**Mark Scheme for June 2016**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

## Annotations

Annotation	Meaning
	Blank Page – this annotation must be used on all blank pages within an answer booklet (structured or unstructured) and on each page of an additional object where there is no candidate response.
	Benefit of doubt given
	Contradiction
	Incorrect response
	Error carried forward
	Ignore
	Not answered question
	Benefit of doubt not given
	Power of 10 error
	Omission mark
	Rounding error
	Error in number of significant figures
	Correct response

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

<b>Annotation</b>	<b>Meaning</b>
<b>DO NOT ALLOW</b>	Answers which are not worthy of credit
<b>IGNORE</b>	Statements which are irrelevant
<b>ALLOW</b>	Answers that can be accepted
( )	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
<b>ECF</b>	Error carried forward
<b>AW</b>	Alternative wording
<b>ORA</b>	Or reverse argument

The following questions should be marked using **ALL** appropriate annotations to show where marks have been awarded in the body of the text:

**1(b)(iii),**  
**2(c), 2(d), 2e(ii),**  
**3(a)(i), 3(b)(ii), 3(c)(ii),**  
**4(b), 4(c)(i), 4(c)(ii)**  
**5(b), 5(e)**  
**7(a), 7b(i), 7b(ii)**

**All questions where an ECF has been applied.**

## Checking additional pages

**All** the Additional Pages in the examination script must be checked to see if any candidates include any answers.

When you open question **1(a)** you will see a view of page 24 one of the Additional Pages.  
If the page is blank then, using the marking mode, annotate the page with the BP annotation  
You may need to contact your Team Leader if you do not know how to do this.

## Generic comments

**ORGANIC STRUCTURES**

For a 'structure' or 'structural formula',

**ALLOW** correct structural **OR** displayed **OR** skeletal formula **OR** mixture of the above (as long as unambiguous)

For an alkyl group shown within a structure,

**ALLOW** bond drawn to C or H,

e.g. **ALLOW** CH<sub>3</sub>–, CH<sub>2</sub>–, C<sub>3</sub>H<sub>7</sub>–, etc

**ALLOW** vertical 'bond' to any part of an alkyl group

For an OH group shown within a structure,

**DO NOT ALLOW** formula with horizontal —HO **OR** OH —

**ALLOW** vertical 'bond' to any part of the OH group

For a CHO group shown within a structure,

**DO NOT ALLOW** COH

For a 3D structure,

<ul style="list-style-type: none"> <li>For bond in the plane of paper, a solid line is expected:</li> </ul>	
<ul style="list-style-type: none"> <li>For bond out of plane of paper, a solid wedge is expected:</li> </ul>	
<ul style="list-style-type: none"> <li>For bond into plane of paper, <b>ALLOW</b>:</li> </ul>	
<ul style="list-style-type: none"> <li><b>ALLOW</b> a hollow wedge for 'in bond' <b>OR</b> an 'out bond', provided it is different from the other in or out wedge e.g.:</li> </ul>	

**NAMES**

Names including alkyl groups:

**ALLOW** alkanyl, e.g. ethanyl (i.e. **IGNORE** 'an')

**DO NOT ALLOW** alkol, e.g. ethol (ie 'an' is essential)

Names of esters:

Two words are expected, e.g. ethyl ethanoate

**ALLOW** one word, e.g. ethylethanoate

Names with multiple numbers and hyphens:

Use of 'e'

**ALLOW** superfluous 'e', e.g. propane-1-ol ('e' is kept if followed by consonant)

**ALLOW** absence of 'e', e.g. propan-1,2-diol ('e' is omitted if followed by vowel)

Hyphens separate name from numbers:

**ALLOW** absence of hyphens, e.g. propane 1,2 diol

Multiple locant numbers must be clearly separated:

**ALLOW** full stops: e.g. 1.2 OR spaces: 1 2

**DO NOT ALLOW** e.g. 12

Locant numbers in formula must be correct

**DO NOT ALLOW** propan-3-ol

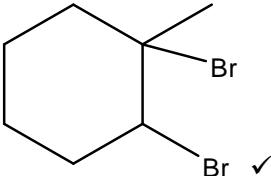

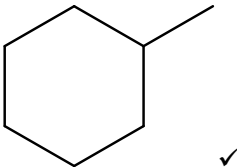

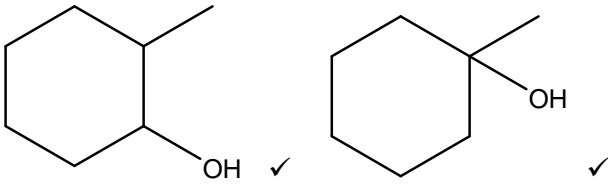

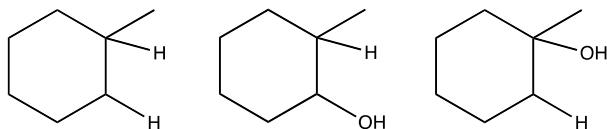

Order of substituents should be alphabetical:

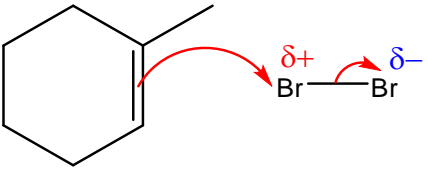

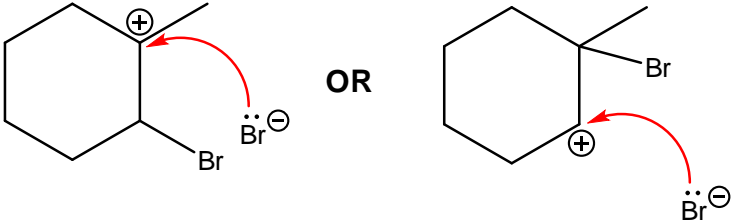

**ALLOW** any order (as long as unambiguous), e.g. 2-chloro-3-bromobutane

**ABBREVIATIONS**

van der Waal's forces

**ALLOW** vdw forces **OR** VDW forces (and any combination of upper and lower cases)
