2.

Pine Villa is a nursing home for elderly people. All 40 service users living in the nursing home are female of mixed ethnicity. Many have always lived in relative poverty. Ten care practitioners work at Pine Villa. They are all white British females. The manager of Pine Villa believes that there are good care relationships between the care practitioners and the service users. However, some of the service users feel that stereotyping occurs and that their needs are not catered for.

(a) Good care relationships involve staff implementing the 'care value base'.

(i) Explain what is meant by the 'care value base'.

.....  
.....  
.....  
.....

(2)

(ii) Describe **two** ways in which the care practitioners could empower the service users at Pine Villa.

3.

Springfields is a large rehabilitation centre for people who are alcoholics.

The table shows the current number of service users and care workers, by age and sex.

Age range	Service users		Care workers	
	Male	Female	Male	Female
18–25	2	2	0	1
26–45	16	9	3	10
46–65	18	4	1	5
Over 65	8	1	0	0
<b>Total</b>	<b>44</b>	<b>16</b>	<b>4</b>	<b>16</b>

(a) Describe how the number of service users of the rehabilitation centre varies with age.

.....

.....

.....

.....

.....

(2)

(b) Most of the care workers at the rehabilitation centre are female.

(i) Using the information in the table, describe the difference between the ratio of male care workers to male service users and the ratio of female care workers to female service users.

.....

.....

.....

.....
