

ADVANCED SUBSIDIARY (AS) General Certificate of Education 2014

Chemistry

Assessment Unit AS 2 assessing Module 2: Organic, Physical and Inorganic Chemistry

[AC122]

TUESDAY 17 JUNE, AFTERNOON

1 hour 30 minutes, plus your additional time allowance.

INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

Answer all seventeen questions.

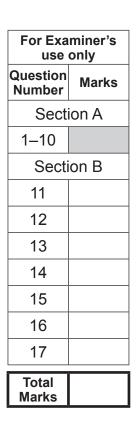

Answer **all ten** questions in **Section A**. Record your answers by marking the appropriate letter on the answer sheet provided. Use only the spaces numbered 1 to 10. Keep in sequence when answering. Answer **all seven** questions in **Section B**. Write your answers in the spaces provided in this question paper.

INFORMATION FOR CANDIDATES

The total mark for this paper is 100. Quality of written communication will be assessed in Question **13(b)(ii)**.

In Section A all questions carry equal marks, i.e. **two** marks for each question.

In Section B the figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question. A Periodic Table of the Elements, containing some data, is included in this question paper.

9575.04 **ML**

Section A

Look at the questions below. Only one of the answers labelled A–D is correct.

Choose the correct answer for each question. Mark its code letter by connecting the as illustrated on the answer sheet.

- StudentBounty.com 1 Equal volumes of 1-chlorobutane and 1-iodobutane are warmed with aqueous silver nitrate in the presence of ethanol. Which one of the following is the reason why the 1-chlorobutane reacts more slowly?
 - The C–Cl bond is more polar than the C–I bond А
 - В The C–Cl bond is stronger than the C–I bond
 - С The C–I bond is more polar than the C–CI bond
 - D The C–I bond is stronger than the C–CI bond
- 2 Which one of the following is correct as Group II is descended?

	Solubility of hydroxides	Solubility of sulfates
А	decreases	decreases
В	decreases	increases
С	increases	decreases
D	increases	increases

- 3 What is the colour of the flame produced when a barium compound is placed in a blue Bunsen burner flame?
 - А Crimson
 - В Green
 - С Lilac
 - D Orange

Which one of the following shows the effect on the yield of ammonia in the Temperature increase yield decreases Temperature increase 4

- D yield increases

- yield increases
- 5 Which one of the following mixtures will react to produce a compound with molecular formula C₄H₇N?
 - А 1-bromobutane and ammonia
 - В 1-bromobutane and potassium cyanide
 - С 1-bromopropane and ammonia
 - D 1-bromopropane and potassium cyanide
- 6 The reaction shown below

 $\mathrm{C_2H_5Br} + \mathrm{KOH} \rightarrow \mathrm{C_2H_4} + \mathrm{KBr} + \mathrm{H_2O}$

is an example of

- dehydration. А
- В elimination.
- С free radical substitution.
- D nucleophilic substitution.

- What is the mass of magnesium required to react with 50.0 cm³ of 0.1 mol & hloric acid? 7

 - D 0.240g
- 8 Which one of the following lists the compounds in order of increasing boiling point?
 - A CH₃CH₂CH₃ CH₃CH₂F CH₃CH₂OH B CH₃CH₂CH₃ CH₃CH₂OH CH₃CH₂F C CH₃CH₂F CH₃CH₂OH CH₃CH₂CH₃ D CH₃CH₂OH CH₃CH₂F CH₃CH₂CH₃
- 9 When an organic compound was reacted with chlorine, the organic product was found to have a relative molecular mass which had increased by 69. Which one of the following is the reaction mechanism?
 - elimination А
 - В electrophilic addition
 - С free radical substitution
 - D nucleophilic substitution

Which one of the following shows the effect on E_A and on N of increasing the temperature?

	E _A	Ν
А	constant	decreases
В	constant	increases
С	decreases	decreases
D	decreases	increases

		Section B	22
		Answer all seven questions in the spaces provided.	
11	Butan- equatio	1-ol is used to prepare 1-bromobutane according to the following to the fo	g
		$C_4H_9OH + HBr \rightarrow C_4H_9Br + H_2O$	
	(a) (i)	Give an equation to explain the term percentage yield .	
		percentage yield =	
			[1]
	(ii)	Assuming a 40% yield, what mass of butan-1-ol would be required to produce 5.48g of 1-bromobutane?	
		moles of 1-bromobutane	
		moles of butan-1-ol	
		mass of butan-1-ol	_ [3]
	(b) (i)	Give an equation to explain the term atom economy .	_ [0]
		atom economy =	
			[1]
	(ii)	Calculate the atom economy for the formation of 1-bromobuta from butan-1-ol.	ne
			_ [1]

12 Qualitative analysis can be used to show the difference between aqueous solutions containing different metal ions. (a) For each of the following pairs of metal ions, give an aqueous reagent which can be used to show the difference between the aqueous solutions. Write down the expected observations for each ion. (i) Iron(II) ions and iron(III) ions. Reagent [1] Observations [2] (ii) Aluminium ions and zinc ions. Reagent [1] Observations [1] Observations [2] (ii) Aluminium ions and zinc ions. [1] Observations [2] (ii) Addition of an aqueous solution of potassium chromate can be used to test for the presence of barium ions react with chromate ions? [1] (i) What is observed when barium ions react with chromate ions? [1]	 solutions containing different metal ions. a) For each of the following pairs of metal ions, give an aqueous reagent which can be used to show the difference between the aqueous solutions. Write down the expected observations for each ion. (i) Iron(II) ions and iron(III) ions. Reagent[1] Observations				SE
(i) which is the end of the function of the end of the presence of barium ions react with chromate ions? [1] (ii) Aluminium ions and zinc ions. [2] (ii) Aluminium ions and zinc ions. [1] Observations [1] Observations [1] Observations [1] (b) Addition of an aqueous solution of potassium chromate can be used to test for the presence of barium ions. [2]	(i) Note an index your Reagent [1] Observations [2] (ii) Aluminium ions and zinc ions. [1] Reagent [1] Observations [1] Observations [2] b) Addition of an aqueous solution of potassium chromate can be used to test for the presence of barium ions. [2] (i) What is observed when barium ions react with chromate ions? [1] (ii) Write an ionic equation, including state symbols, for the reaction of barium ions with chromate ions. [1]			tive analysis can be used to show the difference between aqueous containing different metal ions.	US TRAIL TO ONLY Mark
