# 71 Candidate Numb

# **GCE Applied Business**

Assessment Unit A2 7

assessing

Finance

[A6B11]

FRIDAY 12 JUNE, MORNING

# TIME

1 hour 30 minutes.

# INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

Write your answers in the spaces provided in this question paper. Answer **all three** questions.

# INFORMATION FOR CANDIDATES

The total mark for this paper is 80.

Quality of written communication will be assessed in questions 2(f) and 3(d).

Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.

# ADVICE TO CANDIDATES

You are advised to take account of the marks for each part question in allocating the available examination time.

If you do not have sufficient space to complete your answers, you may use the additional pages at the back of the booklet.

# Study the information below and answer the questions that follow.

Student Bounty.com 2 Dave owns "H<sub>2</sub>O", a privately-run health club business located on the outskirts of The health club has built up a good reputation over the years and many customers re on a regular basis. "H<sub>2</sub>O" offers a high quality service at what Dave considers to be a competitive price. The facilities provided for customers include use of a dry sauna, steam room, jacuzzi, gym, sun-bed and coffee bar.

Currently an entrance fee of £30.00 per customer is charged, which allows customers access to all facilities. This price attracts an average of 200 customers per week. For health and safety reasons, the health club can accommodate only 250 customers per week. The variable costs (£2000) are associated with the entry of 200 customers per week. The fixed costs are estimated at £3000 per week.

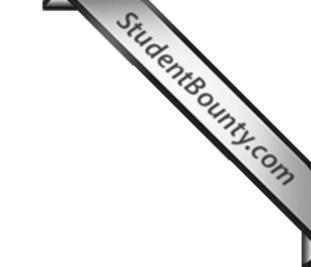

A local newspaper has printed a story indicating that the local council intends to provide similar facilities in the nearby leisure centre. Dave is currently investigating options to guarantee the long-term survival of the business. A summary of the **options** open to Dave are:

- Do nothing, that is, leave the entrance fee unchanged; 1.
- Respond to customer feedback which has indicated that customers on low incomes (e.g. students and customers who are unemployed) are likely to use the facilities more often, if the entrance fee is lowered to £25.00 per customer. This is likely to:
  - **A.** maintain customer numbers at the current average per week; or
  - **B.** lead to an increase in the number of customers per week, up to the maximum allowable for health and safety reasons.

Dave thinks that carrying out a break-even analysis might provide some insight into the best way forward.

## Study the information below and answer the questions that follow.

3 GEN Limited produces and sells diesel generator sets from a production plant loc Armagh. The firm has recently won a large order to supply generator sets to a Saudi firm called MATGO, based in the Middle East. The order has been valued at £500 000.

Student Bounty.com The plant is mostly automated, enabling the direct labour content of production to be kept to a minimum. Activities are sub-divided into three operations, Production, Assembly and Painting. Each diesel generator set requires one hour's production time, half an hour's assembly time and half an hour's painting time. The direct labour costs are £6.50 per hour for Production, £6.00 per hour for Assembly and £6.00 per hour for Painting.

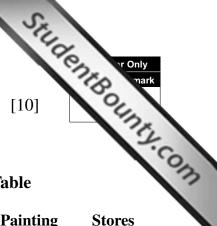

The total number of "Stores Issue Notes" issued to the Production Department was 600 whilst the number issued to the Assembly and Painting Departments was 200 each. Management have agreed that this will be the basis upon which to allocate the Stores Department costs to other departments.

A total of 52000 machine hours were recorded in the company in relation to this contract, and were sub-divided between the various departments as shown in **Panel A** below:

**Panel A: Machine Hours** 

| Department | Number of Machine Hours |
|------------|-------------------------|
| Production | 30 000                  |
| Assembly   | 11000                   |
| Painting   | 11000                   |
| Total      | 52 000                  |

(a) Complete **Table 1** to show the production overhead analysis and apportionment of overheads for the Saudi Arabian contract.
