Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions in Section A and Section B.
- Answer the questions in the spaces provided – *there may be more space than you need.*

Information

- The total mark for this paper is 80.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*
- In your responses, you should take particular care with punctuation and grammar, as well as the clarity of your expression.
- Calculators may be used.

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

TOTAL FOR SECTION A = 24 MARKS

SECTION B

Answer ALL questions in this section.

You should spend 60 minutes on this section.

Evidence A: Kayaks manufactured by *Pyranha Ltd*

The Loki

The Shiva

Evidence B: *Pyranha Ltd*, The bite of innovation

Pyranha is Europe's largest specialist manufacturer of canoes and kayaks that are exported to 50 countries. *Pyranha* was founded by Graham Mackereth in 1971.

The kayaks are made from a unique plastic that comes in a variety of colours. *Pyranha* work extensively with their main supplier of plastic raw material, *Resinex*, to always be at the forefront of plastic technology. A *Pyranha* kayak will stay stronger and better looking for longer than many of its competitors.

Pyranha's brand name is recognised around the world as the cutting edge of kayak design and innovation. It is committed to constantly making improvements to the whole production process to support this objective. This philosophy is why *Pyranha* has become the first choice for 'serious paddlers' as *Pyranha's* design team are paddlers themselves.

Pyranha, a family business, is still run by its founder and head designer, Graham Mackereth. Its competitors are large businesses, whose interests are very different from the passion that drives *Pyranha*. Over 40 years of research and development has gone in to producing award winning designs and they are proud to advertise that *Pyranha* is a company run 'by Enthusiasts, for Enthusiasts'.

The brand name of *Pyranha* has been a great name for the business. Its website states, 'We're aggressive and we're focused on being the best. We do not try to be the cheapest, but to design and make the very best for the market sector. We use the best materials and technology. Why? Because we paddle our own kayaks and we always want to paddle further, easier and in greater comfort and safety.'

5

15

20

The production facility includes custom-built energy efficient ovens which are the most advanced in the industry allowing *Pyranha* to get the best performance out of the plastics used. *Pyranha* was the first in the industry to develop the computer controlled moulding process.

25

Keeping high standards of quality is the top priority at *Pyranha* and rigorous tests are completed to ensure that each boat is tough enough to be used in the harshest conditions. *Pyranha's* demand for high quality also extends to its imported components from Finland, US and Hong Kong.

30

Pyranha has an ethical policy which includes issues such as waste, energy and the environment. They have been recycling since the mid-90s long before most companies thought about their environmental impact.

Pyranha do not know where their kayaks will be paddled so all are built to the same high standard. From kids to champions, Graham wants everyone to enjoy the world's biggest water sport.

(Total for Question 7 = 6 marks)

'We do not try to be the cheapest, but to design and make the very best for the market sector.' (Evidence B, lines 20-21)

8 (a) Explain why *Pyranha* uses a premium pricing strategy.

(6)

Dotted lines for writing the answer.

(b) Explain why it is important for *Pyranha* to maintain a close relationship with suppliers such as *Resinex*.

(6)

A series of horizontal dotted lines provided for the student to write their answer to the question.

(Total for Question 8 = 12 marks)

Selected data from *Pyranha*

Fixed costs to produce a casting for a new kayak design = £24 000

Average variable costs per kayak = £300

Average selling price per kayak = £900

- 9 (a) Using the above data, calculate how many of these new kayaks *Pyranha* needs to sell in order to break-even.
