FORMULAE AND STATISTICAL TABLES

Formulae

When asked for a correlation coefficient, it is expected that you will use the statistical function on your calculator. However, if you wish, you may use the following formulae (or others that you know).

The product-moment correlation coefficient for bivariate data: $r = \frac{S_{xy}}{\sqrt{S_{xx}S_{yy}}}$

where $S_{xy} = \sum[(x_i - \bar{x})y_i]$

$$S_{xx} = \sum[(x_i - \bar{x})x_i]$$

$$S_{yy} = \sum[(y_i - \bar{y})y_i]$$

Normal Distribution

The tabulated value is $\Phi(z) = P(Z \leq z)$ where Z is the standardised normal random variable.

<i>z</i>	0.00	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09
