## Introduction

This vocabulary list is required for AS Unit F371: Classical Greek Language.
In addition to the words printed in the list, candidates will be expected to be familiar with the following forms:

- principal parts of verbs contained in the list
- $\quad$ very obvious formations from words in the DVL (e.g. ßaбı $\lambda \in u ́ \omega$ from $\beta a \sigma \iota \lambda \epsilon u ́ s)$
- negative adjectives with $\alpha$ - privativev
- all regular adverbs formed from the listed adjectives and prepositions
- comparative and superlative forms of all listed adjectives and corresponding adverbs
- єỉkобь; є́катóv; Xí入ıoı; the use of the suffixes
-коута, -кобьоь, and -хı入ıot
- commonly occurring proper nouns of obvious formation (e.g. Kópı $\nu \theta$ os)
- compound verbs where the prefix does not change the root meaning (e.g. єió́pxoual).
- euphonic changes of consonants in prepositional phrases and compound verbs, e.g. $\mu \in \theta^{\prime} \in \dot{\epsilon} \mu o \hat{v}, \dot{\epsilon} \mu \pi i ́ \pi \tau \omega$.

Teachers must check the Accidence and Syntax in Appendix C1 of the OCR GCE Classics Specification. Any vocabulary listed in this Appendix must be known (e.g. cardinal and ordinal numbers).

All other words in an unseen will be glossed, unless they have obvious English derivatives (e.g. $\alpha \sigma \tau \rho o \lambda o \gamma i ́ \alpha)$.
