# MARK SCHEME for the October/November 2009 question paper for the guidance of teachers 

## 9701 CHEMISTRY <br> 9701/21 Paper 21 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

different mass number/nucleon number
(b) $A_{r}=\frac{(24 \times 78.60)+(25 \times 10.11)+(26 \times 11.29)}{100}$

$$
=\frac{1886.4+252.75+293.54}{100}=\frac{2432.69}{100}
$$

which gives $A_{r}=24.33$
penalise ( -1 ) for misuse of significant figures
(c)

or size of atom increases down Group/ electrons are further away from nucleus or there is increased shielding down Group
allow ecf on answer to (i)

(iv) more - no mark for this alone
because reactivity of metals increases down the Group or electrons are further from nucleus
or IE is lower
or Ra is a stronger reducing agent
