

## MARK SCHEME for the May/June 2014 series

## 9700 BIOLOGY

9700/23

Paper 2 (AS Structured Questions), maximum raw mark 60

MMM. Hiremepapers.com

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	GCE AS/A LEVEL – May/June 2014	9700	23
· · · · · · · ·			
Mark scheme ab	breviations:		
	paratos marking points		

separates marking points
alternative answers for the same point
reject
accept (for answers correctly cued by the question, or by extra guidance)
alternative wording (where responses vary more than usual)
actual word given must be used by candidate (grammatical variants accepted)
indicates the maximum number of marks that can be given
or reverse argument
marking point (with relevant number)
error carried forward
ignore

(a)		allow mps 1, 5 and 6 if non-competiti	-		
()	1	(glutamycin) similar shape to, substra			
	2	competes with substrate/competitive			
	-	(glutamycin) binds to/fits into/enters			
	3 4				
		(glutamycin) complementary (shape)			
	5	<ul> <li>(so) substrate/glutamyl-tRNA, cannot</li> <li>A no/few, ES complexes</li> <li>A prevents formation of ES com</li> <li>A glutamyl-tRNA forms enzyme</li> </ul>	plexes		
	6	slows the rate of reaction / AW ;			
	7	ref. to increasing concentration of inh	nibitor has greater effect on in	hibition;	[max 4]
(b)	tran	sport is against the concentration gra	dient/ <b>AW</b> ;		
	requ	irement of, energy/ATP;			
		of, membrane/carrier/transport/pun nannel/pore, protein	np, protein <b>;</b>		
	ref.	<i>to</i> conformational change (of pump p	rotein);		
	ref.	to specificity ;			[max 3]
(c)	(i)	nitrogen fixation ;			[1]
	(ii)	<i>idea that Rhizobium</i> will receive, pho gains, carbohydrate/amino acids ; for energy/growth/replication ;	tosynthates/assimilates (fron	n plant) ;	
		receives oxygen ; idea of (nodules provide) correct li	ving conditions/ideal habitat	t/anaerobi	с
		conditions (for nitrogenase)/AW ; A ref. to protection, qualified mu	tualistic relationship; A desc	cribed	[max 2]
	(iii)	production of, ammonium/NH4 <sup>+</sup> /ami	monia/NH₃;		
		(fixed/useable) nitrogen transferred	to plant ;		
		used for amino acid production (in pl	ants) ;		
		ref. to other uses relevant to growth	; e.g. in DNA replication/trans	scription	
		increased/used in, protein synthesis	; A named protein		
					[may 0]
		(for) production of new, cells/tissues	,		[max 2]

Page 6		Mark Scheme	Syllabus	Paper
		GCE AS/A LEVEL – May/June 2014	9700	23
(a)	stomat	a in, pits/cavities/chambers/crypts; I sunken stomata		
	no stor	nata on upper surface ;		
	few sto	mata ;		
	hairs/t	ichomes ;		
	thick (w	axy) cuticle ;		
	thick w	alled epidermal cells;		
	several	layers of, upper epidermis/hypodermis;		[max 3
(b)	300 ;;			
	(18000	/60 or 19000/60 or 20000/6)		
	if corre	ne mark ct measurement is divided by magnification but incorrec if answer not to nearest 100 <sub>µ</sub> m	t conversion facto	r [2
(c)	1 los	s of water vapour from, leaves/aerial parts of the plant ;		
	<b>2</b> wa	ter evaporates from, walls/surface, of mesophyll cells;		
	3 inte	o air spaces ;		
	<b>4</b> wa	ter vapour diffuses(out to atmosphere);A water <i>if mp2</i>	awarded	
	5 thr	ough open stomata (to atmosphere) ;		
	<b>6</b> do	wn a water potential gradient ;		
		A idea that water potential gradient established		[max 4
				[Total: 9]

Page 7	Mark Scheme	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2014	9700	23

**5** (a) accept Hb for haemoglobin throughout

low(er), partial pressure/AW, of oxygen/O<sub>2</sub>;

high(er), partial pressure / AW, of, carbon dioxide /  $CO_2$ ;

formation of carbaminohaemoglobin;

carbonic acid disocciation to form, hydrogen ions/ ${\rm H}^{\scriptscriptstyle +}$  (and hydrogen carbonate ions) ;

formation of haemoglobinic acid/binding (of Hb) with, hydrogen ions/H $^{+}$ , causes release of oxygen ; *allow HHb* 

*ref. to* Hb affinity for oxygen ; e.g. Hb has higher affinity for, hydrogen ions/ $H^+$ , than oxygen ; reduces/lowers, affinity of Hb for oxygen

Bohr effect ;

AVP ; e.g. ref. to allosteric effects

[max 3]

- (b) lower, partial pressure/AW, of oxygen (at high altitudes) or less oxygen in inhaled air/AW;
  - (so) percentage saturation of haemoglobin is lower;
     A haemoglobin is less saturated
     A fewer molecules of/less, oxygen combine with haemoglobin
  - more haemoglobin needed (so more red blood cells);
     A (more red blood cells) so more haemoglobin/more oxyhaemoglobin can be formed

idea of compensation ; e.g. (to transport) same amount of oxygen to, cells/tissues;

ref. to (increased) secretion of, erythropoietin/EPO;

[max 3]

[max 3]

(c) (i) making a (complementary) copy of, DNA; A a gene ref. information / AW, for production of a polypeptide ;

one (DNA) strand acts as a template ; **AW** production of (pre) mRNA ; detail of process ; e.g. assembly of nucleotides RNA polymerase

	Page 8		Syllabus	Paper
		GCE AS/A LEVEL – May/June 2014	4 9700	23
	(ii)	nucleotide/base, sequence of, <u>DNA</u> / <u>gene</u> , chang <b>A</b> new allele (formed)	ged/ <b>AW;</b>	
		ref. to altered mRNA/ <b>AW ;</b> this may be in context of a named type of mu consequence on tRNA	tation	
		tRNA/anticodon, with different amino acid (to ribo A tRNA with different anticodon	osome);	
		change in amino acid(s)/different amino acid se structure;	equence/change in prir	nary
		affects, secondary structure/tertiary structure/3D	shape/function, of prot	ein ;
		ref. to one type of mutation ;		
		e.g. base substitution means deletion/insertion, leads to framesh	ft	
		ref. to premature stop codon		[max 3]
	(iii)	<i>may prevent</i> breaking of hydrogen bonds between, base pairs (and access of RNA polymerase) ;	/bases/nucleotides,	
		attachment of, RNA polymerase (to DNA);		
		progress/functioning, of RNA polymerase (along	gene);	
		synthesis/elongation of (pre) mRNA ;		
		AVP ; e.g. interfere with action of helicase		[max 2]
				[Total: 14]
6	(a) (i)	deposit/build-up/presence/AW, of atheroma/(at	heromatous) plaque ;	
	.,.,	thicker wall ;		
		narrowing of the lumen; <b>R</b> lumen, blocked/clog	ged	
		lumen no longer round ;		
		rougher / AW, lining; A idea of damaged endot	nelium	[max 2]
	(ii)	damage/AW, to, endothelium/tunica intima/AW	;	
		promotes blood clotting/makes platelets thrombosis/ <b>AW ;</b>	sticky/increases risk	of
		(so) contributes to plaque/atheroma ; A atheroso	lerosis	
		<i>ref.</i> (vaso) constriction ; <b>A</b> reduces diameter <b>A</b> reduces resistance	to blood flow	[max 1]

Page 9	Mark Scheme	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2014	9700	23

(b) (i) one correct structural feature with one relevant corresponding function e.g.

thick/muscular, wall; **A** thick tunica media **A** smooth muscle withstand high blood pressure/maintains pressure/provides strength;

elastic tissue ;
provide, stretch/recoil/AW;

smooth tunica intima ; maintain, laminar/smooth, flow ; **AW** 

presence of collagen ; prevents rupture / **AW** ;

allow the function mark for general statement transports blood away from the heart to the (lungs and) rest of the body; [max 2]

 (ii) one cell thick (wall)/endothelium only/thin wall/AW; short diffusion distance/high rate of diffusion; I easy diffusion

pores/gaps/spaces, between, cells in wall/endothelium; to allow exchange of substances/example described/formation of tissue fluid;

small, diameter/cross sectional area ; **A** range 7–12 μm *ref.* efficient, exchange/delivery/collection, of materials ; e.g. reaches all cells/**AW** slows down blood flow

maximises time for red blood cells to collect/deliver, oxygen reduces distance for diffusion to cells

[max 2]

[Total: 7]
