

**MARK SCHEME for the May/June 2012 question paper
for the guidance of teachers**

9706 ACCOUNTING

9706/42

Paper 4 (Problem Solving – Supplement),
maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE A LEVEL – May/June 2012	9706	42

1 (a) Asterix plc – manufacturing account, and income statement for y/e 30 April 2012.

	\$000		\$000
Raw materials at 1/5/2011	140	1	
Purchases of raw materials	1 450	1	
Carriage inwards	<u>130</u>	1	
	1 720		
Raw materials at 30/04/2012	<u>(235)</u>	1	1 485
Direct labour			<u>1 675</u>
Prime cost (1)			3 160
Factory overheads			1 420
Factory depreciation			<u>100</u>
			4 680
Work in progress at 1/5/2012	165		
Work in progress at 30/4/2012	<u>(320)</u>		<u>(155)</u>
Factory cost of goods produced			4 525
Factory profit @ 20%			<u>905</u>
Transferred to trading account			<u>5 430</u>
Revenues			6 500
Deduct: Cost of sales			
Finished goods at 1/5/2011	330		
Manufacturing account	<u>5 430</u>	10F	
5 760			
Finished goods at 30/4/2012	<u>(438)</u>	1	<u>(5 322)</u>
Gross profit			1 178
Office overheads	990	2	
Carriage outwards	75	1	
Office depreciation	<u>50</u>	1	<u>(1 115)</u>
Net profit on trading			63
Factory profit	905	10F	
Less increase in PUP	<u>(18)</u>	3	<u>887</u>
Overall net profit			<u>950</u>

Factory overheads 1 350 1 + 700 1 = 2050

Office overheads 1 025 1 – 35 1 = 990

Increase in PUP $108 \text{ 1} \times \frac{20}{120} \text{ 1} = 18 \text{ 10F}$

[26]

(b) Asterix plc – extract of statement of financial position at 30 April 2012.

Raw materials		235	1
Work in progress		320	1
Finished goods	438	1	
Less PUP	<u>(73)</u>	2	
		<u>365</u>	
		<u>920</u>	10F

[6]

Page 3	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE A LEVEL – May/June 2012	9706	42

(c) A qualifying asset is an asset that takes a substantial period of time to get ready for use or sale. **1**

The interest related to the acquisition should be capitalised **1** as soon as preparation starts. **1**

Capitalisation ceases when the activities required for the preparation are complete. **1**

All such assets should be treated in the same way **1** [5]

(d) If the carrying value is greater than the recoverable amount the asset is impaired. **1**

Write down asset to recoverable amount on statement of financial position. **1**

Amount of loss treated as an expense in income statement. **1** [3]

[Total 40]

2 (a) Income statement and appropriation account for the year ended 31 December 2011

	\$	\$	
Profit from operations		117 200	
Bank interest	700		1
Interest on loan from Creakle	<u>1 000</u>	<u>1 700</u>	2
		115 500	10F
Interest on capital	nil		
Salaries	nil		
Shares of profit			
H	38 500		
C	38 500		
Q	<u>38 500</u>	<u>115 500</u>	10F

IOC and salaries do not need to be shown for marks.

Shares of profit to be in correct ratio. [5]

(b) H 61 000 **1**

C 32 000 **1** + 500 **1** = 32 500 **1**

Q 40 000 **1** + **1**

[6]

(c)	H	C	Q	
	\$	\$	\$	
Original balance	3 500	(6 250)	(14 250)	
– IOC	(5 000)	(5 000)	(5 000)	1
– Salary	(18 000)	–	–	
– Original profit	(41 500)	(20 750)	(20 750)	
+ Revised profit	38 500	38 500	38 500	10F
– Original interest		(500)		
+ Revised interest		1 000		10F
	(22 500)	7 000	1 500	10F

[4]

Alternative approach

	H	C	Q	
	\$	\$	\$	
Profit	38 500	38 500	38 500	10F
Interest		1 000		10F
Drawings	(61 000)	(32 500)	(40 000)	10F
Balance	(22 500)	7 000	(1 500)	10F

[4]
[max 4]

- (d)** Partnership is under-capitalised **1**. The fixed capital has paid for non-current assets **1** but not for working capital **1** Hexham's drawings are higher than the others' **1**. due to/justified by salary and higher profit share **1**.

Basic profitability good **1** ROCE = 77.1% **1**

Drawings higher than profits **1**.

No liquid funds **1**. Current ratio is 0.7:1 **1**. Quick ratio is 0.25:1 **1**

Other sensible comment to be rewarded.

[Max 8]

(e) Capital Accounts

	H	C	Q		H	C	Q		
	\$	\$	\$		\$	\$	\$		
Goodwill	6 000	6 000	---	1	Balance b/d	50 000	50 000	50 000	1
Current account			1 500	1	Goodwill	4 000	4 000	4 000	10F
Loan			57 500	10F	Premises	5 000	5 000	5 000	10F
Balance c/d	<u>53 000</u>	<u>53 000</u>	<u>---</u>			<u>59 000</u>	<u>59 000</u>	<u>59 000</u>	
	<u>59 000</u>	<u>59 000</u>	<u>59 000</u>		Balance b/d	53 000	53 000		10F

OFs for goodwill and premises should use split from **(b)**.

[7]

(f) Statement of Financial Position at 1 January 2012

	\$	\$	
Non-current assets			
Premises		125 000	
Other		<u>40 000</u>	
		165 000	1
Current assets	39 000		1
Current liabilities	<u>(56 000)</u>	<u>(17 000)</u>	
		148 000	
Long term loan to Quilp		<u>57 500</u>	10F
		<u>90 500</u>	
Fixed capital			
H	53 000		
C	<u>53 000</u>	106 000	10F
Current accounts			
H	(22 500)		
C	<u>7 000</u>	<u>(15 500)</u>	10F
		<u>90 500</u>	

[6]

(g) Q now receives $27\,000 + 5750 = 32\,750$ a year. **10F**

This is less than his share of profit. **10F**

Now he is only an employee with no control. **1**

As partnership is illiquid it may not pay the interest. **1**

The partnership may never pay back the loan. **1**

Q will not share in future growth of property value. **1**

Employment may offer better security. **1**

Other sensible comment to be rewarded.

[Max 4]

[Total: 40]

3 (a) A company sets a budget for a certain level of output **1**. If the actual level of activity is higher or lower than this level **1** the budgeted figures are adjusted/recalculated to the actual level **1** [3]

(b) With a fixed budget, the figures are not changed whatever the actual level of output **1**. This means that if the actual level is different from the budget level of activity any comparison between the two will not be any help to management **1**. It will be difficult to identify the reason for any difference **1** or what actions to take to correct any problems **1** [4]

(c) Production budget for months 1–3 (all figures in units)

Month	1	2	3	
Sales	1200	1400	1600	1
Opening inventory	(200)	(180)	(160)	1 for all 3
Closing inventory	180	160	140	1
Production	1180	1380	1580	1

[8]

(d) Calculation of break even point:

	\$	\$
Selling price unit		29
Direct material per unit	6	
Direct labour per unit	5	
Other variable overheads	<u>4</u> 3*	<u>15</u>
Contribution per unit		<u>14</u>
Fixed costs (15 000 + 23 500) =	\$38 500	2*
Break even point in units	$\frac{38\,500}{14} = 2\,750$	1 units × \$29 = \$79 750

[7]

*	Output in units	Total overheads \$
	4 000	31 000
	4 500	33 000
Change	500	1
		2 000
		1

$$\text{Variable cost per unit } \frac{\$2\,000}{500} = \$4 \text{ **1OF**}$$

$$\text{Fixed costs: } \$31\,000 - (4\,000 \times \$4 \text{ **1OF**}) = \$15\,000 \text{ **1OF**}$$

$$\text{OR } \$33\,000 - (4\,500 \times \$4 \text{ **1OF**}) = \$15\,000 \text{ **1OF**}$$

Page 7	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE A LEVEL – May/June 2012	9706	42

(e) Flexible budget statement for Months 1–3.

Details	Actual \$	Budget \$	Variance \$	
Sales	123 200	127 600 1 for both	(4 400) 1	
Direct material	(35 200)	(26 400) 1 for both	(8 800) 1	
Direct labour	(17 600)	(22 000) 1 for both	4 400 1	
Factory overheads	(36 200)	(32 600) 1 for both	(3 600) 10F	
Other fixed costs	(18 000)	(23 500)	5 500	
Profit	16 200	23 100 10F	(6 900) 10F	[10]

(f) The selling price per unit was lower **1** perhaps to gain higher sales volume **1**. the direct material cost was higher than budget **1** which had a negative impact on profit **1**. the direct labour time taken was lower than budget **1** which had a positive effect on profit **1**. There was a positive net saving on factory and other fixed overheads **1**, but these could not offset the additional costs and reduce selling price which led to a lower profit than budgeted **1**. [8]
