#### **Los reyes apoyan el desarrollo tecnológico**

En 2017, el rey y la reina de España viajaron a Japón. Allí se informaron sobre los proyectos de cooperación tecnológica entre los dos países. Además, aprendieron sobre iniciativas que se desarrollan sobre inteligencia artificial y ciudades sostenibles.

Al llegar a Japón, un robot con forma humana dio la bienvenida a los reyes. “¿Nos hacemos una foto juntos?”, dijo. Les mostró algunas de sus habilidades: dio una patada a un balón de fútbol, saltó y les estrechó la mano. El androide se despidió muy educadamente con un “Gracias, majestades”.

#### **Shakira cumple los 40**

A sus cuarenta años, Shakira es una de las mujeres más brillantes de su generación. Superestrella del mercado musical en lengua española e inglesa, Shakira sabe combinar letras inteligentes e ingeniosas con ritmos latinos. Madre de dos hijos, ha sabido conciliar la fama con su vida personal.

Además se reconoce a Shakira por su compromiso humanitario. Es creadora de dos fundaciones caritativas internacionales y ha ayudado a mejorar la educación y el desarrollo infantil. Incluso Barack Obama consultó con ella en temas relacionados con la educación de los jóvenes hispanohablantes.

#### **La adicción al móvil**

Una investigación reciente confirma que uno de cada veinte españoles es adicto al móvil. Esto es porque es fácil pasar horas en el móvil sin darse cuenta. Se puede permanecer sentado mucho tiempo sin hacer ejercicio, descuidando así la vida social.

Muchas personas desarrollan una extrema dependencia que termina por trastornarlas psicológicamente. Si una persona padece síntomas como impulsividad, angustia o adicción a otras sustancias, tendrá más posibilidades de engancharse. Como era de esperar, se trata de un problema que afecta más a los jóvenes, pero también alcanza a adultos.

#### **El aumento del nivel del mar en Latinoamérica**

Durante los últimos años el mar se ha ido calentando. Como consecuencia de esto, se ha expandido y el nivel ha aumentado de manera preocupante. Además, los océanos reciben grandes cantidades de agua debido al deshielo de los glaciares.

Los expertos predicen un aumento de más de un metro para 2100. Esta subida representa una amenaza grave para los habitantes de la costa latinoamericana. Existe un riesgo muy alto de erosión del litoral e inundaciones en zonas bajas con poblaciones densas. Esto también impactará negativamente en la industria turística.

#### **Las matrículas universitarias en España**

Un informe reciente ha destacado la discrepancia de precio entre las matrículas universitarias en las distintas regiones de España. También hay una gran diferencia en el número de horas de enseñanza que recibe cada estudiante. Por otra parte, varía la cantidad de estudiantes por clase según la carrera.

La ley es ambigua en cuanto al precio de las matrículas. Las comunidades autónomas deciden los precios según el coste de ofrecer una carrera. Las humanidades suelen ser más baratas que las ciencias.

#### **Las matrículas universitarias en España**

Un informe reciente ha destacado la discrepancia de precio entre las matrículas universitarias en las distintas regiones de España. También hay una gran diferencia en el número de horas de enseñanza que recibe cada estudiante. Por otra parte, varía la cantidad de estudiantes por clase según la carrera.

La ley es ambigua en cuanto al precio de las matrículas. Las comunidades autónomas deciden los precios según el coste de ofrecer una carrera. Las humanidades suelen ser más baratas que las ciencias.
