 8-7   |
| Top    | It is generally accurate and reasonably detailed. The  |       |
|        | organisation and structure of the answer are <b>reasonably</b>                                       |       |
|        | constructed, with increasing evidence of breadth and/or depth.                                       |       |
| Band 2 | Outline of one or more theories of the origins of prejudice is <b>basic</b> .                        | 6-5   |
| Bottom | It is generally accurate but lacks detail. The organisation and                                      |       |
|        | structure of the answer are <b>reasonable</b> , with <b>some evidence</b> of breadth and/or depth.   |       |
| Band 1 | Outline of one or more theories of the origins of prejudice is                                       | 4-3   |
| Top    | rudimentary and sometimes flawed. There is some focus on the   |       |
|        | question. The organisation and structure of the answer are   |       |
|        | reasonable.  |       |
| Band 1 | Outline of one or more theories of the origins of prejudice is <b>just</b>                           | 2-0   |
| Bottom | discernible. It is weak and shows muddled understanding. The   |       |
|        | answer may be wholly irrelevant to the question's requirement.                                       |       |

## **AO2:** Evaluation of one or more theories of the origins of prejudice.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Evaluation of one or more theories of the origins of prejudice is | 12-11 |
| Тор    | thorough. The material is used in a highly effective manner and   |       |
|        | shows evidence of appropriate selection and coherent              |       |
|        | elaboration.  |       |
| Band 3 | Evaluation of one or more theories of the origins of prejudice is | 10-9  |
| Bottom | slightly limited. The material is used in an effective manner and |       |
|        | shows evidence of appropriate selection and elaboration.          |       |
| Band 2 | Evaluation of one or more theories of the origins of prejudice is | 8-7   |
| Тор    | limited. The material is used in a reasonably effective manner    |       |
|        | and shows reasonable elaboration.                                 |       |
| Band 2 | Evaluation of one or more theories of the origins of prejudice is | 6-5   |
| Bottom | basic. The material is used in a restricted manner and shows      |       |
|        | some evidence of elaboration.                                     |       |
| Band 1 | Evaluation of one or more theories of the origins of prejudice is | 4-3   |
| Тор    | superficial and rudimentary. The material is not used effectively |       |
|        | and shows no evidence of elaboration.                             |       |
| Band 1 | Evaluation of one or more theories of the origins of prejudice is | 2-0   |
| Bottom | muddled and mainly irrelevant. The material may be wholly         |       |
|        | irrelevant.   |       |

Discuss research into 'understudied relationships', such as gay and lesbian relationships, and mediated (eg Internet and text) relationships. (24 marks)

#### **AO1**

2

AO1 material should consist of descriptions of research into understudied relationships. Note that the term 'research' includes both studies and theories, and this is particularly important in areas such as mediated relationships (eg relationships based on the internet, computer-mediated communication [CMC], or on mobile phones and text messaging), where research studies, though increasing, are relatively unavailable. The reliance on theoretical approaches and speculations does lead to the importance of distinguishing anecdote from psychologically-informed material, and examiners must be sensitive to this issue. Gay and lesbian relationships are likely to be a popular choice, and in these areas research is more accessible and better candidates should be expected to describe any of the many studies on the nature of such relationships.

Although answers are likely to focus on the examples in the question, other understudied relationships, such as non-Western relationships or relationships in old age, are not excluded. There is no plurality requirement in this question. Candidates may achieve the higher bands by providing *depth* or *breadth*.

#### AO2

Sources of AO2 material may include use of research to support theoretical propositions, or general commentary on the impact of eg social conventions, on the course and outcome of understudied relationships, especially gay and lesbian. Candidates discussing CMC and text-based relationships could include detailed commentary on the absence of non-verbal and especially paralinguistic cues, and consequent effects on the nature and duration of such relationships. A particularly effective approach would be to compare mediated relationships with face-to-face ('f2f') relationships.

Given the variety of studies in this area it would also be appropriate for candidates to consider different methodologies and methodological problems as part of their AO2 material.

## AO1: Description of research into understudied relationships.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Description of research into understudied relationships is                        | 12-11 |
| Top    | substantial. It is accurate and well-detailed. The organisation and               |       |
|        | structure of the answer are <b>coherent</b> , with <b>substantial evidence</b> of |       |
|        | breadth and depth.  |       |
| Band 3 | Description of research into understudied relationships is <b>slightly</b>        | 10-9  |
| Bottom | limited. It is accurate and reasonably detailed. The organisation                 |       |
|        | and structure of the answer are <b>coherent</b> , with evidence of breadth        |       |
|        | and depth.  |       |
| Band 2 | Description of research into understudied relationships is <b>limited</b> . It    | 8-7   |
| Top    | is <b>generally accurate and reasonably detailed.</b> The organisation            |       |
|        | and structure of the answer are <b>reasonably constructed</b> , with              |       |
|        | increasing evidence of breadth and/or depth.                                      |       |
| Band 2 | Description of research into understudied relationships is <b>basic</b> . It is   | 6-5   |
| Bottom | generally accurate but lacks detail. The organisation and                         |       |
|        | structure of the answer are <b>reasonable</b> , with <b>some evidence</b> of      |       |
|        | breadth and/or depth.   |       |
| Band 1 | Description of research into understudied relationships is                        | 4-3   |
| Top    | rudimentary and sometimes flawed. There is some focus on the                      |       |
|        | question. The organisation and structure of the answer are                        |       |
|        | reasonable.   |       |
| Band 1 | Description of research into understudied relationships is just                   | 2-0   |
| Bottom | discernible. It is weak and shows muddled understanding. The                      |       |
|        | answer may be wholly irrelevant to the question's requirement.                    |       |

## AO2: Evaluation of research into understudied relationships.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Evaluation of research into understudied relationships is <b>thorough</b> . | 12-11 |
| Тор    | The material is used in a <b>highly effective</b> manner and shows          |       |
|        | evidence of appropriate selection and coherent elaboration.                 |       |
| Band 3 | Evaluation of research into understudied relationships is <b>slightly</b>   | 10-9  |
| Bottom | limited. The material is used in an effective manner and shows              |       |
|        | evidence of appropriate selection and elaboration.                          |       |
| Band 2 | Evaluation of research into understudied relationships is <b>limited</b> .  | 8-7   |
| Тор    | The material is used in a <b>reasonably effective</b> manner and shows      |       |
|        | reasonable elaboration.   |       |
| Band 2 | Evaluation of research into understudied relationships is <b>basic</b> .    | 6-5   |
| Bottom | The material is used in a <b>restricted</b> manner and shows <b>some</b>    |       |
|        | evidence of elaboration.  |       |
| Band 1 | Evaluation of research into understudied relationships is                   | 4-3   |
| Тор    | superficial and rudimentary. The material is not used effectively           |       |
|        | and shows no evidence of elaboration.                                       |       |
| Band 1 | Evaluation of research into understudied relationships is <b>muddled</b>    | 2-0   |
| Bottom | and mainly irrelevant. The material may be wholly irrelevant.               |       |

- (a) Outline **two** social psychological theories of aggression (eg social learning theory, deindividuation). (12 marks)
- (b) Evaluate **one** of the social psychological theories of aggression that you have outlined in part (a). (12 marks)

### AO1: (a)

3

Candidates are likely to outline the theories given as examples in the question, taken from the Specification. However alternatives, such as relative deprivation theory, are not excluded. There are a number of approaches that are more psychological than social psychological, such as frustration-aggression and psychoanalytic models. It is hard to draw a clear demarcation between obviously social theories and these approaches that are more individual but set in a social context. Therefore such approaches would be acceptable as relevant to the question. Theories emphasizing the evolutionary of biological nature of aggression would not be acceptable as AO1 material. General outlines of theories without specific reference to aggression can receive a maximum mark of 8 for AO1. To move into Band 3 answers need to be shaped towards aggression.

Studies (in particular, Bandura's Bobo dolls) that do not earn marks as part of sustained and effective evaluation (AO2) may earn AO1 marks if clearly adding to the outline of theories. To move out of Band 1 for AO1 or AO2 the *social psychological* aspects of Bandura's studies must be explicit.

Two theories are required. Candidates outlining only one are exhibiting partial performance and can receive a maximum of 8 marks for AO1.

#### AO2: (b)

Support from research studies would be an effective method of evaluating a theory. Evaluation of the studies themselves would be relevant as it directly affects the degree of support derived from studies; however such evaluation is unlikely to move out of Band 1 *unless* implications for the theory are clearly identified.

General commentary on eg the broad nature of aggression, cultural biases in research etc, could earn marks insofar as it is placed in the context of the identified target theory. Alternative theories, such as the second theory from part (a) or evolutionary/biological approaches may be introduced. To earn AO2 marks they must be part of sustained and effective commentary on the target theory rather than part of a broad and unfocused discussion.

Where both theories are evaluated both should be marked and the best AO2 mark recorded.

AO1: (a) Outline of two social psychological theories of aggression.

| Band     | Mark Allocation  | Marks |
|----------|--|-------|
| Band 3   | Outline of two social psychological theories of aggression is                  | 12-11 |
| Тор      | substantial. It is accurate and well-detailed. The organisation and            |       |
|          | structure of the answer are <b>coherent</b> , with <b>a reasonable</b> balance |       |
|          | between the two theories.  |       |
| Band 3   | Outline of two social psychological theories of aggression is                  | 10-9  |
| Bottom   | slightly limited. It is accurate and reasonably detailed. The                  |       |
|          | organisation and structure of the answer are <b>coherent</b> , with a          |       |
|          | reasonable balance between the two theories.                                   |       |
| Band 2   | Outline of two social psychological theories of aggression is                  | 8-7   |
| Top      | limited. It is generally accurate and reasonably detailed. The                 |       |
|          | organisation and structure of the answer are <b>reasonably</b>                 |       |
|          | constructed, with a fair balance between the two theories. Partial             |       |
|          | performance is substantial, accurate and well-detailed (top of band)           |       |
|          | or slightly limited, accurate and reasonably detailed (bottom of               |       |
|          | band).   |       |
| Band 2   | Outline of two social psychological theories of aggression is <b>basic</b> .   | 6-5   |
| Bottom   | It is generally accurate but lacks detail. The organisation and                |       |
|          | structure of the answer are <b>reasonable</b> , with a <b>fair</b> balance     |       |
|          | between the two theories. Partial performance is limited, generally            |       |
| 5 14     | accurate and reasonably detailed.  | 4.0   |
| Band 1   | Outline of two social psychological theories of aggression is                  | 4-3   |
| Тор      | rudimentary and sometimes flawed. There is some focus on the                   |       |
|          | question. The organization and structure of the answer are                     |       |
|          | reasonable with some coverage of two explanations. Partial                     |       |
| Daniel 4 | performance is basic, generally accurate and lacking detail.                   | 0.0   |
| Band 1   | Outline of two social psychological theories of aggression is <b>just</b>      | 2-0   |
| Bottom   | discernible. It is weak and shows muddled understanding. The                   |       |
|          | answer may be wholly irrelevant to the question's requirement                  |       |
|          | or mainly irrelevant. Partial performance is rudimentary and                   |       |
| <u> </u> | sometimes flawed with little focus on the question.                            |       |

## AO2: (b) Evaluation of one social psychological theory of aggression.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Evaluation of one social psychological theory of aggression is    | 12-11 |
| Тор    | thorough. The material is used in a highly effective manner and   |       |
|        | shows evidence of appropriate selection and coherent              |       |
|        | elaboration.  |       |
| Band 3 | Evaluation of one social psychological theory of aggression is    | 10-9  |
| Bottom | slightly limited. The material is used in an effective manner and |       |
|        | shows evidence of appropriate selection and elaboration.          |       |
| Band 2 | Evaluation of one social psychological theory of aggression is    | 8-7   |
| Тор    | limited. The material is used in a reasonably effective manner    |       |
|        | and shows reasonable elaboration.                                 |       |
| Band 2 | Evaluation of one social psychological theory of aggression is    | 6-5   |
| Bottom | basic. The material is used in a restricted manner and shows      |       |
|        | some evidence of elaboration.                                     |       |
| Band 1 | Evaluation of one social psychological theory of aggression is    | 4-3   |
| Тор    | superficial and rudimentary. The material is not used effectively |       |
|        | and shows no evidence of elaboration.                             |       |
| Band 1 | Evaluation of one social psychological theory of aggression is    | 2-0   |
| Bottom | muddled and mainly irrelevant. The material may be wholly         |       |
|        | irrelevant.   |       |

#### SECTION B: PHYSIOLOGICAL PSYCHOLOGY

4 Total for this question: 24 marks

Discuss the organisation of language in the brain.

(24 marks)

#### A01

The Brain and Behaviour section of the Specification contains various topics potentially relevant to this question other than language organisation. These include localisation of function, distributed functions, cortical organisation, and lateralisation and functional asymmetries. As long as the focus is on *language*, any of this material could qualify for AO1 marks.

Central to the question would be the localisation model of language developed by Geschwind and others from the original work of Wernicke and Broca in the 19<sup>th</sup> century. Candidates should be able to describe centres for production and comprehension in the left hemisphere and pathways between them. Although this model has been refined over the years there is no requirement for reference to more recent models for marks across the range.

#### AO<sub>2</sub>

There are several potential sources of AO2 material. Candidates are likely to refer to some of the many classic case studies, especially those of Broca and Wernicke and perhaps the splitbrain work of Sperry. Implications of findings for the organisation of language must be explicit for marks to move out of the bottom band. Relevant methodological evaluation of studies, given the problems for instance of using case studies of brain-damaged patients, could be an important source of AO2 credit.

Commentary on variations in basic language organisation associated with, for instance, gender and handedness would be an effective source of AO2, as would any reference to the evolution of language functions. The general reductionist approach of this area could also be a source of critical commentary.

## **AO1:** Description of the organisation of language in the brain.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Description of the organisation of language in the brain is                       | 12-11 |
| Top    | substantial. It is accurate and well-detailed. The organisation and               |       |
|        | structure of the answer are <b>coherent</b> , with <b>substantial evidence</b> of |       |
|        | breadth and depth.  |       |
| Band 3 | Description of the organisation of language in the brain is <b>slightly</b>       | 10-9  |
| Bottom | limited. It is accurate and reasonably detailed. The organisation                 |       |
|        | and structure of the answer are <b>coherent</b> , with evidence of breadth        |       |
|        | and depth.  |       |
| Band 2 | Description of the organisation of language in the brain is <b>limited.</b> It    | 8-7   |
| Top    | is <b>generally accurate and reasonably detailed.</b> The organisation            |       |
|        | and structure of the answer are reasonably constructed, with                      |       |
|        | increasing evidence of breadth and/or depth.                                      |       |
| Band 2 | Description of the organisation of language in the brain is <b>basic</b> . It     | 6-5   |
| Bottom | is generally accurate but lacks detail. The organisation and                      |       |
|        | structure of the answer are <b>reasonable</b> , with <b>some evidence</b> of      |       |
|        | breadth and/or depth.   |       |
| Band 1 | Description of the organisation of language in the brain is                       | 4-3   |
| Top    | rudimentary and sometimes flawed. There is some focus on the                      |       |
|        | question. The organisation and structure of the answer are                        |       |
|        | reasonable.   |       |
| Band 1 | Description of the organisation of language in the brain is just                  | 2-0   |
| Bottom | discernible. It is weak and shows muddled understanding. The                      |       |
|        | answer may be wholly irrelevant to the question's requirement                     |       |
|        | or mainly irrelevant.   |       |

## **AO2:** Commentary on the organisation of language in the brain.

| Band   | Mark Allocation  | Marks |
|--------|--|-------|
| Band 3 | Commentary on the organisation of language in the brain is                 | 12-11 |
| Тор    | thorough. The material is used in a highly effective manner and            |       |
|        | shows evidence of appropriate selection and coherent                       |       |
|        | elaboration.   |       |
| Band 3 | Commentary on the organisation of language in the brain is <b>slightly</b> | 10-9  |
| Bottom | limited. The material is used in an effective manner and shows             |       |
|        | evidence of appropriate selection and elaboration.                         |       |
| Band 2 | Commentary on the organisation of language in the brain is <b>limited.</b> | 8-7   |
| Тор    | The material is used in a <b>reasonably effective</b> manner and shows     |       |
|        | reasonable elaboration.  |       |
| Band 2 | Commentary on the organisation of language in the brain is <b>basic</b> .  | 6-5   |
| Bottom | The material is used in a <b>restricted</b> manner and shows <b>some</b>   |       |
|        | evidence of elaboration.   |       |
| Band 1 | Commentary on the organisation of language in the brain is                 | 4-3   |
| Тор    | superficial and rudimentary. The material is not used effectively          |       |
|        | and shows no evidence of elaboration.                                      |       |
| Band 1 | Commentary on the organisation of language in the brain is                 | 2-0   |
| Bottom | muddled and mainly irrelevant. The material may be wholly                  |       |
|        | irrelevant.  |       |

Discuss research relating to the nature of dreams (eg content, duration, type of dream).

(24 marks)

#### **AO1**

5

Candidates have a number of ways to answer this question. They may describe research into the *duration* and *content* of dreams (eg symbolic approaches such as Freud, or problem-solving perspectives such as Cartright's) or the different *kinds* of dreams (eg REM and non-REM dreams, or lucid dreams). This is also an opportunity for the stages of sleep to be relevantly described in relation to dreaming.

As the term *research* includes both studies and theories, it is acceptable for candidates to refer to theories of dreaming and research studies relating to these theories. However, for such material to be relevant candidates must make clear what these theories tell us about the *nature* of dreams, rather than simply addressing the *function* of dreaming. It is likely that even if candidates focus on the functions of dreams essays will contain some material relevant to their nature. Examiners should identify and credit this material accordingly. However, to reach Band 3 for AO1, material must be shaped towards the *nature* of dreams, with effective selection of materials.

#### AO<sub>2</sub>

Evaluation may take the form of alternative theoretical explanations for the phenomenom of dreams (eg content), or the extent of research support for a particular explanation or observation. The pioneering work of Dement and Kleitman on the stages of sleep, REM and dreaming would be directly relevant.

Candidates may refer to REM sleep and dreaming interchangeably. However the focus of the question is on *dreaming* and to receive credit for any references to REM (eg increased amounts in the newborn, links to learning and memory) candidates *must* maintain a clear focus on dreaming.

More general evaluation and commentary is acceptable as AO2 material, for instance the problems faced by laboratory studies of dreams (the artificial nature of the laboratory environment).

## **AO1:** Description of research relating to the nature of dreams.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Description of research relating to the nature of dreams is                           | 12-11 |
| Top    | substantial. It is accurate and well-detailed. The organisation and                   |       |
|        | structure of the answer are <b>coherent</b> , with <b>substantial evidence</b> of     |       |

| Band 1 | Evaluation of research relating to the nature of dreams is <b>muddled</b>    | 2-0   |
| Bottom | and mainly irrelevant. The material may be wholly irrelevant.                |       |

Outline and evaluate one or more theories of motivation.

(24 marks)

#### **AO1**

AO1 material should consist of an outline of one or more theories of motivation. Theories of motivation referred to in the Specification, and therefore likely to be presented, are homeostatic drive theory, expectancy theory, and drive-reduction theory.

The question is on theories of motivation, and it is important that candidates focus on the explanation of the *arousal and direction* of behaviour. With physiologically-based approaches studies on, for instance, hypothalamic lesions and feeding *must* be explicitly linked to homeostatic or drive-reduction *theories* to earn either AO1 (as illustrating theories) or AO2 marks. Similarly for studies on the peripheral mechanisms of feeding; there must be some explicit relevance to theories of motivation for marks to be credited.

#### AO2

Evaluation of theories of motivation is likely to focus on the degree of support from research studies and the extent to which they explain motivation in humans and non-human animals. The more physiological approaches are likely to be supported by a wealth of research evidence, but largely from non-human animals. A key problem for them is extrapolation to more complex human motivation, and in general a failure to emphasise cognitive elements in motivational states. For the more psychological models, such as Murray's Needs or incentive theory, the opposite pattern applies; a relative lack of empirical support, but an ability to explain complex human motivations.

If more than one theory is presented but additional theories are simply *described*, these may earn AO1 marks, while *explicit* use of additional theories as *evaluation* may earn AO2 marks, especially if used as part of sustained and effective commentary.

## **AO1:** Outline of one or more theories of motivation.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Outline of one or more theories of motivation is <b>substantial</b> . It is   | 12-11 |
| Тор    | accurate and well-detailed. The organisation and structure of the             |       |
|        | answer are <b>coherent</b> , with <b>substantial evidence</b> of breadth and  |       |
|        | depth.  |       |
| Band 3 | Outline of one or more theories of motivation is <b>slightly limited</b> . It | 10-9  |
| Bottom | is accurate and reasonably detailed. The organisation and                     |       |
|        | structure of the answer are <b>coherent</b> , with evidence of breadth and    |       |
|        | depth.  |       |
| Band 2 | Outline of one or more theories of motivation is <b>limited</b> . It is       | 8-7   |
| Тор    | generally accurate and reasonably detailed. The organisation                  |       |
|        | and structure of the answer are <b>reasonably constructed</b> , with          |       |
|        | increasing evidence of breadth and/or depth.                                  |       |
| Band 2 | Outline of one or more theories of motivation is <b>basic</b> . It is         | 6-5   |
| Bottom | generally accurate but lacks detail. The organisation and                     |       |
|        | structure of the answer are <b>reasonable</b> , with <b>some evidence</b> of  |       |
|        | breadth and/or depth.   |       |
| Band 1 | Outline of one or more theories of motivation is <b>rudimentary and</b>       | 4-3   |
| Тор    | sometimes flawed. There is some focus on the question. The                    |       |
|        | organisation and structure of the answer are reasonable.                      |       |
| Band 1 | Outline of one or more theories of motivation is just discernible. It         | 2-0   |
| Bottom | is weak and shows muddled understanding. The answer may be                    |       |
|        | wholly irrelevant to the question's requirement or mainly                     |       |
|        | irrelevant.   |       |

## **AO2:** Evaluation of one or more theories of motivation.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Evaluation of one or more theories of motivation is <b>thorough</b> . The     | 12-11 |
| Тор    | material is used in a <b>highly effective</b> manner and shows evidence       |       |
|        | of appropriate selection and coherent elaboration.                            |       |
| Band 3 | Evaluation of one or more theories of motivation is <b>slightly limited</b> . | 10-9  |
| Bottom | The material is used in an <b>effective</b> manner and shows evidence of      |       |
|        | appropriate selection and elaboration.  |       |
| Band 2 | Evaluation of one or more theories of motivation is <b>limited</b> . The      | 8-7   |
| Тор    | material is used in a <b>reasonably effective</b> manner and shows            |       |
|        | reasonable elaboration.   |       |
| Band 2 | Evaluation of one or more theories of motivation is <b>basic</b> . The        | 6-5   |
| Bottom | material is used in a <b>restricted</b> manner and shows <b>some evidence</b> |       |
|        | of elaboration.   |       |
| Band 1 | Evaluation of one or more theories of motivation is <b>superficial and</b>    | 4-3   |
| Top    | rudimentary. The material is not used effectively and shows no                |       |
|        | evidence of elaboration.  |       |
| Band 1 | Evaluation of one or more theories of motivation is <b>muddled and</b>        | 2-0   |
| Bottom | mainly irrelevant. The material may be wholly irrelevant.                     |       |

#### SECTION C: COGNITIVE PSYCHOLOGY

7 Total for this question: 24 marks

Discuss explanations of pattern recognition (eg template and feature detection theories).

(24 marks)

#### **AO1**

AO1 description of explanations of pattern recognition can draw on models mentioned in the Specification (template and feature detection), or on any other relevant models, such as prototype theory. Although the Specification refers to Hubel & Wiesel's biological feature detection and top-down/bottom-up processing separately from theories of pattern recognition, these are all relevant to aspects of pattern recognition and are acceptable as answers to this question. However the emphasis must be on pattern recognition and not on other perceptual issues or general theories of perception (eg constructivist versus direct theories)

#### AO2

The most accessible route to AO2 credit would be the use of research findings. There are a large number of studies in this area and each of the major explanations can be linked to supporting and contradictory evidence. In addition explanations can be evaluated more generally, in terms of their flexibility and how well they explain various perceptual phenomena such as context effects.

If studies are used AO2 marks cannot move out of Band 1 unless the implications of findings for explanations are explicit.

Candidates are required to discuss at least two explanations of pattern recognition. Those covering only one are exhibiting partial performance and can receive a maximum of 8 marks for AO1 and 8 marks for AO2.

# **AO1:** Description of explanations of pattern recognition.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Description of explanations of pattern recognition is substantial. It           | 12-11 |
| Тор    | is accurate and well-detailed. The organisation and structure of                |       |
|        | the answer are <b>coherent</b> , with <b>substantial evidence</b> of breadth    |       |
|        | and depth.  |       |
| Band 3 | Description of explanations of pattern recognition is slightly                  | 10-9  |
| Bottom | limited. It is accurate and reasonably detailed. The organisation               |       |
|        | and structure of the answer are <b>coherent</b> , with evidence of breadth      |       |

| Band 2 | Description of explanations of pattern recognition is <b>limited</b> . It is    | 8-7   |
| Тор    | generally accurate and reasonably detailed. The organisation                    |       |
|        | and structure of the answer are <b>reasonably constructed</b> , with            |       |
|        | increasing evidence of breadth and/or depth. Partial performance                |       |
|        | is substantial, accurate and well-detailed (top of band) or slightly            |       |
|        | limited, accurate and reasonably detailed (bottom of band)                      |       |
| Band 2 | Description of explanations of pattern recognition is <b>basic</b> . It is      | 6-5   |
| Bottom | generally accurate but lacks detail. The organisation and                       |       |
|        | structure of the answer are <b>reasonable</b> , with <b>some evidence</b> of    |       |
|        | breadth and/or depth. Partial performance is limited, generally                 |       |
|        | accurate and reasonably detailed.   |       |
| Band 1 | Description of explanations of pattern recognition is <b>rudimentary</b>        | 4-3   |
| Тор    | and sometimes flawed. There is some focus on the question. The                  |       |
|        | organisation and structure of the answer are <b>reasonable</b> . <i>Partial</i> |       |
|        | performance is basic, generally accurate and lacking detail.                    |       |
| Band 1 | Description of explanations of pattern recognition is just                      | 2-0   |
| Bottom | discernible. It is weak and shows muddled understanding. The                    |       |
|        | answer may be wholly irrelevant to the question's requirement                   |       |
|        | or mainly irrelevant. Partial performance is rudimentary and                    |       |
|        | sometimes flawed with little focus on the question.                             |       |

# **AO2:** Evaluation of explanations of pattern recognition.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Evaluation of explanations of pattern recognition is <b>thorough</b> . The    | 12-11 |
| Тор    | material is used in a <b>highly effective</b> manner and shows evidence       |       |
|        | of appropriate selection and coherent elaboration.                            |       |
| Band 3 | Evaluation of explanations of pattern recognition is slightly limited.        | 10-9  |
| Bottom | The material is used in an <b>effective</b> manner and shows evidence of      |       |
|        | appropriate selection and elaboration.  |       |
| Band 2 | Evaluation of explanations of pattern recognition is <b>limited</b> . The     | 8-7   |
| Тор    | material is used in a <b>reasonably effective</b> manner and shows            |       |
|        | reasonable elaboration. Partial performance is thorough,                      |       |
|        | coherent, and shows highly effective use of material (top of band) or         |       |
|        | slightly limited with effective use of material (bottom of band).             |       |
| Band 2 | Evaluation of explanations of pattern recognition is <b>basic</b> . The       | 6-5   |
| Bottom | material is used in a <b>restricted</b> manner and shows <b>some evidence</b> |       |
|        | of elaboration. Partial performance is limited with reasonable                |       |
|        | elaboration, with reasonably effective use of material.                       |       |
| Band 1 | Evaluation of explanations of pattern recognition is superficial and          | 4-3   |
| Тор    | rudimentary. The material is not used effectively and shows no                |       |
|        | evidence of elaboration. Partial performance is basic with some               |       |
|        | evidence of elaboration; restricted use of material.                          |       |
| Band 1 | Evaluation of explanations of pattern recognition is muddled and              | 2-0   |
| Bottom | mainly irrelevant. The material may be wholly irrelevant. Partial             |       |
|        | performance is superficial with no evidence of elaboration, and               |       |
|        | material is not used effectively.   |       |

With reference to explanations of perceptual development, discuss the nature-nurture debate in perception. (24 marks)

#### **AO1**

8

There are various ways in which candidates may approach this question. The focus should be on the nature-nurture debate in perception, and description of this would qualify for AO1 marks. They are likely to introduce some of the many relevant studies on perceptual development as AO2 support for either nature or nurture positions. If studies are not used explicitly as AO2 material they may earn AO1 marks as *illustrating* the nature-nurture debate.

Alternatively the candidate may focus on explanations of perceptual development in the context of the nature-nurture debate without *explicitly* outlining the debate. However it is likely that it would be contextualised sufficiently for such material – explanations and nature-nurture – to be given AO1 credit as generally illustrating the nature-nurture debate.

References to Piaget should not be automatically discounted, as several of his studies were directly on perceptual development eg three mountains task.

#### AO<sub>2</sub>

This is an area where relevant studies are easily accessible and research findings are likely to provide the bulk of AO2 material, as supporting either nature or nurture positions. Particularly credit-worthy would be a consideration of the strength of opposing arguments or other general issues such as the difficulty of separating nature from nurture. Evidence should be taken from explanations and studies of *perceptual development*, given the subsection of the Specification. Candidates may be tempted to introduce material from other areas such as research into IQ; such answers, where the nature-nurture debate is discussed but without reference to perceptual development, can receive a maximum of 4 marks for AO1 and 4 marks for AO2.

**AO1:** Description of the nature-nurture debate in perception with reference to explanations of perceptual development.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Description of the nature-nurture debate in perception with reference to              | 12-11 |
| Тор    | explanations of perceptual development is substantial. It is accurate and             |       |
|        | well-detailed. The organisation and structure of the answer are coherent,             |       |
|        | with <b>substantial evidence</b> of breadth and depth.                                |       |
| Band 3 | Description of the nature-nurture debate in perception with reference to              | 10-9  |
| Bottom | explanations of perceptual development is slightly limited. It is accurate            |       |
|        | and reasonably detailed. The organisation and structure of the answer                 |       |
|        | are <b>coherent</b> , with evidence of breadth and depth.                             |       |
| Band 2 | Description of the nature-nurture debate in perception with reference to              | 8-7   |
| Top    | explanations of perceptual development is limited. It is generally                    |       |
|        | accurate and reasonably detailed. The organisation and structure of the               |       |
|        | answer are <b>reasonably constructed</b> , with <b>increasing evidence</b> of breadth |       |
|        | and/or depth.   |       |
| Band 2 | Description of the nature-nurture debate in perception with reference to              | 6-5   |
| Bottom | explanations of perceptual development is basic. It is generally accurate             |       |
|        | but lacks detail. The organisation and structure of the answer are                    |       |
|        | reasonable, with some evidence of breadth and/or depth.                               |       |
| Band 1 | Description of the nature-nurture debate in perception with reference to              | 4-3   |
| Тор    | explanations of perceptual development is rudimentary and sometimes                   |       |
|        | flawed. There is some focus on the question. The organisation and                     |       |
|        | structure of the answer are <b>reasonable</b> .                                       |       |
| Band 1 | Description of the nature-nurture debate in perception with reference to              | 2-0   |
| Bottom | explanations of perceptual development is just discernible or mainly                  |       |
|        | irrelevant. It is weak and shows muddled understanding. The answer                    |       |
|        | may be wholly irrelevant to the question's requirement.                               |       |

**AO2:** Evaluation of the nature-nuture debate in perception with reference to explanations of perceptual development.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Evaluation of the nature-nurture debate in perception with reference to             | 12-11 |
| Top    | explanations of perceptual development is <b>thorough</b> . The material is used    |       |
|        | in a highly effective manner and shows evidence of appropriate selection            |       |
|        | and coherent elaboration.   |       |
| Band 3 | Evaluation of the nature-nurture debate in perception with reference to             | 10-9  |
| Bottom | explanations of perceptual development is <b>slightly limited</b> . The material is |       |
|        | used in an effective manner and shows evidence of appropriate selection             |       |
|        | and elaboration.  |       |

| Top    | explanations of perceptual development is <b>limited</b> . The material is used in  |       |
|        | a reasonably effective manner and shows reasonable elaboration.                     |       |
| Band 2 | Evaluation of the nature-nurture debate in perception with reference to             | 6-5   |
| Bottom | explanations of perceptual development is <b>basic</b> . The material is used in a  |       |
|        | restricted manner and shows some evidence of elaboration.                           |       |
| Band 1 | Evaluation of the nature-nurture debate in perception with reference to             | 4-3   |
| Тор    | explanations of perceptual development is superficial and rudimentary.              |       |
|        | The material is <b>not used effectively</b> and shows <b>no evidence of</b>         |       |
|        | elaboration.  |       |
| Band 1 | Evaluation of the nature-nurture debate in perception with reference to             | 2-0   |
| Bottom | explanations of perceptual development is muddled and mainly irrelevant.            |       |
|        | The material may be wholly irrelevant.  |       |

Describe and evaluate research into problem-solving.

(24 marks)

#### **AO1**

9

'Research' can include both theoretical approaches and research studies, and therefore AO1 material could include theories/models of problem-solving behaviour or descriptions of research studies. The Specification guides the candidates to problem-solving strategies including Gestalt and information processing approaches such as means-end analysis, and these are likely to feature in most essays. Developments of the Gestalt approach, including Kohler's work on 'insight' in primates, would also be relevant. Both Gestalt and information processing approaches involve a number of accessible principles and studies and either alone could be covered in sufficient detail to access the higher AO1 bands. Obviously candidates may introduce other approaches to problem-solving behaviour, such as Wason's classic work, Newell and Simon's General Problem Solver, and other computer-based approaches. Candidates choosing to cover more than one approach will clearly provide less depth but more breadth.

Decision-making is presented as a separate topic in the Specification, but can overlap with problem-solving behaviour. Essays focusing on decision-making should be looked at carefully for any material relevant to the question.

#### AO<sub>2</sub>

AO2 marks may be accessed in various ways. Research support for different models and strategies is widely accessible, especially the early work of the Gestalt psychologists, although many of these studies can be criticised methodologically and this too would be relevant to the question. A different level of support for information-processing approaches would be the use of computer-modelling to develop and test different heuristics. This then leads to further issues such as the success (or not) of different strategies to account for problem solving in the real world, and phenomena such as insight learning.

## AO1: Description of research into problem-solving.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Description of research into problem-solving is <b>substantial</b> . It is      | 12-11 |
| Top    | accurate and well-detailed. The organisation and structure of the               |       |
|        | answer are <b>coherent</b> , with <b>substantial evidence</b> of breadth and    |       |
|        | depth.  |       |
| Band 3 | Description of research into problem-solving is <b>slightly limited</b> . It is | 10-9  |
| Bottom | accurate and reasonably detailed. The organisation and structure                |       |
|        | of the answer are <b>coherent</b> , with evidence of breadth and depth.         |       |
| Band 2 | Description of research into problem-solving is <b>limited</b> . It is          | 8-7   |
| Тор    | generally accurate and reasonably detailed. The organisation                    |       |
|        | and structure of the answer are <b>reasonably constructed</b> , with            |       |
|        | increasing evidence of breadth and/or depth.                                    |       |
| Band 2 | Description of research into problem-solving is <b>basic</b> . It is            | 6-5   |
| Bottom | generally accurate but lacks detail. The organisation and                       |       |
|        | structure of the answer are <b>reasonable</b> , with <b>some evidence</b> of    |       |
|        | breadth and/or depth.   |       |
| Band 1 | Description of research into problem-solving is <b>rudimentary and</b>          | 4-3   |
| Top    | sometimes flawed. There is some focus on the question. The                      |       |
|        | organisation and structure of the answer are <b>reasonable</b> .                |       |
| Band 1 | Description of research into problem-solving is just discernible or             | 2-0   |
| Bottom | mainly irrelevant. It is weak and shows muddled understanding.                  |       |
|        | The answer may be <b>wholly irrelevant</b> to the question's                    |       |
|        | requirement.  |       |

## AO2: Evaluation of research into problem-solving.

| Band   | Mark Allocation  | Marks |
|--------|--|-------|
| Band 3 | Evaluation of research into problem-solving is <b>thorough</b> . The         | 12-11 |
| Тор    | material is used in a <b>highly effective</b> manner and shows evidence      |       |
|        | of appropriate selection and coherent elaboration.                           |       |
| Band 3 | Evaluation of research into problem-solving is <b>slightly limited</b> . The | 10-9  |
| Bottom | material is used in an effective manner and shows evidence of                |       |
|        | appropriate selection and elaboration.                                       |       |
| Band 2 | Evaluation of research into problem-solving is <b>limited</b> . The material | 8-7   |
| Тор    | is used in a reasonably effective manner and shows reasonable                |       |
|        | elaboration.   |       |
| Band 2 | Evaluation of research into problem-solving is <b>basic</b> . The material   | 6-5   |
| Bottom | is used in a restricted manner and shows some evidence of                    |       |
|        | elaboration.   |       |
| Band 1 | Evaluation of research into problem-solving is superficial and               | 4-3   |
| Тор    | rudimentary. The material is not used effectively and shows no               |       |
|        | evidence of elaboration.   |       |
| Band 1 | Evaluation of research into problem-solving is <b>muddled and</b>            | 2-0   |
| Bottom | mainly irrelevant. The material may be wholly irrelevant.                    |       |

#### SECTION D: DEVELOPMENTAL PSYCHOLOGY

10 Total for this question: 24 marks

(a) Outline **two** theories of cognitive development.

(12 marks)

(b) Evaluate **one** of the theories of cognitive development that you have outlined in part (a).

(12 marks

#### AO1: (a)

AO1 material is likely to focus on the theories of Piaget and Vygotsky. The test for the candidates is to present outlines that are concise and focus on key elements of the two theories, such as underlying processes and the stages of development (Piaget), and the role of language, culture and social support (Vygotsky). For marks in the top band the two outlines need to be reasonably balanced, but it is essential that essays are assessed in the context of providing two outlines in approximately 15 minutes.

Candidates occasionally cannot inhibit themselves from providing evaluative material when outlining theories. The exporting rule allows that when material can not earn marks in one question part but which would earn marks in another question part, should be exported to that part.

Candidates are required to outline two theories. Those presenting only one are exhibiting partial performance and can earn a maximum of 8 marks for AO1.

#### AO2: (b)

Candidates are only required to evaluate one of the theories outlined in (a). Either theory can be evaluated in a variety of ways. For both there is wealth of relevant research used to evaluate the theories directly. The Specification also guides candidates to applications, and this too would be an effective source of AO2 material, especially in the area of education. Further general commentary could include the overall significance of the work of Piaget and Vygotsky in the field of child development.

Some candidates may use a second theory to evaluate the target theory. This is credit-worthy as long as it is used as part of sustained and effective commentary focusing on the target theory, rather than as a separate section of the answer.

## **AO1:** Brief outline of two theories of cognitive development.

| Band   | Mark Allocation  | Marks |
|--------|--|-------|
| Band 3 | Outline of two theories of cognitive development is <b>substantial</b> . It is | 12-11 |
| Тор    | accurate and well-detailed. The organisation and structure of the              |       |
|        | answer are <b>coherent</b> , with a <b>reasonable</b> balance between the two  |       |
|        | theories.  |       |
| Band 3 | Outline of two theories of cognitive development is <b>slightly limited</b> .  | 10-9  |
| Bottom | It is accurate and reasonably detailed. The organisation and                   |       |
|        | structure of the answer are <b>coherent</b> , with a <b>reasonable</b> balance |       |
|        | between the two theories.  |       |
| Band 2 | Outline of two theories of cognitive development is <b>limited</b> . It is     | 8-7   |
| Тор    | generally accurate and reasonably detailed. The organisation                   |       |
|        | and structure of the answer are <b>reasonably constructed</b> , with a         |       |
|        | fair balance between the two theories. Partial performance is                  |       |
|        | substantial, accurate and well-detailed (top of band) or slightly              |       |
|        | limited, accurate and reasonably detailed (bottom of band).                    |       |
| Band 2 | Outline of two theories of cognitive development is <b>basic</b> . It is       | 6-5   |
| Bottom | generally accurate but lacks detail. The organisation and                      |       |
|        | structure of the answer are <b>reasonable</b> , with a <b>fair</b> balance     |       |
|        | between the two theories. Partial performance is limited, generally            |       |
|        | accurate and reasonably detailed.  |       |
| Band 1 | Outline of two theories of cognitive development is <b>rudimentary</b>         | 4-3   |
| Тор    | and sometimes flawed. There is some focus on the question. The                 |       |
|        | organisation and structure of the answer are <b>reasonable</b> , with          |       |
|        | <b>some</b> coverage of two theories. Partial performance is basic,            |       |
|        | generally accurate and lacking detail.   |       |
| Band 1 | Outline of two theories of cognitive development is just discernible           | 2-0   |
| Bottom | or mainly irrelevant. It is weak and shows muddled                             |       |
|        | understanding. The answer may be <b>wholly irrelevant</b> to the               |       |
|        | question's requirement. Partial performance is rudimentary and                 |       |
|        | sometimes flawed with little focus on the question.                            |       |

### AO2: Evaluation of one theory of cognitive development.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Evaluation of one theory of cognitive development is <b>thorough</b> . The    | 12-11 |
| Тор    | material is used in a <b>highly effective</b> manner and shows evidence       |       |
| •      | of appropriate selection and coherent elaboration.                            |       |
| Band 3 | Evaluation of one theory of cognitive development is <b>slightly</b>          | 10-9  |
| Bottom | limited. The material is used in an effective manner and shows                |       |
|        | evidence of appropriate selection and elaboration.                            |       |
| Band 2 | Evaluation of one theory of cognitive development is <b>limited</b> . The     | 8-7   |
| Top    | material is used in a <b>reasonably effective</b> manner and shows            |       |
|        | reasonable elaboration.   |       |
| Band 2 | Evaluation of one theory of cognitive development is <b>basic</b> . The       | 6-5   |
| Bottom | material is used in a <b>restricted</b> manner and shows <b>some evidence</b> |       |
|        | of elaboration.   |       |
| Band 1 | Evaluation of one theory of cognitive development is superficial              | 4-3   |
| Top    | and rudimentary. The material is not used effectively and shows               |       |
|        | no evidence of elaboration.   |       |
| Band 1 | Evaluation of one theory of cognitive development is <b>muddled and</b>       | 2-0   |
| Bottom | mainly irrelevant. The material may be wholly irrelevant.                     |       |

Discuss explanations for the development of gender identity **and/or** gender roles. (24 marks)

#### **AO1**

There are various explanations for the development of gender identity/gender roles, such as social learning theory, psychoanalytic theory, and cognitive-developmental approaches. The distinction between gender roles and gender identity has now disappeared from the Specification and candidates need not specify what aspect they are addressing to earn marks across the scale.

Other developmental areas such as moral development are unlikely to be relevant unless there is a specific focus on implications for gender identity/roles. Equally, a *general* consideration of eg social learning theory or Freudian approaches that does not focus on gender identity/roles cannot move beyond Band 1. Biological models of gender development are not excluded, but again the focus must be on gender identity/roles

This is an area where candidates often use studies to *illustrate* explanations rather than explicitly as AO2 evaluative material, and such illustration can earn AO1 marks.

#### AO<sub>2</sub>

Evaluation of explanations may be based on research support, although research studies should not be double credited (see above). Studies may themselves be criticised, but unless the implication of such methodological criticisms for explanations is explicit they cannot move out of Band 1 for AO2. An alternative approach would be to consider how well explanations account for general features of gender identity/roles such as developmental trajectories. Alternative explanations may be used to evaluate a target explanation but can gain marks only if used as part of effective evaluation rather than simply described; in the latter case they may earn AO1 marks.

Candidates are required to cover at least two explanations. Those covering only one are exhibiting partial performance and can receive a maximum of 8 marks for AO1 and 8 marks for AO2.

# AO1: Description of explanations for the development of gender identity and/or gender roles.

| Band        | Mark Allocation  | Marks |
|-------------|--|-------|
| Band 3      | Description of explanations for the development of gender identity         | 12-11 |
| Top         | and/or gender roles is substantial. It is accurate and well-               |       |
|             | detailed. The organisation and structure of the answer are                 |       |
|             | coherent, with substantial evidence of breadth and depth.                  |       |
| Band 3      | Description of explanations for the development of gender identity         | 10-9  |
| Bottom      | and/or gender roles is slightly limited. It is accurate and                |       |
|             | reasonably detailed. The organisation and structure of the answer          |       |
|             | are <b>coherent</b> , with evidence of breadth and depth.                  |       |
| Band 2      | Description of explanations for the development of gender identity         | 8-7   |
| Тор         | and/or gender roles is limited. It is generally accurate and               |       |
|             | reasonably detailed. The organisation and structure of the answer          |       |
|             | are reasonably constructed, with increasing evidence of breadth            |       |
|             | and/or depth. Partial performance is substantial, accurate and well-       |       |
|             | detailed (top of band) or slightly limited, accurate and reasonably        |       |
|             | detailed (bottom of band).   |       |
| Band 2      | Description of explanations for the development of gender identity         | 6-5   |
| Bottom      | and/or gender roles is basic. It is generally accurate but lacks           |       |
|             | detail. The organisation and structure of the answer are                   |       |
|             | reasonable, with some evidence of breadth and/or depth. Partial            |       |
| D = := -l 4 | performance is limited, generally accurate and reasonably detailed.        | 4.0   |
| Band 1      | Description of explanations for the development of gender identity         | 4-3   |
| Тор         | and/or gender roles is <b>rudimentary and sometimes flawed.</b> There      |       |
|             | is <b>some focus</b> on the question. The organisation and structure of    |       |
|             | the answer are <b>reasonable</b> . Partial performance is basic, generally |       |
| Daniel 4    | accurate and lacking detail.   | 0.0   |
| Band 1      | Description of explanations for the development of gender identity         | 2-0   |
| Bottom      | and/or gender roles is just discernible or mainly irrelevant. It is        |       |
|             | weak and shows muddled understanding. The answer may be                    |       |
|             | wholly irrelevant to the question's requirement. Partial                   |       |
|             | performance is rudimentary and sometimes flawed with little focus          |       |
|             | on the question.   |       |

# AO2: Evaluation of explanations for the development of gender identity and/or gender roles.

|        | material may be wholly irrelevant. Partial performance is                        |       |  |  |  |
|        | superficial with no evidence of elaboration, and material is not used            |       |  |  |  |
|        | effectively.   |       |  |  |  |

Discuss **one or more** explanations of adjustment to old age (eg social disengagement theory). (24 marks)

#### **AO1**

AO1 material could include a range of explanations such as social disengagement theory, activity theory, and selectivity theory. Alternatively candidates may focus on adjustments to specific aspects of old age, such as retirement or bereavement. To earn marks this would have to be embedded in theoretical models such as Erikson's psychosocial stages or Kubler-Ross's stages of dying; straightforward listing of phenomena associated with ageing would earn marks restricted to Band 1.

Candidates may choose to describe cognitive changes in old age, such as effects on intelligence, memory, learning and problem solving. As long as such material includes a focus on how people *adjust* to these changes it can be credited.

#### **AO2**

AO2 material will vary according to the approach taken by the candidate. Theories can be evaluated through research support or their ability to account for observations on adjustments to old age. Candidates choosing to focus on specific aspects of old age, such as retirement, bereavement or cognitive changes, and explanations for these, may use research support and perhaps cultural variations in these adjustments and changes.

An issue that can arise in this area is the lack of a precise definition of 'old age'. A practical threshold would be retirement age or older, although examiners should use their judgement where necessary. Material covering much younger ages would not be creditworthy.

## AO1: Description of one or more explanations of adjustment to old age.

| Band   | Mark Allocation  | Marks |  |  |
|--------|--|-------|--|--|
| Band 3 | Description of one or more explanations of adjustment to old age                   |       |  |  |
| Top    | is <b>substantial</b> . It is <b>accurate and well-detailed</b> . The organisation |       |  |  |
|        | and structure of the answer are <b>coherent</b> , with <b>substantial</b>          |       |  |  |
|        | evidence of breadth and depth.   |       |  |  |
| Band 3 | Description of one or more explanations of adjustment to old age                   | 10-9  |  |  |
| Bottom | is slightly limited. It is accurate and reasonably detailed. The                   |       |  |  |
|        | organisation and structure of the answer are <b>coherent</b> , with                |       |  |  |
|        | evidence of breadth and depth.   |       |  |  |
| Band 2 | Description of one or more explanations of adjustment to old age                   | 8-7   |  |  |
| Top    | is limited. It is generally accurate and reasonably detailed. The                  |       |  |  |
|        | organisation and structure of the answer are reasonably                            |       |  |  |
|        | constructed, with increasing evidence of breadth and/or depth.                     |       |  |  |
| Band 2 | Description of one or more explanations of adjustment to old age                   | 6-5   |  |  |
| Bottom | is basic. It is generally accurate but lacks detail. The                           |       |  |  |
|        | organisation and structure of the answer are <b>reasonable</b> , with              |       |  |  |
|        | some evidence of breadth and/or depth.   |       |  |  |
| Band 1 | Description of one or more explanations of adjustment to old age                   | 4-3   |  |  |
| Top    | is rudimentary and sometimes flawed. There is some focus on                        |       |  |  |
|        | the question. The organisation and structure of the answer are                     |       |  |  |
|        | reasonable.  |       |  |  |
| Band 1 | Description of one or more explanations of adjustment to old age                   | 2-0   |  |  |
| Bottom | is just discernible or mainly irrelevant. It is weak and shows                     |       |  |  |
|        | muddled understanding. The answer may be wholly irrelevant to                      |       |  |  |
|        | the question's requirement.  |       |  |  |

|        | irrelevant.  |       |  |  |

#### **SECTION E: COMPARATIVE PSYCHOLOGY**

Total for this question: 24 marks

Discuss **one or more** evolutionary explanations of the behaviour of non-human animals.

(24 marks)

#### **AO1**

This is a broad question and candidates have a wide range of AO1 material to draw on. A broad approach would be to describe major explanations such as natural selection and sexual selection and their role in understanding many aspects of animal behaviour, using examples to illustrate points. Alternatively candidates may focus on particular examples of behaviour and consider evolutionary explanations of these behaviours. The most likely examples would be from this section of the Specification ie kin selection and, in particular, altruism. As long as the context and focus are on *evolutionary explanations* this is an acceptable approach to the question.

The question refers to non-human animals and material from the human perspective cannot earn marks unless used to illustrate or comment upon work with non-human animals.

#### AO<sub>2</sub>

AO2 material may come in a variety of forms depending on the approach taken by the candidate. Broad approaches such as natural selection can be assessed as to their general status and the degree to which they successfully account for animal behaviour. Developments of traditional Darwinian theory, such as Dawkin's selfish gene, could also count as relevant commentary.

Candidates focusing on specific examples of animal behaviour such as altruism, may also discuss the problems it raises for evolutionary approaches and bring in more contemporary views. However, as with AO1, the discussion must focus on evolutionary explanations rather then altruism per se. If examples of animal behaviour are not clearly used to evaluate evolutionary explanations, they may earn AO1 marks as illustrating evolutionary explanations.

**AO1:** Description of one or more evolutionary explanations of the behaviour of non-human animals.

| Band   | Mark Allocation   | Marks |  |  |
|--------|---|-------|--|--|
| Band 3 | Description of one or more evolutionary explanations is                           |       |  |  |
| Top    | substantial. It is accurate and well-detailed. The organisation and               |       |  |  |
|        | structure of the answer are <b>coherent</b> , with <b>substantial evidence</b> of |       |  |  |
|        | breadth and depth.  |       |  |  |
| Band 3 | Description of one or more evolutionary explanations is <b>slightly</b>           | 10-9  |  |  |
| Bottom | limited. It is accurate and reasonably detailed. The organisation                 |       |  |  |
|        | and structure of the answer are <b>coherent</b> , with evidence of breadth        |       |  |  |
|        | and depth.  |       |  |  |
| Band 2 | Description of one or more evolutionary explanations is <b>limited</b> . It is    | 8-7   |  |  |
| Тор    | generally accurate and reasonably detailed. The organisation                      |       |  |  |
|        | and structure of the answer are <b>reasonably constructed</b> , with              |       |  |  |
|        | increasing evidence of breadth and/or depth.                                      |       |  |  |
| Band 2 | Description of one or more evolutionary explanations is <b>basic</b> . It is      | 6-5   |  |  |
| Bottom | generally accurate but lacks detail. The organisation and                         |       |  |  |
|        | structure of the answer are <b>reasonable</b> , with <b>some evidence</b> of      |       |  |  |

| Top    | and rudimentary. The material is not used effectively and shows               |       |
|        | no evidence of elaboration.   |       |
| Band 1 | Evaluation of one or more evolutionary explanations is <b>muddled</b>         | 2-0   |
| Bottom | and mainly irrelevant. The material may be wholly irrelevant.                 |       |

Outline and evaluate the use of **two or more** signalling systems in non-human animals.

(24 marks)

#### **AO1**

Signalling systems used by non-human animals come in a variety of forms, including visual, auditory, and olfactory. Relevant AO1 could include an overview of signals and their role in eg courtship/mating, food sources, threats, social communication, and the links between signals and fitness (eg the differences between communication, eavesdropping, and deceit). Variation is likely in the accuracy and detail of accounts, especially in outlining the *role* of signalling systems.

Signalling systems can overlap with language and some candidates may take the route of discussing animal language per se. Behaviours such as the bee's waggle dance and even the use of ASL and key symbols by primates are signalling systems, but can only earn marks if discussed as signalling systems; otherwise such material is limited to the top of Band 1 for AO1 and AO2.

#### AO<sub>2</sub>

General commentary on the variety of systems and their specific functions, particularly if illustrated by examples, would earn AO2 marks. More effective might be an evaluation and/or comparison of different systems in terms of their effectiveness. This could include vulnerability to darkness, weather conditions, vulnerability to eavesdropping/predators, complexity of the possible messages, distance etc.

There is a requirement for candidates to consider at least two signalling systems; this requirement can be met by either consideration of two systems in different modalities or two systems in the same modality. If this requirement is not met, candidates are exhibiting partial performance and can receive a maximum of 8 marks for AO1 and 8 marks for AO2.

## **AO1:** Outline of the use of two or more signalling systems in non-human animals.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Outline of the use of two or more signalling systems is <b>substantial</b> .          | 12-11 |
| Top    | It is accurate and well-detailed. The organisation and structure of                   |       |
|        | the answer are <b>coherent</b> , with <b>substantial evidence</b> of breadth          |       |
|        | and depth.  |       |
| Band 3 | Outline of the use of two or more signalling systems is <b>slightly</b>               | 10-9  |
| Bottom | limited. It is accurate and reasonably detailed. The organisation                     |       |
|        | and structure of the answer are <b>coherent</b> , with evidence of breadth and depth. |       |
| Band 2 | Outline of the use of two or more signalling systems is <b>limited</b> . It is        | 8-7   |
| Top    | generally accurate and reasonably detailed. The organisation                          |       |
|        | and structure of the answer are reasonably constructed, with                          |       |
|        | increasing evidence of breadth and/or depth. Partial performance                      |       |
|        | is substantial, accurate and well-detailed (top of band) or slightly                  |       |
|        | limited, accurate and reasonably detailed (bottom of band).                           |       |
| Band 2 | Outline of the use of two or more signalling systems is <b>basic</b> . It is          | 6-5   |
| Bottom | generally accurate but lacks detail. The organisation and                             |       |
|        | structure of the answer are <b>reasonable</b> , with <b>some evidence</b> of          |       |
|        | breadth and/or depth. Partial performance is limited, generally                       |       |
|        | accurate and reasonably detailed.   |       |
| Band 1 | Outline of the use of two or more signalling systems is <b>rudimentary</b>            | 4-3   |
| Top    | and sometimes flawed. There is some focus on the question. The                        |       |
|        | organisation and structure of the answer are <b>reasonable</b> . <i>Partial</i>       |       |
|        | performance is basic, generally accurate and lacking detail.                          |       |
| Band 1 | Outline of the use of two or more signalling systems is just                          | 2-0   |
| Bottom | discernible or mainly irrelevant. It is weak and shows muddled                        |       |
|        | understanding. The answer may be <b>wholly irrelevant</b> to the                      |       |
|        | question's requirement. Partial performance is rudimentary and                        |       |
|        | sometimes flawed with little focus on the question.                                   |       |

# **AO2:** Evaluation of the use of two or more signalling systems in non-human animals.

| Band   | Mark Allocation   | Marks |  |  |  |  |
|--------|---|-------|--|--|--|--|
| Band 3 | Evaluation of the use of two or more signalling systems is                  | 12-11 |  |  |  |  |
| Top    | thorough. The material is used in a highly effective manner and             |       |  |  |  |  |
|        | shows evidence of appropriate selection and coherent                        |       |  |  |  |  |
|        | elaboration.  |       |  |  |  |  |
| Band 3 | Evaluation of the use of two or more signalling systems is <b>slightly</b>  | 10-9  |  |  |  |  |
| Bottom | limited. The material is used in an effective manner and shows              |       |  |  |  |  |
|        | evidence of appropriate selection and elaboration.                          |       |  |  |  |  |
| Band 2 | Evaluation of the use of two or more signalling systems is <b>limited</b> . | 8-7   |  |  |  |  |
| Top    | The material is used in a <b>reasonably effective</b> manner and shows      |       |  |  |  |  |
|        | reasonable elaboration. Partial performance is thorough,                    |       |  |  |  |  |
|        | coherent, and shows highly effective use of material (top of band) or       |       |  |  |  |  |
|        | slightly limited with effective use of material (bottom of band).           |       |  |  |  |  |
| Band 2 | Evaluation of the use of two or more signalling systems is <b>basic</b> .   | 6-5   |  |  |  |  |
| Bottom | The material is used in a <b>restricted</b> manner and shows <b>some</b>    |       |  |  |  |  |
|        | evidence of elaboration. Partial performance is limited with                |       |  |  |  |  |
|        | reasonable elaboration, with reasonably effective use of material.          |       |  |  |  |  |
| Band 1 | Evaluation of the use of two or more signalling systems is                  | 4-3   |  |  |  |  |
| Top    | superficial and rudimentary. The material is not used effectively           |       |  |  |  |  |
|        | and shows <b>no evidence of elaboration</b> . Partial performance is        |       |  |  |  |  |
|        | basic with some evidence of elaboration; restricted use of material.        |       |  |  |  |  |
| Band 1 | Evaluation of the use of two or more signalling systems is <b>muddled</b>   | 2-0   |  |  |  |  |
| Bottom | and mainly irrelevant. The material may be wholly irrelevant.               |       |  |  |  |  |
|        | Partial performance is superficial with no evidence of elaboration,         |       |  |  |  |  |
|        | and material is not used effectively.                                       |       |  |  |  |  |

- (a) Outline and evaluate **one or more** evolutionary explanations of depression. (12 marks)
- (b) Outline and evaluate **one or more** evolutionary explanations of anxiety disorders. (12 marks)

## AO1: (a) and (b)

For both depression and anxiety disorders there are several evolutionary explanations available, such as social regulation and competition (depression), and preparedness and harm avoidance (phobias and obsessive compulsive disorders). More general considerations, such as the EEA and the persistence of apparently maladaptive traits, may qualify for AO1 marks or as AO2 commentary depending on the context.

Candidates are required to outline and evaluate for 12 marks; examiners need to be sensitive to the time constraints of this question and the fact that depth/detail will be limited even in top band answers.

#### AO2: (a) and (b)

There are a variety of routes to AO2 credit. Contemporary research studies are relevant to, for instance, phobias and preparedness, while symptoms of depression can be directly related to evolutionary explanations. Candidates may also comment on the speculative nature of many hypotheses and the difficulty of obtaining direct evidence. Alternative contemporary models of depression and anxiety can qualify for AO2 credit *if* used as part of sustained and effective evaluation, rather than simply being described.

## **AO1:** Outline of one or more evolutionary explanations.

| Band   | Mark Allocation   | Marks |  |  |  |
|--------|---|-------|--|--|--|
| Band 3 | Outline of one or more evolutionary explanations is <b>substantial</b> . It   | 6     |  |  |  |
| Тор    | is accurate and well-detailed. The organisation and structure of              |       |  |  |  |
|        | the answer are <b>coherent</b> .  |       |  |  |  |
| Band 3 | Outline of one or more evolutionary explanations is <b>slightly limited</b> . | 5     |  |  |  |
| Bottom | It is accurate and reasonably detailed. The organisation and                  |       |  |  |  |
|        | structure of the answer are coherent.   |       |  |  |  |
| Band 2 | Outline of one or more evolutionary explanations is <b>limited</b> . It is    | 4     |  |  |  |
| Тор    | generally accurate and reasonably detailed. The organisation                  |       |  |  |  |
|        | and structure of the answer are reasonably constructed.                       |       |  |  |  |
| Band 2 | Outline of one or more evolutionary explanations is <b>basic</b> . It is      | 3     |  |  |  |
| Bottom | generally accurate but lacks detail. The organisation and                     |       |  |  |  |
|        | structure of the answer are <b>reasonable</b> .                               |       |  |  |  |
| Band 1 | Outline of one or more evolutionary explanations is rudimentary               | 2     |  |  |  |
| Тор    | and sometimes flawed. There is some focus on the question. The                |       |  |  |  |
|        | organisation and structure of the answer are reasonable.                      |       |  |  |  |
| Band 1 | Outline of one or more evolutionary explanations is just                      | 0-1   |  |  |  |
| Bottom | discernible or mainly irrelevant. It is weak and shows muddled                |       |  |  |  |
|        | understanding. The answer may be <b>wholly irrelevant</b> to the              |       |  |  |  |
|        | question's requirement.   |       |  |  |  |

#### AO2: Evaluation of one or more evolutionary explanations.

| Band   | Mark Allocation   | Marks |
|--------|---|-------|
| Band 3 | Evaluation of one or more evolutionary explanations is <b>thorough</b> .      | 6     |
| Тор    | The material is used in a <b>highly effective</b> manner and shows            |       |
| ·      | evidence of appropriate selection and coherent elaboration.                   |       |
| Band 3 | Evaluation of one or more evolutionary explanations is slightly               | 5     |
| Bottom | limited. The material is used in an effective manner and shows                |       |
|        | evidence of appropriate selection and elaboration.                            |       |
| Band 2 | Evaluation of one or more evolutionary explanations is <b>limited</b> . The   | 4     |
| Тор    | material is used in a reasonably effective manner and shows                   |       |
|        | reasonable elaboration.   |       |
| Band 2 | Evaluation of one or more evolutionary explanations is <b>basic</b> . The     | 3     |
| Bottom | material is used in a <b>restricted</b> manner and shows <b>some evidence</b> |       |
|        | of elaboration.   |       |
| Band 1 | Evaluation of one or more evolutionary explanations is superficial            | 2     |
| Тор    | and rudimentary. The material is not used effectively and shows               |       |
|        | no evidence of elaboration.   |       |
| Band 1 | Evaluation of one or more evolutionary explanations is <b>muddled</b>         | 0-1   |
| Bottom | and mainly irrelevant. The material may be wholly irrelevant.                 |       |

## A LEVEL/A2 UNIT 4: ASSESSMENT GRID

| Question<br>Number | AO1 | AO2 |
|--------------------|-----|-----|
| 1                  | 12  | 12  |
| 2                  | 12  | 12  |
| 3(a)               | 12  |     |
| 3(b)               |     | 12  |
| 4                  | 12  | 12  |
| 5                  | 12  | 12  |
| 6                  | 12  | 12  |
| 7                  | 12  | 12  |
| 8                  | 12  | 12  |
| 9                  | 12  | 12  |
| 10(a)              | 12  |     |
| 10(b)              |     | 12  |
| 11                 | 12  | 12  |
| 12                 | 12  | 12  |
| 13                 | 12  | 12  |
| 14                 | 12  | 12  |
| 15(a)              | 6   | 6   |
| 15(b)              | 6   | 6   |

| Marks                         | AO1  | AO2  | QoWC |
|-------------------------------|------|------|------|
| Total marks for 3 questions   | 36   | 36   | 4    |
| A-Level total weighting (15%) | 7.8% | 7.2% |      |
