

## **Cambridge Assessment International Education**

Cambridge International Advanced Subsidiary and Advanced Level

BUSINESS 9609/22

Paper 2 Data Response

March 2018

MARK SCHEME
Maximum Mark: 60

#### **Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the March 2018 series for most Cambridge IGCSE<sup>®</sup>, Cambridge International A and AS Level components and some Cambridge O Level components.

 ${\rm \rlap{R}\hskip-1pt B}$  IGCSE is a registered trademark.

# **Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

#### **GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

#### **GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always whole marks (not half marks, or other fractions).

#### **GENERIC MARKING PRINCIPLE 3:**

#### Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit
  is given for valid answers which go beyond the scope of the syllabus and mark scheme,
  referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these
  features are specifically assessed by the question as indicated by the mark scheme. The
  meaning, however, should be unambiguous.

#### **GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

### **GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

#### GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

| Question |   |  |       | Answer   |       | Marks |  |
|----------|---|--|-------|--|-------|-------|--|
| 1(c)     |   | Analyse <u>one</u> advantage and <u>one</u> disadvantage to PC of purchasing the computerised inventory management system.   |       |  |       |       |  |
|          | Level   | Knowledge<br>and<br>application  | Marks | Analysis   | Marks |       |  |
|          | Shows<br>understand   | understanding  | 4     | Good analysis of <b>one</b> advantage <u>and <b>one</b></u> disadvantage of purchasing an inventory management system in context | 4     |       |  |
|          | 2   | of inventory<br>management in<br>context   | 3     | Good analysis of <b>one</b> advantage <u>or</u> <b>one</b> disadvantage of purchasing an inventory management system in context  | 3     |       |  |
|          | Shows<br>knowledge of<br>inventory<br>management  |  | 2     | Limited analysis of <b>one</b> advantage <u>and</u> <b>one</b> disadvantage of purchasing an inventory management system         | 2     |       |  |
|          |   | ,  | 1     | Limited analysis of <b>one</b> advantage <u>or</u> <b>one</b> disadvantage of purchasing an inventory management system          | 1     |       |  |
|          | 0 No creditable content   |  |       |  |       |       |  |
|          | work in  Context Advant PC imp Will   | Inventory management is the control of stock – this could be raw materials, work in progress of finished products.  Contextual analysis likely to come from:  Advantages:  PC is in fashion business so being able to respond to customer need important e.g., not running out of sizes or style of clothes  Will allow PC to identify sales patterns quickly and respond to demand, boost revenue and cash in, possibly improve cash flow |       |  |       |       |  |
|          | <ul> <li>Disadvantages:</li> <li>Economy slowing down so making sure not over ordering is important so not left with clothes/footwear that does not sell</li> <li>Initial outlay expensive and economy slowing down, is this the best time to be investing in a stock control system?</li> <li>Training for Paul on using the new system – will he have time as a sole trader running two shops? Can he afford it?</li> </ul> |  |       |  |       |       |  |

© UCLES 2018 Page 6 of 12

| Question | Answer   |       |  |       |  |  |  |
|----------|--|-------|--|-------|--|--|--|
| 1(d)     | Evaluate Paul's decision to set up PC as a sole trader.  |       |  |       |  |  |  |
|          | Knowledge and Application (4 marks)  | Marks | Analysis and Evaluation (7 marks)                            | Marks |  |  |  |
|          |  |       | Justified evaluation based on argument(s) in context         | 7     |  |  |  |
|          |  |       | Developed evaluation based on argument(s) in context         | 6     |  |  |  |
|          |  |       | An evaluative statement based on argument(s) in context      | 5     |  |  |  |
|          | Shows understanding of setting up as a sole trader in context  | 3–4   | Argument about Paul's decision to set up PC as a sole trader | 3–4   |  |  |  |
|          | Shows knowledge of being a sole trader   | 1–2   | Limited analysis of being a sole trader                      | 1–2   |  |  |  |
|          | No   | 0     |  |       |  |  |  |
|          | <ul> <li>Note: A candidate may evaluate the decision in terms of setting up as a sole trader or in terms of not setting up as another legal structure (or both).</li> <li>Paul gets to make his own decisions –he has been through survival and now focusing on maximising profits/sales. Gets to decide what he wants to do with the business e.g., opened up the second shop, investing in the new stock control system</li> <li>Paul keeps the profits to himself and he has been pleased with the level of profit made. Rewards for his investment/entrepreneurial skills.</li> <li>Unlimited liability = higher risk especially if economy slowing down and considering Paul's market, cash flow slowing down and so if the business fails Paul is liable.</li> <li>Unlimited liability – heightened risk as Paul financed PC with mortgage on his home</li> <li>Loss of income for Paul as revenue expected to slow for at least the next 6 months. This will affect his livelihood and his standard of living.</li> </ul> |       |  |       |  |  |  |

|          | <ul> <li>Contextual analysis likely to come from:         Why market segmentation may be important:         <ul> <li>matching of customer needs especially given proportions of sales to business markets, need to understand what hotels want that could be different from restaurants/office for example.</li> <li>Enhanced profits/revenues for business, revenue has increased by 25% over the last four years, likely as LC knows it customers and their needs well</li> <li>Better opportunities for growth/more customers, each segment will be different so if more hotels opening and so on then LC can 'tap into this' and therefore could be reason why revenue has increased.</li> <li>Target marketing communications so that LC can have the right message for the right segments e.g. in marketing to restaurants or offices.</li> </ul> </li> </ul> |            |   |       |       |  |
|          | <ul> <li>Why market segmentation may not be important:</li> <li>Segmentation increases costs. LC makes carpets, this will increase the costs such as research and product development for the carpets and business customers will need different sales techniques</li> <li>Larger inventory has to be maintained by LC to cover the segments</li> <li>Promotion and distribution costs increase as LC will need different marketing campaigns for the different segments, for example, TV advertising for the showrooms and personal selling for the business markets.</li> </ul>   |            |   |       |       |  |
