# Mark Scheme (FINAL) J une 2008 

GCE

## GCE Biology (Salters Nuffield) (6131/ 01)

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

# PRE-STANDARDISATION MARK SCHEME - UNIT SN1 (6131/01) AS BIOLOGY (SNAB) J une 2008 <br> <br> STRICTLY CONFIDENTIAL

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a )}$ | right-hand $1^{\text {st }}$ box down ; <br> ACCEPT if a cross rather than a tick is used | $\mathbf{1}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 1(b) | 1. (skeletal) muscle contracts / eq ; <br> 2. squeezes vein / named vein ; <br> 3. blood forced in both directions (away from squeezed area) / eq ; <br> 4. (one way) valves present (in veins) ; <br> 5. one way flow / prevent backflow / eq ; [ACCEPT as a diagram] <br> 6. reference to role of thorax e.g. pressure changes during inspiration / expiration / breathing ; <br> 7. lower pressure in \{heart / atria\} during \{diastole / eq\}; <br> Comments <br> mp 1: ALLOW muscles either side of vein contract NOT muscles in veins <br> IGNORE: references to the idea of blood being pushed into vein from capillaries references to gravity | $\max _{3}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( c )}$ | 1.\{squamous / pavement / flattened / thin / eq \} cell / <br> 2. (ondothelium ; one cell thick ; <br> 3. small lumen present / (capillary) small diameter ; <br> 4. pores present / gaps present / eq ; <br> Comments <br> IGNORE: references to large surface area <br> thin membrane / thin wall | max |
| $\mathbf{2}$ |  |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(a)(i) | 1. active \{transport / uptake\} ; <br> 2. facilitated diffusion ; <br> 3. endocytosis / pinocytosis / endopinocytosis / eq ; <br> Comments <br> $m p ~ 1: ~ A L L O W ~ p h o n e t i c ~ s p e l l i n g ~$ <br> $m p ~ 2: ~ N O T ~ d i f f u s i o n ~ a l o n e ~$ <br> $m p ~ 3: ~ N O T ~ ' E X O ' ~ a s ~ p r e f i x ~$ | max |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(a)(ii) | translation; | $\mathbf{1}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{2 ( b ) ( i ) ~}$ | $299 ;$ | $\mathbf{1}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{2 ( b ) ( i i ) ~}$ | $906 ;$ ACCEPT 903 | $\mathbf{1}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(c) | 1. \{ATP / ADP / $\mathrm{P}_{\mathrm{i}} /$ (inorganic) phosphate\} ; <br> 2. mRNA ; <br> 3. tRNA ; <br> 4. rRNA ; <br> Comments <br> mp 1: NOT phosphorous <br> ALLOW RNA for one mark only (mps 2, 3 \& 4) <br> NOT RNA polymerase <br> NOT translation initiation complex unless named molecule given | max |

| Question Number | Answer |  |  | Mark |
| :---: | :---: | :---: | :---: | :---: |
| 3(a) | Drink | Time taken for 180 heart beats/ seconds | Caffeine concentration / mg per 100 ml |  |
|  | Instant coffee |  | 33 to 34 ; |  |
|  | Filter coffee |  | 58 to 60 ; |  |
|  | Tea |  | 30 ; | $\max _{3}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 3(b) | no \{difference / effect $\}$ due to : <br> 1. genotype / eq ; <br> 2. age; <br> 3. size / eq ; <br> 4. gender / eq ; <br> 5. physiological state / eq ; <br> 6. pre-treatment / eq ; <br> 7. absorption rate / eq ; <br> Comments <br> mp 1: ALLOW same species, genetic make up <br> mp 3: ALLOW size of heart / organism, same mass, same surface area <br> mp 4: ALLOW sex, male, female <br> mp 5: ALLOW resting heart rate, metabolic rate, pregnancy but NOT health <br> mp 6: ALLOW from same environment. | $\max _{3}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 3(c) | 1. variation due to chance / eq ; <br> 2. still some caffeine present within the organism / still <br> some caffeine present on the surface ; |  |
| 3. idea of time to recover from effect of caffeine ; <br> 4. inaccuracy of measurements / eq ; <br> Comments <br> IGNORE references to stress, temperature, light or pH <br> $m p$ 4: need the idea that it is difficult to count heart beats, <br> NOT miscalculations. | max |  |
| $\mathbf{2}$ |  |  |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 4(a)(i) | galactose ; <br> glucose ; <br> NB do not penalise if it appears that the bond goes to the H rather than the O in OH (e.g. as shown in glucose at carbon 4) | 2 |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 4(a)(ii) | 1. breaking of (glycosidic) bond / eq ; <br> 2. \{addition of / using\} water / eq ; <br> 3. breaking larger molecule(s) into smaller molecules / <br> named example other than lactose to glucose and <br> galactose OR disaccharide being broken into two <br> monosaccharides ; | max |
| 4. reference to \{hydrolytic / named\} enzyme ; |  |  |
| Comments |  |  |
| mp 1: NOT peptide / hydrogen bond. | $\mathbf{2}$ |  |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 4(b)(i) | 1. Parents' genotypes: $\mathrm{Gg} / \mathrm{gG}$ for both parents and parents' gametes: G g for both parents ; <br> 2. Possible genotypes <br> ACCEPT gG in place of Gg <br> 3. Probability of not having the condition: $0.75 / 75 \% / 3 / 4$; NOT 3:1 <br> Comments <br> mp 1: both genotypes of gametes need to be correct <br> mp 2: ALLOW if Punnett given <br> IF incorrect letters / genotypes in mp 1, ALLOW mps 2 \& 3 as consequential errors for max 2 marks <br> IF probability correct based on their genotypes, ALLOW mp 3 | 3 |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 4(b)(ii) | 1. more than one \{triplet / codon / eq\} may code for same <br> amino acid ; |  |
| 2. third base in \{triplet / eq\} often not important/ eq ; <br> 3. at 3rd base \{point mutation / base changes / eq\}; <br> 4. amino acid swapped but does not change shape of <br> protein / eq ; | 5. (mutation occurs) in intron / eq ; |  |
| Comments |  |  |
| Terms such as genetic codes / codes are not sufficiently precise |  |  |
| as alternatives to triplet / codon |  |  |$\quad$| $\mathbf{2}$ |
| :--- |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 4(b)(iii) | 1. risk of miscarriage ; <br> 2. risk of harm to \{fetus / eq\}/ eq ; <br> 3. reference to a fetus' right to life ; <br> 4. should the pregnancy be terminated / eq ; <br> 5. \{practical / financial\} issues ; <br> 6. mental and emotional issues ; <br> Comments <br> ALLOW baby or child as equivalent to fetus <br> mp 3: ALLOW idea of ‘life is precious' <br> mp 5: practical issues include planning for medical treatment <br> or domestic arrangements <br> mp 6: ALLOW idea of psychological effects on family members <br> IGNORE references to cost of screening | max |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{5 ( a )}$ | far right-hand box ; |  |
|  | ACCEPT if a cross rather than a tick is given |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{5 ( b ) ( i )}$ | 110 / first one / higher one / eq ; | $\mathbf{1}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 5(b)(ii) | 1. high salt \{intake / in diet / eq\}; <br> 2. high (saturated) \{fat / cholesterol / LDL / eq\} \{intake / in diet / eq\}; <br> 3. high alcohol intake ; <br> 4. smoking ; <br> 5. stress; <br> 6. hardening of arteries / atherosclerosis / eq ; <br> 7. old age ; <br> 8. inherited trait / eq ; <br> 9. obesity / overweight ; <br> 10. Iack of exercise / eq ; <br> Comments <br> mps 1, $2 \& 3$ need to have the high idea <br> mp 6: NOT atheroma, blood clots | $\max _{2}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{5 ( c ) ( i )}$ | $100 \% ;$ | $\mathbf{1}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 5(c)(ii) | \{twice as / x2 more / 100\%more \} likely to have heart disease / <br> eq ; <br> Comments <br> NOT guaranteed / 100\% likely to get heart disease <br> ALLOW consequential error from 5 (c)(i) | $\mathbf{1}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{5 ( d ) ( i )}$ | thrombus / (blood) clot / cholesterol / atheroma / fat / fatty <br> deposits / plaque / fibrin ; | $\mathbf{1}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 5(d)(ii) | 1. allows blood / metabolite / named metabolite / oxygen; <br> 2. to reach (cardiac) muscle (tissue / cells) ; <br> 3. (heart) muscle / region beyond block able to work (more <br> efficiently) ; |  |
| 4. enables aerobic respiration / eq ; <br> 5. removal of \{lactic acid / lactate\}/ eq ; <br> $m p$ 2: NOT to reach body, skeletal muscle <br> mp 3: IGNORE reference to restores normal function as in the <br> stem of the question <br> $\mathrm{mp} \mathrm{4:} \mathrm{enables} \mathrm{aerobic} \mathrm{respiration} \mathrm{in} \mathrm{heart} \mathrm{or} \mathrm{body}$ | max |  |
| $\mathbf{3}$ |  |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{6 ( a ) ( i )}$ | \{phosphate / phosphoric acid \}/ \{deoxyribose / pentose / eq\} <br> (sugar) ; | $\mathbf{1}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 6(a)(ii) | AA ; | TT ; |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{6 ( a ) ( \text { iii) }}$ | thymine ; <br> ALLOW thymin, thimin, thimine <br> NOT thyamine, thiamine, thyomine | $\mathbf{1}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{6 ( b ) ( i ) ~}$ | hydrogen / H (bond) ; | $\mathbf{1}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{6 ( b ) ( i i ) ~}$ | (sample) 4; | $\mathbf{1}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 7(a) | 1. (ion / $\mathrm{Ca}^{2+}$ ) $\{$ binds / eq\} to protein (in membrane) / \{named / channel / carrier\} protein ; <br> 2. reference to $\left\{\right.$ specificity / eq \} of protein to $\left\{i o n / \mathrm{Ca}^{2+}\right\}$; <br> 3. protein spans the membrane / eq ; <br> 4. protein changes shape / description of shape change / eq ; <br> 5. (ion / $\mathrm{Ca}^{2+}$ ) moves across from a region of high concentration to a region of lower concentration / down a concentration gradient / eq ; <br> 6. until both sides are equal / eq ; <br> Comments <br> NOT reference to ATP or energy needed | $\max _{4}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 7(b)(i) | 1. $\{$ linear / rapid / steady / eq $\}$ increase for first $\{31 / 2 / 4\}$ minutes ; <br> 2. uptake slows after $\{31 / 2 / 4$ / \{next 2 / eq \}\} minutes ; <br> 3. no further \{increase / uptake \} after $\{5.5$ / 6 minutes $\}$; <br> 4. credit correct manipulation of the data e.g. uptake is 1.8 to 2 au $\mathrm{min}^{-1}$; <br> Comments <br> ALLOW reference to concentration as equivalent to time references in mark scheme e.g. linear increase between 1 and 8.6 au as equivalent to mp 1 <br> mp 3: mark for commenting on what happens to uptake NOT rate e.g. plateau, levels off | $\max _{3}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 7(b)(ii) | 1. (a $10^{\circ} \mathrm{C}$ rise) increases the (initial rate of) uptake / <br> diffusion / eq ; <br> 2. no effect on final concentration / eq ; <br> 3. credit comparative manipulation of the data e.g. doubles <br> the (initial) rate ; <br> Comments <br> $m p 1:$ ALLOW reaches equilibrium, maximum earlier <br> $\mathrm{mp} \mathrm{3:} \mathrm{ALLOW} \mathrm{correct} \mathrm{reference} \mathrm{to} \mathrm{time} \mathrm{difference} \mathrm{e.g}$. <br> maximum reached 3 to 4 minutes earlier | max |
| $\mathbf{N O T}$ just repeating of each bit of data!! |  |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 7(b)(iii) | 1. more kinetic energy / moving faster / eq ; <br> 2. therefore more collisions with \{membrane / protein / <br> carrier / eq\}; |  |
| 3. more ions moving into cell per unit time / eq ; <br> 4. (dynamic) equilibrium will occur (independent of <br> temperature) / eq ; | 5. more \{membrane / named\} protein altered / eq ; <br> 6. more channels open ; <br> Comments <br> mp 1: NOT vibrating / moving around more <br> mp 2: NOT collisions with enzymes / active sites <br> mp 5: NOT denaturation, disruption of membrane <br> NOT reference to no more left to move in | max |
