## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

## MARK SCHEME for the May/June 2010 question paper for the guidance of teachers

## 9700 BIOLOGY

9700/21

Paper 2 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	OOL AGA LEVEL Mayloune 2010	0.00	
(a) (i)	glycosidic;		[1]
(ii)	<u>hydrolysis</u> / <u>hydrolytic</u> ;		[1]
(iii)	assume that the answer refers to within the cell unless told accept any two relevant examples, e.g. solvent / medium for reactions; transport medium; maintaining turgidity / keeping firm / prevents flaccidity / AW (raw material / reactant for) photosynthesis / photolysis; expansion / elongation / growth; maintains, hydrostatic pressure / pressure potential; maintains water potential (gradient);  A maintains osmotic gradient / prevents plasmolysis stomatal opening; hydrophilic interactions of membranes; (in vacuole) pushes chloroplast to edge of cell;  R hydrogen bonding unqualified by ref. to membranes		[2 max]
has hyd	nerical / ball-shaped / AW ; s a tertiary structure ; <b>ignore</b> quaternary lrophilic / polar, groups on outside ; ser soluble ;		
	ignore 'more than one polypeptide'		[2 max]
(c) (i)	active site; ignore binding / catalytic		[1]
(ii)	<ul> <li>(shape of) U / active site, gives specificity; A ecf from substrate, fits into / binds with, active site / U; A ecf from complementary (shape) / matching shape;</li> <li>A 'lock and key' / induced fit R 'same shape'</li> </ul>		
	further detail of substrate binding to active site; forms, enzyme-substrate / E-S, complex; causes stress in substrate / AW; lowers activation energy / reactions occur at low(er) ter	mperatures :	
	not used up in reaction / remain unchanged / reusable high turnover number / catalyse many reactions per un	•	[4 max]

	GCE AS/A LEVEL – May/June 2010	9700	21

2 (a) award two marks if correct answer (29) or (28) is given

allow +/- 1 mm in reading the line

 $100\ 000\ \mu m\ /\ 3\ 500 = (28.57)$ 

or (28.29 if measured 99 mm) or (28.86 if measured 101 mm)

29 ;; A 28 only if 99 mm measured

award one mark if correct measurement is divided by the magnification or if answer is given to one or more decimal places [2 max]

(b) (i) stretch / expand / lengthen, on inspiration and, recoil / shorten, on expiration;

A alternatives for inspiration and expiration but R contract and relax (stretch) to increase, surface area / volume of air, for, diffusion / gas exchange; (recoil) to (help), expel air / force air out; ignore contract prevent alveoli, bursting / breaking / AW; R collapsing

(ii) ignore moist

correct ref. to diffusion of, carbon dioxide / oxygen; **A** absorb / lose / AW (many alveoli) large surface area;

surrounded by, (many) <u>capillaries</u> / <u>capillary</u> network / AW;

short diffusion distance (between air and blood);

blood maintains concentration gradient;

epithelium / alveolar wall / AW, thin / squamous; A alveolus one cell thick

A alveolus has a thin wall

R cell wall e.g. alveolar cell wall is thin

idea that very little between, epithelium and endothelium / AW;

e.g. alveolus and capillary are close together

[4 max]

[2 max]

(c) (i) assume answers are about person with emphysema, accept ora if clear fewer alveoli / (large) 'holes';

A alveolar walls broken down / fewer air sacs / alveoli burst / destroyed less / destroyed / broken, elastic tissue / elastin; ignore damaged

R no, elastin / elastic fibres

small(er) surface area;

fewer capillaries:

named change(s) to bronchial tissue; e.g. enlarged goblet cells, more mucus, scar tissue, scarred, narrow lumen in airways, inflammation, damaged / no, cilia ref. to tar deposits;

R collapsed lung tissue

[2 max]

(ii) shortness of breath (when exercising) / breathlessness;

A breathing difficulty

wheezing / AW (on inspiration);

rapid breathing rate / hyperventilation / decreased ability to hold breath;

**R** heavy breathing

chest, tightness / pain;

cyanosis / bluish appearance to the skin / AW; A pale

fatigue / tiredness / lethargy / weakness / dizziness / AW;

coughing / coughing up blood;

lots of mucus produced / much phlegm;

expanded / barrel, chest;

R ref. to oxygen concentration of the blood

R small vital capacity

[2 max]

[Total: 12]

		50171077111111 may/64m61010 5100 11
(a)	(i)	right ventricle; pulmonary vein; [2]
	(ii)	ignore close to prevent backflow – allow ref to one side only valve opens to allow blood from atria to ventricles; when ventricles contract, valves close (to stop backflow); A valves close when blood is pumped out of the ventricles ref. to pressure difference between chambers;  [2 max]
(b)	1; 5; 2;	
	4;	[4]
(c)	1	SAN sends out, wave of excitation / impulses; A electrical (im)pulses R once only - nervous impulse(s) / pulse(s) / signal(s) / wave(s) R if brain stimulates SAN to send out impulses
	2	spreads across atria ;
	3	atria contract / atrial systole ;
	4	fibrous ring / non-conducting tissue / insulating tissue ;
	5	prevents, it reaching the ventricles / ventricles contracting at the same time (as atria);
	6	AVN sends on wave of excitation to ventricles;
	7	A in context – impulse reaches AVN and is passed on to ventricles (therefore) time delay to allow, atria to empty / atria to complete contraction / ventricles to fill / atria and ventricles do not contract at the same time;
	8	time ref. 0.1–0.2 seconds;
	9	Purkyne tissue conducts, excitation / impulses, to base of, septum / ventricles;  A apex of heart

11 (so) ventricles contract from base upwards / ventricles force blood up from base;

10 spreads upwards in ventricle (walls);

	GCE AS/A LEVEL – May/June 2010	9700	21

**4 (a)** caused by pathogen, transmissible / communicable / contagious / transferable / passed from one person to another;

A for pathogen – microorganism / any two named types of microbe

R parasite unqualified

[1]

(b) R virus or bacteria once in the answer

female, Anopheles (mosquito);

takes blood (meal) from an (infected) person, feeds on an (uninfected) person;

R 'bite' unless qualified with blood

Plasmodium / parasite, transmitted in (mosquito's) saliva;

Plasmodium / parasite, blood transfusion / shared needles / across placenta / at birth;

[2 max]

- (c) max 3 for malaria max 3 if pathogen(s) is virus or bacterium
  - 1 Anopheles / mosquito / vector, survives / breeds / lives, within the tropics / in hot and humid areas; ora
  - 2 Plasmodium / pathogen / parasite, needs to reproduce within the mosquito (at temperatures above 20°C);
  - 3 eradicated in some countries outside the tropics;
  - 4 ref. to LEDCs and, poor / non-existent, mosquito control programmes;
  - 5 mosquitoes resistant to, DDT / insecticides / pesticides ;
  - 6 Plasmodium resistant to, drugs / chloroquine / other named drug;
  - 7 TB is transmitted, by, droplets / coughing / sneezing; A in the air
  - 8 no vector / no mosquito / no requirement for hot or humid conditions;
  - 9 ref. to, HIV infection / lower immunity / immunocompromised;

[4 max]

- (d) 1 <u>active immunity</u>;
  - 2 vaccine contains, antigen(s) / pathogen / microorganism / named type ;
  - 3 (primary) immune response;
  - 4 B lymphocytes / B cells / plasma cells, synthesise / produce / secrete / release, antibodies :
  - 5 ref. to T helper cells (enhancing humoral response);
  - 6 clonal selection / described ;
  - 7 specific, (T / B) lymphocytes / antibodies; A 'particular' / AW
  - 8 memory cells, remain (in circulation) / give long-term immunity / give immunological memory / AW;
  - 9 fast(er) second(ary) response;
  - 10 ref. to boosters / AW;
  - 11 immunised person cannot spread disease to others;
  - 12 herd immunity / unimmunised people are safe(r);
  - 13 surveillance of population for signs of disease / when there is an outbreak;
  - 14 ref. to ring immunity / AW;

[5 max]

[Total: 12]

			GCE AS/A LEVEL – May/June 2010	9700	21
5	(a)	interpha	se / S phase / synthesis phase ; R G1/G2 unqualified	by interphase	[1]
	(b)	(i) <u>hyd</u>	rogen ;		[1]
		(ii) M =	adenine and <b>O</b> = cytosine;		[1]
	(c)	each strand, of DNA acts as a template (for the synthesis of a complementary strand);  A described in terms of base pairing new DNA (molecule) has one, old / parental / original, strand and one, new / daughter strand;			
			nalf old and half new' unless clearly referring to two stra	nds	[2]
	(d)				-
6	(a)	<b>J</b> nitri	ogen fixation ; fication / oxidation ; itrification / reduction ;		[3]
	(b)	/ an ref. to p legume	source of, fixed nitrogen / usable nitrogen / organic nitr nmonium ions / AW; <b>R</b> nitrate rotein production in legume; can, colonise / grow in, nitrogen / nitrate, deficient <i>or</i> po		ds / ammonia
<b>A</b> not dependent on nitrate in soil compete successfully with non-leguminous plants;			[2 max]		
					[Total: 5]
