

Mark Scheme (Results)

January 2014

Pearson Edexcel International Advanced Level (IAL) Economics (WEC03) Unit 3

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded.
 Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Section A: Essay questions
NB: Use levels based mark scheme (20 marks) to mark this section.

| Question Number | Answer | Mark |
|--------------------|--|------|
| 1 | Indicative content Explanation of the benefits of growth, may include: Economies of scale (discussion of different types of EoS is valid) Increased market share gives more price making power Risk diversification | |
| | Behavioural motives - managers may want to expand as part of 'empire building' Achieve monopsony power over suppliers Evaluation | |
| | Firms may wish to stay small to: Avoid diseconomies of scale (particularly in industries with a low MES) Take advantage of a niche market (price inelastic demand / income elastic demand) Maintain high levels of flexibility/innovation Avoid attention, either from regulators or takeover bids Some firms may not be able to access the finance necessary to grow Behavioural motives - family firms / wish to maintain control etc. | (20) |

| Question | Answer | Mark |
|----------|---|------|
| Number | | |
| 2 | Indicative content Definition of perfect competition – conditions of model – large number of buyers & sellers, perfect information, identical product, no barriers to entry & exit. Resulting firms being price takers – hence perfectly elastic demand Use of diagram, showing SR and LR equilibria under perfect competition | |
| | Explanation of different types of efficiency, including productive and allocative efficiency Identification that perfect competition produces allocative efficiency in the SR and LR, as P=MC in both equilibria may be shown on the diagram, proved from the model's assumptions, or equivalent verbal analysis Identification that perfect competition produces productive efficiency only in the LR (MC=AC), as in the SR equilibrium, MC>AC if firm is making SNP, and MC <ac a="" absence="" are="" be="" case<="" economies="" experienced.="" explanation="" extent="" firm="" if="" in="" is="" loss.="" making="" may="" of="" scale="" td="" terms="" the="" this="" to="" which="" why="" with="" x-inefficiency=""><td></td></ac> | |

| Question | Answer | Mark |
|----------|--|------|
| Number | | |
| 2 | Evaluation | |
| (contd) | Inability to fully exploit economies of scale in the case of a natural monopoly / industry with high MES implies a lack of productive efficiency Absence of productive efficiency in the SR Absence of SNP in LR implies low levels of R&D and hence lack of dynamic efficiency (static vs. dynamic efficiency trade-off) Possible lack of social efficiency (MSC=MSB) due to presence of externalities Overall judgement as to whether efficiency is maximised | |
| | under perfect competition, with reasoning | (20) |

| Question Number | Answer | Mark |
|--------------------|---|------|
| 3 | Indicative content | |
| | Definition of monopsony | |
| | Benefits of monopsony may include: For consumers - • Improved value for money (increased consumer surplus) for final consumers if reduced costs are passed on by the monopsonist • This increased profit may be invested into the firm to produce better products in the future For businesses – • Lower purchasing costs – higher profit margins | |
| | Greater market share if result is lower prices to consumers | |
| | Counterbalancing force in the presence of monopoly power Increased producer surplus, and profit for the monopsonist | |
| | NB candidates must consider benefits to both consumers and firms (monopsonist or supplier). | |

| Question | Answer | Mark |
|--------------|---|------|
| Number | | |
| 3 (contd) | Evaluation Candidates may evaluate either in terms of considering the costs of monopsony to consumers and businesses, or by considering the significance of their arguments. | |
| | Costs of monopsony may include: For both consumers and businesses - • Lower prices paid will lead to less being supplied to the monopsonist, which may constrain supply • May result in more regulation for the monopsonist • Less profit for supplier may result in less investment meaning a lower quality product For businesses - • May be difficult for small suppliers to make profit / stay in business • Poor relationship with supplier may lead to poorer quality • Loss of reputation for buyer and seller | |
| | General evaluation points may include: Prioritisation of factors Overall judgement as to whether the costs or benefits are greater It depends on whether the monopsonist passes on the benefits in the form of lower prices / higher investment It depends on the market, e.g. is there also a monopoly, objectives of the monopsony etc. Role of PES in determining effect on supply to the | |
| | prices / higher investment It depends on the market, e.g. is there also a monopoly, objectives of the monopsony etc. | (2 |

| Answer | Mark |
|--|---|
| Indicative content | |
| | |
| Definition of contestability – very low (if any) | |
| barriers to entry or exit | |
| Explanation of how the level of contestability affects firms' behaviour. For example: • Firms will need to be more competitive – price, quality etc. • Firms will need to be more efficient – productive, allocative • Even monopolists may make normal profit only if a market is perfectly contestable (may contrast profit maximising and normal profit equilibria on a diagram) • Incentive to avoid hit-and-run entry - explanation of hit-and-run entry, and possible methods to discourage it, e.g. erecting barriers to entry and/or exit • Attempts to raise artificial barriers to entry, e.g. limit pricing, advertising to encourage more brand loyalty, operating with spare capacity etc. • Attempts to raise artificial barriers to exit, i.e. an increase in sunk costs • Decision whether to focus on price competition or non-price competition. Allow consideration of predatory pricing. A focus on non-price competition may make demand for firm's produce more price inelastic, making firm's revenue less vulnerable to new entrants who may under-cut the incumbent • Objectives: with high levels of contestability, firms may have to profitmaximise to make normal profit in the LR, but with lower levels of contestability other objectives are possible | |
| | |
| | Indicative content Definition of contestability – very low (if any) barriers to entry or exit Explanation of how the level of contestability affects firms' behaviour. For example: • Firms will need to be more competitive – price, quality etc. • Firms will need to be more efficient – productive, allocative • Even monopolists may make normal profit only if a market is perfectly contestable (may contrast profit maximising and normal profit equilibria on a diagram) • Incentive to avoid hit-and-run entry - explanation of hit-and-run entry, and possible methods to discourage it, e.g. erecting barriers to entry and/or exit • Attempts to raise artificial barriers to entry, e.g. limit pricing, advertising to encourage more brand loyalty, operating with spare capacity etc. • Attempts to raise artificial barriers to exit, i.e. an increase in sunk costs • Decision whether to focus on price competition or non-price competition. | Question | Answer | Mark |
|----------|--|------|
| Number | | |
| 4 | Evaluation | |
| (contd) | | |
| | Prioritisation of effects | |
| | SR/LR distinction e.g predatory pricing in | |
| | the short run | |
| | Consideration of the degree of | |
| | contestability (are any markets perfectly | |
| | contestable?) | |
| | The effect of government | |
| | intervention/regulation of the market | (20) |

| Section A Questions: Performance Criteria for Mark base 20 | | | |
|--|------|--|--|
| Level 0 | 0 | No rewardable material | |
| Level 1 | 1-4 | Displays knowledge presented as facts without awareness of | |
| | | other viewpoints | |
| | | Demonstrates limited understanding with little or no analysis | |
| | | Attempts at selecting and applying different economic ideas | |
| | | are unsuccessful | |
| | | Material presented is often irrelevant and lacks organisation. | |
| | | Frequent punctuation and/or grammar errors are likely to be | |
| | | present and the writing is generally unclear. | |
| Level 2 | 5-8 | Displays elementary knowledge of well learnt economic facts | |
| | | showing a generalised understanding together with limited | |
| | | analysis i.e. identification of points or a very limited | |
| | | discussion | |
| | | Displays a limited ability to select and apply different | |
| | | economic ideas | |
| | | Material presented has a basic relevance but lacks | |
| | | organisation, but is generally comprehensible. Frequent | |
| | | punctuation and/or grammar errors are likely to be present | |
| Level 3 | 9-12 | which affects the clarity and coherence of the writing overall. | |
| Level 3 | 9-12 | Displays knowledge and understanding of economic principles, concepts and theories as well as some analysis of | |
| | | issues i.e. answer might lack sufficient breadth and depth to | |
| | | be worthy of a higher mark | |
| | | Shows some ability to apply economic ideas and relate them | |
| | | to economic problems | |
| | | Employs different approaches to reach conclusions | |
| | | Material is presented with some relevance but there are likely | |
| | | to be passages which lack proper organisation. Punctuation | |
| | | and/or grammar errors are likely to be present which affect | |
| | | the clarity and coherence. | |
| Level 4 | 13- | Displays a good knowledge of economic principles, concepts | |
| | 16 | and theories together with an analysis of the issues involved | |
| | | Demonstrates an ability to select and apply economic ideas | |
| | | and to relate them to economic problems | |
| | | Evidence of some evaluation of alternative approaches leading to some leading | |
| | | to conclusionsMaterial is presented in a generally relevant and logical way, | |
| | | Material is presented in a generally relevant and logical way, but this may not be sustained throughout. Some punctuation | |
| | | and/or grammar errors may be found which cause some | |
| | | passages to lack clarity or coherence. | |
| Level 5 | 17- | Displays a wide range of knowledge of economic principles, | |
| | 20 | concepts and theories together with a rigorous analysis of | |
| | | issues | |
| | | Demonstrates an outstanding ability to select and apply | |
| | | economic ideas to economic problems | |
| | | Evaluation is well balanced and critical leading to valid | |
| | | conclusions | |
| | | Material is presented in a relevant and logical way. Some | |
| | | punctuation and/or grammar errors may be found, but the | |
| | | writing has overall clarity and coherence. | |

Section B: Data response

| Question | Answer | Mark |
|----------|--|------|
| Number | | |
| 5(a) | Knowledge and Application (up to 4 marks) K = Definition of unit labour costs —labour cost/output or similar definition (2 marks for accurate definition) | |
| | Identification that unit labour costs have risen (1) As labour costs rose at a faster rate (6.2%) (1) than labour productivity (4.5%) (1) | |
| | Also accept: <u>Relative</u> (to OECD average) unit labour costs decreased (1) with correct data use (2) | |
| | | (4) |

| Question | | | Mark | | | |
|-----------|------------|--|--------|--|--|--|
| 5(b) | | | (12) | | | |
| Knowledge | e, Applica | ation and Analysis – Indicative content | | | | |
| | An unde | erstanding/definition of international competitiveness | | | | |
| | - the de | egree to which a country's products are | | | | |
| | attracti | ve/demanded in the global marketplace | | | | |
| | | has become more internationally competitive: | | | | |
| | | Over the period 2000-2011, Korea displayed the | | | | |
| | | trongest growth in labour productivity of any OECD | | | | |
| | | ountry. This has limited the rise in production costs, | | | | |
| | | elping to maintain international price | | | | |
| | | ompetitiveness (to some extent = evaluation). | | | | |
| | | • | | | | |
| | | Relative ULCs fell in Korea over the period 2000- | | | | |
| | | 2011, so the country's exports may have become | | | | |
| | | elatively cheaper | | | | |
| | | xport prices have generally fallen since late 2008 – | | | | |
| | | nore competitive in overseas markets | | | | |
| | | nvestment rates have generally been stronger than | | | | |
| | t | the OECD average, helping to encourage price (more | | | | |
| | е | efficient production methods) and non-price (higher | | | | |
| | C | quality etc. products) competitiveness | | | | |
| | • K | Korea has the highest proportion of young adults (25- | | | | |
| | 3 | 34 year-olds) with tertiary attainment of all the OECD | | | | |
| | С | countries. Higher level of human capital would be | | | | |
| | е | expected to increase both international price and | | | | |
| | n | non-price competitiveness, as products become | | | | |
| | h | nigher quality/more innovative etc. | | | | |
| | | The effects of liberalisation of the economy | | | | |
| Level | Marks | Descriptor | | | | |
| 0 | 0 | A completely inaccurate response. | | | | |
| 1 | 1-3 | Shows some awareness of the concept of internation | ıal | | | |
| | | competitiveness. | | | | |
| | | Material presented is often irrelevant and lacks | | | | |
| | | organisation. Frequent punctuation and/or grammar | errors | | | |
| | | are likely to be present and the writing is generally | | | | |
| 2 | A / | unclear. | | | | |
| 2 | 4-6 | Understanding of the concept of international competitiveness, with some application to context. | | | | |
| | | Material is presented with some relevance but there | are | | | |
| | | likely to be passages which lack proper organisation. | | | | |
| | | Punctuation and/or grammar errors are likely to be | | | | |
| | | which affect the clarity and coherence. | | | | |
| 3 | 7-8 | Clear understanding of the concept of international | | | | |
| | | competitiveness with effective application to context | | | | |
| | | Material is presented in a relevant and logical way. S | | | | |
| | | punctuation and/or grammar errors may be found, b | ut the | | | |
| | | writing has overall clarity and coherence. | | | | |

| Evaluation – Indicative content | | | | | | |
|---------------------------------|----------|--|--|--|--|--|
| | Korea h | Korea has not become more internationally competitive - | | | | |
| | • L | Labour productivity is still below the OECD average | | | | |
| | • L | abour costs rose at a quicker rate than the OECD | | | | |
| | а | average over the period 2000-2011 | | | | |
| | • E | Export price generally higher 2008-2012 than 2002- | | | | |
| | 2 | 008 | | | | |
| | Other in | r information would be needed to make a full | | | | |
| | judgem | ent, e.g. relative export prices, relative tax rates | | | | |
| | etc. | | | | | |
| Level | Marks | Descriptor | | | | |
| 0 | 0 | No evaluative comments. | | | | |
| 1 | 1-2 | For identifying evaluative comments without explanation. | | | | |
