

A Level (including AS Level) Mathematics (9709), AS Level Higher Mathematics (8719), AICE (Half Credit) Mathematics: Statistics (0390)

When were the last examinations of the old A Level, Advanced Supplementary and AICE syllabuses?

The final examination for A Level syllabus (9202) was in November 2001. The final examination for Advanced Supplementary syllabus (8488) was in June 2001. The final examinations for AICE Mathematics (0112), AICE Further Mathematics (0111) and AICE (Half Credit) Mathematics: Statistics (0137) were in November 2001.

When are the new syllabuses available?

The new AS Mathematics syllabus (with syllabus code 8709) was first examined in June 2001. AS Mathematics uses the same syllabus code as the A Level (9709) from 2002 onwards. The new A Level Mathematics (9709), AS Higher Mathematics (8719) and AICE (Half Credit) Mathematics: Statistics (0390) syllabuses were first examined in June 2002. The examinations for all these syllabuses are available in June and November.

What support materials are available?

Syllabus;

Specimen Question Papers and Mark Schemes;

Syllabus Support Materials : Standards booklet for A Level Mathematics/AS Mathematics/AS Higher Mathematics/ AICE (Half Credit) Mathematics: Statistics. This contains background information, commentaries on questions and mark schemes, a section outlining the changes to the A Level syllabus and additional specimen questions on Vectors, Complex Numbers and Continuous Random Variables;

Past question papers will be available following each examination session.

All the above are available from CIE Publications.

Is it possible to enter candidates for a single paper or for three papers in an examination session?

It is only possible to enter candidates at each examination session for the options corresponding to the combinations of components given on page 4 of the AS/A Level syllabus booklet. Candidates for AS Mathematics or AS Higher Mathematics must be entered for 2 papers. Candidates for A Level Mathematics must be entered for 4 papers, of which 2 (either 1+4 or 1+6) may have been taken at an earlier session (within 13 months). Only candidates entered for AICE (Half Credit) Mathematics: Statistics take a single paper.

Which list of formulae do candidates use for the new AS/A Level and AICE (Half Credit) examinations?

Candidates for the new AS/A Level and AICE (Half Credit) examination use the List of Formulae and Tables of the Normal Distribution (MF9), the content of which appears on pages 19 to 23 of the syllabus booklet. The MF9 list is sent out to Centres as needed in a stationery despatch prior to the examination.

Can an AS award via units P1 + P2 be carried forward to an A Level award?

It is only possible to carry forward a full AS award via P1 + M1 (components 1+4) or P1 + S1 (components 1+6) to A Level (see page 4 of the syllabus booklet). Since unit P2 (component 2) is not part of any valid combination of A Level components, it is not possible to carry forward an AS award via option P1 + P2 (components 1+2) to an A Level award. Candidates entered for an AS award via P1 + P2 will need to take a complete set of 4 units for an A Level qualification.

What calculators can be used in the new AS/A Level and AICE (Half Credit) examinations?

It is expected that candidates will have a calculator with standard 'scientific' functions for use in the examination. Computers, and calculators capable of algebraic manipulation, are not permitted. Calculators must satisfy the regulations in the CIE Handbook for Centres, so calculators with a graphic display are prohibited.
