UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2010 question paper for the guidance of teachers

9700 BIOLOGY

9700/32

Paper 32 (Advanced Practical Skills 2), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2010	9700	32

Question	Expected Answers		Additional Guidance	Marks
1 (a) (i) Calcula	te the surface area of each bead a	and the mean surface area of l	beads.	
MMO decision 1	1. 5 or more (bead radii/di	ameters);		[1]
MMO collection 1	measures diameter or records radius	AND units mm;	Reject any measurements not whole number of mm Reject 6 mm or more for diameter or 3 mm or more for radius	[1]
ACE interpretation 1	3. one correct calculation	for one bead surface area;		[1]
PDO display 2	4. shows addition of bead number measured or each surface area ad number;	measurements divided by		[1]
	5. answer no more than 3	sig. figs.;		[1]

Page 3	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2010	9700	32

Question	Expected Answers		Additional Guidance	Marks
(ii) Prepare the sp	ace below to record your obs	servations.		
PDO recording 2	1. table with all cells drawn	(heading top/left) AND surface area (/)mm² or no. of beads;	Reject if units in body of table	[1]
	(heading) 2. colour/observation;			[1]
MMO	3. only records at 2, 4 and 6	(minutes);		[1]
collection 2	(highest no. of beads) 4. yellow/green;			[1]
MMO	5. surface area recorded;			[1]
decisions 3	6. use 20 beads in one tube a numbers of beads;	and at least 3 different		[1]
	7. even range;			[1]
(iii) The student re	alised that there were two inc	rocedure. State the two independent variabl	es.	
ACE interpretation 1	surface area or number of beads	AND enzyme or yeast concentration/quantity;	Reject more than two variables	[1]

Page 4	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2010	9700	32

Question	Expected Answers	Additional Guidance	Marks
(iv) Suggest how y	edure.		
ACE	idea of cubes with equal volume of yeast;	Reject amount	[1]
improvements 3	idea of equal shaking;		
	repeat measurements AND mean or average;		[max 2]
	colorimeter/white card or pH paper or meter;		
	separate beads using Petri dish/larger container;		
	use thermostatically-controlled water-bath;		
	idea keep time the same e.g. stagger start or have separate experiments;		
	use more beads or more surface areas;		

Page 5	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2010	9700	32

Question	Expected Answers	Additional Guidance	Marks
(b) Describe and exp	lain the results shown in Table 1.2.		
ACE conclusions 3	(in context of data) stops increasing or levels off or stops or stays constant or no more carbon dioxide or reaction stops;		[1]
	(in any correct context use of) 2. enzyme or catalase or active sites or ESCs;		[max 2]
	3. glucose or substrate fits into active sites or forms ESCs or (slowing or stops) lack of glucose or substrate or glucose not high enough or build up of product or ethanol lack of oxygen build up of carbon dioxide change in pH carbon dioxide dissolves into glucose or substrate or solution or water;		
	Total		[19]

Page 6	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2010	9700	32

Question	Expected Answers	3			Additional Guidance	Marks
2 (a) (i) Draw a large p	lan diagram of a hal	s shown in Fig. 2.1.	Label xylem and the cortex.			
PDO layout 1	clear, sharp, (not thicker than grid line for whole line) unbroken lines	AND no	shading	AND large 5 cm or more from centre of stele to epidermis;	Reject if overlaps the text of question	[1]
MMO collection 2	no cells AND drawn only half with detail (shown by epidermis line);			[1]		
	endodermis shown lines	by two	epidermi	gth between s and endodermis is wice the diameter of		[1]
MMO	draws region of xylem central;					[1]
decision 2	Reject if any label is one correct label wi				Reject if any writing on drawing	[1]

Page 7	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2010	9700	32

Question	Expected Answers	5			Additional Guidance	Marks	
` ` `	(ii) Make a high-power drawing of a group of three complete touching xylem vessels and a group of three complete touching cortex cells. Reject all marks if only two cells drawn except label mark?						
PDO layout 1	1. clear, sharp, (not thicker than grid line for whole line) unbroken lines	AND no	shading	AND smallest group of complete touching cells will not fit inside 6 × 6 cm grid;		[1]	
MMO collection 2	only 6 complete cel	ls drawn	AND two groups of 3 touching cells;			[1]	
	cell wall in at least of drawn angular in or of three		AND oth rounded	er group of cells		[1]	
MMO decision 2	(xylem) thicker cell Measure thickest or	er cell wall than (cortex) cell walls; kest on both.		ll walls;	Allow only if cell walls drawn as double lines for both groups of cells	[1]	
	correct labels with I cell wall;	abel lines	to lumen i	n xylem AND any	Reject if any writing on drawing	[1]	

Page 8	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2010	9700	32

Question	Expected Answers	3		Additional Guidance	Marks
(b) (i) Calculat	e the magnification of the	specimen shown i	n Fig. 2.2. Actual ler	ngth of line X = 1900 μm.	
MMO collection 1	measures line X cor	rrectly with mm or cr	n;		[1]
ACE interpretation 2	OR 52000 or 52500 or 5 correct calculation of 0.19;	53.5 or 54 with 1.9 r 5.35 or 5.4 with 0.1 53000 or 53500 or 5 of any figure divided	4000 with 1900; by 1900 or 1.9 or	vable differences between the spe	[1]
M1 and i	n Fig. 2.2.	_			
PDO recording 2	organise as a table/venn diagram/ruled connected boxes	AND headed M1 and Fig 2.2	AND all comparative statements opposite each other;		[1]
	only differences rec	orded;			[1]

Page 9	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2010	9700	32

ACE	feature	M1	Fig. 2.2	Reject all ticks with crosses unless have	[max 2]
interpretation 2	1. xylem shape	star-shape;		key	[max 2]
	2. xylem position	centre;			
	3. phloem	clearer or can see or present	not clear or cannot see or absent;		
	4. pith	absent	present;		
	5. thickened cells under epidermis	absent	thick ring/present;		
	6. epidermis layers	one or thin(ner)	two or thick(er);		
	7. size cortex stele/xylem	larger/wider/thicker or more smaller/narrower/ thinner or less	smaller/narrower/ thinner or less larger/wider/thicker or more;		

Page 10	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2010	9700	32

Question	Ex	pected Answers		Additional Guidance	Marks	
(c) Plot a graph of the data shown in Table 2.1.						
PDO layout 4	0	x-axis time /hr(s) or hour(s)	y-axis AND vol(ume) /cm³ hr⁻¹;	Must have units	[1]	
	S	scale as 1hr to 2 cm (allow no 0) Allow 1 at origin as long as 1hr to 2 cm must label origin.	AND 0.5 cm ³ to 2 cm; Allow 0. 5 at origin must label origin if not 0	Reject S if awkward scale	[1]	
	Р	correct plotting with crosses or dot in circle;	Intersection of cross must be clear to show plot	Reject P plotting if awkward scale Reject if only blobs or dots or blobs in circles	[1]	
	L	straight line between all points or smooth curve through all points;	Quality – no thicker than on grid, not feathery for the complete line Joining plots • Ruled lines plot to plot • Curve through all plots Extrapolation • Not beyond <i>x</i> - or <i>y</i> -axis • If in context of data correct to go to 0,0 must be within 2 mm of 0 If not correct in context of data then no extrapolation at either end of data	Reject if not five plots	[1]	
	То	Total			[21]
