CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the October/November 2012 series

9701 CHEMISTRY

MMM. Hiremepapers.com

9701/35

Paper 3 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Page 2	Mark Scheme	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2012	9701	35

Questio	n	Sections	Indicative material	Mark	Total
1 (a)		PDO Recording	Table completed and all temperatures recorded to 0.5°C. Must include at least one ending in .0 and one ending in .5.	1	[1]
Layouttemperature in °C (y-axis) and time (x-axis)minutes etc.Linear scales chosen so that graph occupies a		Linear scales chosen so that graph occupies at least half the available length of both axes. This includes the	1		
	(ii)	PDO Layout	Plotting accurate to within half a small square. Must plot all readings taken – minimum 8.	1	
		MMO Collection	2 straight lines drawn (0 to 3 minutes and 5 to 10 minutes).	1	
		PDO Layout	3 appropriate lines drawn including extrapolations.	1	[4]
(c)	(i)	ACE Interpretation	ΔT calculated. Examiner to check from graph and calculate to nearest .5 °C. Candidate's answer must be correct to nearest .5 °C. dp not needed for .0 but can include more sf if appropriate. Allow ΔT at 3 $\frac{1}{2}$ minutes, even if not max, provided some indication on graph.	1	
	(ii)	ACE Conclusions	All the magnesium disappeared / reacted / dissolved / gone. Must include idea of totality. (NOT stops fizzing)	1	
	(iii)		Error in one temperature reading = 0.5 (°C)	1	
		Interpretation	Maximum % error = $0.5 \times 2 / 7.5 \times 100 = 13.3\%$ (ecf 2 × error). Expression or correct answer but conditional on answer to 1 reading.	1	
	(iv)	ACE Improvement	Heat loss and add lid/cover/ top. (allow thermos flask)	1	
	(v)	ACE Conclusions	ANY 2 from Higher (initial and) final/ maximum temperature / all temperatures higher. (not temperatures higher)	1 1	
			No effect on ΔT .		
			Maximum temperature rise achieved quicker / reacts faster.		[7]

	GCE AS/A LEVEL – October/November 2012 9701				3	5		
2	(a) MMO Collection I Mass of FA 3 used between 1.3 and 1.5 g. Subtraction must be correct from unambiguous weighings.				1			
		PDO Layout		Π	Records initial and final burette reading for rough. Tabulates and records initial burette readings and volume of FA burette for all accurate titrations. Not final is 50 / 50.0 / 50.00 more than once is used in any initial reading. (One acc sufficient.)	tial and final 2 run from t awarded if e or if 50 etc	1	
		PDO <i>Recorc</i>	ling	ш	Appropriate headings and units in titrations. Only acceptable initial / fin reading / volume or reading or volum finish / beginning / end then	nal (burette) ne at start /	1	
		PDO Record	ling	IV	volume used/volume added / FA 2 used Units are /cm ³ , (cm ³) or volume in cm ³ . All burette readings, apart from recorded to 0.05 cm ³ (this includes (minimum) accurate titrations needed.	the rough,	1	

Examiner to check subtractions, round any burette reading to nearest 0.05 cm³ and then select the best titre using the hierarchy, two identical; two within 0.05 cm³, two within 0.1 cm³ etc., to calculate mean. This Examiner's value should be compared with Supervisor's mean titre taking into account the masses used by the Supervisor and the candidate.

Candidate titre x Supervisor mass/ candidate mass.

The candidate number, candidate's titre, difference from the Supervisor and mark awarded should be recorded on the template. This should be attached securely to the Supervisor's script.

		MMO Quality	V, VI and VII Award V , VI and VII for a mean within 0.20 cm ³ .	3	
			Award V and VI for a mean >0.20 and ≤ 0.40 cm ³ .		
			Award V for a mean $>$ 0.40 and $<$ 0.60 cm ³ .		
			Spread penalty		
			Titres (selected by Examiner) differ by ≥ 0.5 or only one accurate titration -1. This mark is deducted from those awarded in V to VII but no negative marks.		[7]
2	(b)	PDO Display	Calculation of mean. Candidate must average two (or more) accurate titres that are within 0.20 cm ³ of another. Working must be shown or ticks must be put next to the two (or more) accurate readings selected.	1	

Page 4		Mark Scheme Syll		Pape	r
GCE AS/		/A LEVEL – October/November 2012	9701	35	
		The mean should normally be quoted to the nearest 0.01. Example: 26.667 must 26.67. Two special cases where the mean may nallow mean to 3 dp only for 0.025 or 0.075 allow mean to 1 dp if all accurate burette given to 1 dp and the mean is exactly cand 26.2 = 26.1 is correct but 26.0 and incorrect.	t be rounded ot be to 2 dp: 5 e.g. 26.325; e readings we orrect. e.g. 26	to re 0	
		Do not award this mark if: any selected titre is not within 0.20 cm selected titre; the rough titre was used to calculate the m the candidate carried out only 1 accurate to burette readings were incorrectly subtract of the accurate titre values.	nean; titration;		
		Note: the candidate's mean will sometime correct even if it is different from the mea the Examiner for the purpose of assessing	an calculated b		[1]
2 (c) (i)	PDO Display	Working shown; mass/106 is minimum rec	quired.	1	
	ACE Interpretation	Candidate's mass of sodium carbonate 106 × 10 Answer correctly calculated to 3 to 4 sf. Allow ecf for transcription error in mass or not if volume included.	incorrect <i>M</i> _r b	1 ut	
(ii)	ACE Conclusions	Correct use of 2.		1	
	ACE Interpretation		×1000 b)	1	
(iii)	ACE Conclusions	Ecf possible for no 2 or incorrect use of 2. Expression or correct answer to (c)(ii) × 2 if 20 not shown). Penalise incorrect sf only once.	20 (3 to 4 sf on	ly 1	[5]

			FA 4 is CuC <i>l</i> ₂ ((aq); FA 5 is KMnO ₄ (aq); FA 6 is MnSO ₄ (aq); FA 7 is MnO ₂ .	1	1
3	(a)	(i)	MMO Collection	Solution / FA 4 / liquid goes from blue to green or green- yellow / yellow-green.	1	
				(Pale) blue precipitate formed AND dissolves to dark / royal blue solution (not dark / deep blue ppt).	1	
				White precipitate.	1	
				Brown / qualified brown / precipitate / solution (not red- brown or orange) AND goes blue-black or dark blue or black (solution or solid).	1	
		(ii)	ACE Conclusions	FA 4 is copper(II) chloride (one piece of evidence needed for Cu^{2^+} and Ag^+ test for $C\overline{\Gamma}$).	1	
		(iii)	ACE Conclusions	lodide was oxidised (to iodine)/ KI oxidised to iodine / iodine was formed with evidence / KI oxidised needs evidence of iodine. (not iodide is a reducing agent)	1	[6]
	(b) (i)	(i)	MMO Collection	Solution / FeSO ₄ / liquid goes from green to yellow / green to colourless / stays colourless (not no change). Solution / FA 5 / liquid goes from purple to colourless / purple to yellow. (penalise no solution or initial colour only once in (a)(i) and (b)(i))	1	
				Buff / off-white / light brown / beige precipitate.	1	
				Goes brown / goes darker brown / black and bubbles / fizzing / (it/gas) relights glowing splint.	1	
				White precipitate AND insoluble in dilute acid.	1	
			MMO Decisions	Fizzing/bubbles/effervescence and relights a glowing splint (or gas test in point above).	1	
		(ii)	ACE Conclusions	Conclusion: FA 6 is manganese(II) (needs II) (with obs to	1	
			Conclusions	show some evidence) sulfate (with obs to show some evidence).	1	
				Uses NaOH(aq) or NH ₃ (aq).	1	
		(iii)	MMO Decisions	Red-brown / orange-brown / dark brown / rust precipitate formed (not red).	1
