Monday 13 May 2019

Afternoon (Time: 2 hours)

Paper Reference **8DT0/01**

Design and Technology
(Product Design)
Advanced Subsidiary
Component 1

You must have:
a calculator and a ruler.

Total Marks

Instructions

- Use **black** ink or ball-point pen (HB pencil may be used for questions that require drawing or sketching).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- For questions requiring mathematics, you must **show all your working out** with **your answer clearly identified** at the **end of your solution**.

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

1/1/1/1/1/1/1/1/1/1/1

Pearson

Answer ALL questions. Write your answers in the spaces provided.

1 An understanding of material properties is essential for designers.

(a) Explain the meaning of the term elasticity.

(2)

.....

.....

.....

(c) The paper punch contains high carbon steel springs that have been hardened and tempered.

Describe the process of tempering high carbon steel.

(2)

.....

.....

.....

.....

.....

(Total for Question 1 = 8 marks)

2 Figure 2 shows a calculator. The body of the calculator has been made using injection moulding.

Figure 2

(a) Describe the process of injection moulding.

Start your description after the hopper has been filled with polymer granules and finish it at the point of the moulding being ejected.

(6)

A series of horizontal dotted lines provided for writing the answer to the question.

(b) Figure 3 shows a simplified image of one of the plastic buttons on the calculator.

Diagram not to scale

All dimensions are shown in millimetres

Figure 3

Calculate the volume of material that would be needed in order to injection mould one button. Ignore any moulding runners.

Give your answer correct to two significant figures.

Show all of your workings.

(6)

Answer

(c) The screen on the calculator is a liquid crystal display (LCD).

Explain **three** characteristics of LCDs that make them suitable for use in calculators.

3 Figure 4 shows a desk manufactured from laminated chipboard.

Figure 4

One reason laminated chipboard was selected in preference to solid wood for the desk is that it is a more stable material.

(a) Explain **one** reason why chipboard is a more stable material than solid wood.

(2)

.....

.....

.....

.....

(b) The steel handles on the desk drawers have been electro-plated with brass.

Explain **two** reasons why the handles would be electro-plated with brass.

(4)

1

.....

.....

.....

2

.....

.....

.....

(c) The desk has been designed with knock-down fittings for self-assembly by the customer.

Explain **three** reasons why it is cheaper for the manufacturer to supply self-assembly rather than pre-assembled furniture.

QUESTION 4 BEGINS ON THE NEXT PAGE.

4 Figure 5 shows a component and a dimensioned drawing of one of its legs.

All dimensions are shown in millimetres

Figure 5

The leg is to be made from a length of steel strip that is 48mm wide.

(a) A steel rule and scribe could be used to mark out the leg.

Name **two** further marking out tools that could be used to mark out the centre point of the radius.

On the 5mm grid below, construct a 1:3 scale drawing of the net of the packaging.

Locate corner A at the point indicated on the grid.

Ignore the thickness of the card.

(9)

(Total for Question 4 = 19 marks)

5 Figure 8 shows a garden strimmer and an enlarged view of its handle.

Figure 8

- (a) One example of how anthropometrics has influenced the design of this handle can be seen in the length of the two hand hold positions. These lengths have been influenced by the width of the human hand.

Outline how other features of the strimmer handle have been influenced by anthropometrics.

(Total for Question 7 = 8 marks)

8 Figure 10 shows two desk lamps, one made from acrylonitrile butadiene styrene (ABS) and the other from brass. Three specification points for the lamps are also shown.

Figure 10

	ABS lamp	Brass lamp
1. Light source	Multi LED array	Single incandescent bulb
2. Light controls	On/off and dimmer touch controls embedded into the top surface of the base	On/off switch on the rear of base (Not visible)
3. Stem adjustment	Goose neck flexible stem	Screw locking stem joints

Evaluate which of the two desk lamps best meets the user requirements of illuminating a study desk in the home environment.
