## MARK SCHEME for the October/November 2013 series

## 9701 CHEMISTRY

9701/22

Paper 2 (AS Structured Questions), maximum raw mark 60

MMM. Hiremepapers.com

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Page 2	Mark Scheme	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2013	9701	22

1 (a)

number of bond pairs	number of lone pairs	shape of molecule	formula of a molecule with this shape
3	0	trigonal planar	$BH_3$
4	0	tetrahedral	CH₄ allow other Group IV hydrides
3	1	pyramidal <b>or</b> trigonal pyramidal	NH₃ allow other Group V hydrides
2	2	non-linear <b>or</b> bent <b>or</b> V-shaped	H₂O allow other Group VI hydrides

1 mark for each correct row

(3 × 1) [3]

(b) (i)

(ii)	octahedral <b>or</b> square-based bipyramid	(1)	
(iii)	90°	(1)	[3]

[Total: 6]
