Pearson Edexcel International Advanced Level In History(WHIO2) Paper 1B

# **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at <u>www.edexcel.com</u> or <u>www.btec.co.uk</u>. Alternatively, you can get in touch with us using the details on our contact us page at <u>www.edexcel.com/contactus</u>.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

# Examiner Report: WHIO2 1B China, 1900-76

## **Introduction**

It was pleasing after the disruption of the pandemic to see a range of well-informed and well-written responses from candidates on IAS Paper WHI02 1B which covers China, 1900-76. The paper is divided into two sections. Section A contains a compulsory two-part question for the option studied, each part based on one source. It assesses source analysis and evaluation skills (AO2). Section B comprises a choice of essays that assess understanding of the period in depth (AO1) by targeting five second order concepts - cause, consequence, change/ continuity, similarity/difference and significance.

In common with previous series, candidates found Section A more challenging than Section B. Some candidates were still not clear on what was meant by 'value' and 'weight' in the context of source analysis and evaluation. Performance in Section A was also affected by the absence of the detailed knowledge base required to add contextual material to support/challenge points derived from the sources. Most candidates did use their time effectively and, although a few responses were quite brief, there was little evidence on this paper of candidates having insufficient time to answer questions both sections. The ability range was diverse, but the design of the paper allowed all abilities to be catered for. Furthermore, in Section B, most responses had an analytical focus and there were very fewer that were wholly descriptive essays which were devoid of analysis and, for the most part, responses were soundly structured. The most common weakness in Section B essays was the lack of a sharp focus on the precise terms of the question and/or the second order concept that was targeted. This meant that some candidates wrote at length on topics that were only peripherally related to the question or which did not cover the whole time period.

It remains important to realise that Section A topics are drawn from highlighted topics on the specification whereas Section B questions may be set from any part of any Key Topic, and, as a result, full coverage of the specification is enormously important. There was little evidence on this paper of candidates having insufficient time to answer questions from Sections A and B.

The candidates' performance on individual questions is considered in the next section.

# Question 1a)

The majority of candidates produced answers that achieved at good level 2 and into level 3. Most candidates understood the question and were able to comprehend the source and comment on what it revealed about the impact of the Cultural Revolution on education. Candidates were able to draw out valid inferences from the source evidence, including the evidence of the need to embed communist ideas in the education system and the changed focus of the system. The best answers developed the inferences with well-selected context to establish their validity. Candidates would do well to remember that contextual knowledge does need to be used to explain and develop the inferences drawn from the source and not just to provide free-standing knowledge. Some candidates

approached the question by focusing entirely on aspects of the provenance. While this was effective in addressing bullet point 3 of the mark scheme, it meant that candidates did not engage with the content of the source and were unable to draw out inferences. Candidates need to remember that they must consider value in the light of the content and their contextual knowledge as well as the provenance of the source. Those candidates who discussed the limitations could not be rewarded for that part of their answer as it is not the focus of part a responses.

**F** SECTION A Answer ALL questions. Write your answers in the spaces provided. Study Source 1 in the Sources Booklet before you answer this question. 1 (a) Why is Source 1 valuable to the historian for an enquiry into the impact of the Cultural Revolution on education? Explain your answer using the source, the information given about it and your own knowledge of the historical context. (10)Some 1 is wal able to the historia for an erguing cuto the input of the cultural nevol Lan terms of origen, the bion yohac uns Central Committee of se 1966 t Sth Ca 2002 ocem 00 plang all loacter the. & occorage the removal of the influence of the "langeais" from the education system and instered enconcy the yorth of this to first in a way more mited to Mas's principles and vincen, this is alroappoint in the gorte: "alch principas and methods of teaching ". Mac writed to practicalize education system and teres the youth of China things like "inclusted work, forming and militing affairs ". This was appoint in his polic is the five year plans and the cultural revolution it was especially apoint is the cultured revolution as illas wanted to build and maintain a strong workforce in urba and rural areas to teether the inclustry and centime to improve weffere and groductivity in the more reval areas of China. The whole propose of the Culturel Revolution was by modernice china in terms of thisking and the ustons people une weet to, Adlas did not like the Terfluence of the Soviet Union loving so approvit because of changing relations lecturen the two powers arelley encouraging eclication charges he would effectively achieve this To tens of context, this some has alot of good ifountion on the culturel revolutionin terms of

oducation 1 abor has īA School

This is a level 3 response. It begins with level 3 evaluation. It shows contextual understanding although that is not used to develop inferences and hence achieves level 2 in bullet point 2. It draws out an inference on indoctrination in the final paragraph and hence achieves level 3 in bullet point 1.

# Question 1 (b)

Candidates understood the source material and were able to select from it to develop some inferences about the emergence of Mao as leader of the Communists on the Long March. Most candidates achieved in level 3 and level 4. There were some effective answers that weighed up the strengths and limitations of the source and used this as a basis to reach a judgement about the weight that should be attached to the source for the enquiry. Many candidates made effective comments about the nature of the source as a potential source of propaganda, written by one of Mao's followers and confidants on the March and published during the Cultural Revolution. However, many candidates still approach the consideration of weight by writing about adding and

subtracting weight rather than considering the strengths and weaknesses of the source material and then reaching a judgement about the weight that the source would bear in an enquiry. There was continuing trend this summer for some candidates to use the structure of the generic mark scheme to write their answer. Whilst this meant that they addressed all three bullet points, it did mean that they did not integrate the ideas in their answer so that, in particular, knowledge was free standing and not used to develop and explain inferences. This technique would be best avoided for candidates who wish to access the higher levels of the mark scheme.

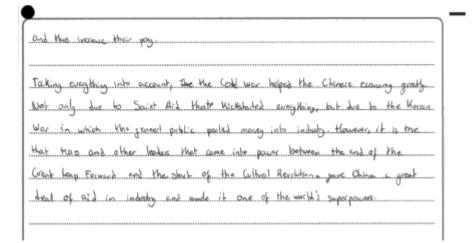

Indicate which question you are answering by marking a cross in the box 🗵. If you change your mind, put a line through the box 🗟 and then indicate your new question with a cross 🗟.
Chosen question number: Question 2 🖾 Question 3 🖾 Question 4 🕅
The Cold war was the unafficial conflict between the USA and the USLA after
WW2 for control over the world. They were the world superpower at the time, sai
fought in R programment and other trying to indell governments forwable to
that them throught the world. After the end of the Scool Civil War in China in
1949, the top use use deeply annied that a carring the size of china had faller to
the Comownists.
Firstly right affor the up, thus bould to those in order to get support from
the USSR to rebuild china's company, they were in a state of choos after
nearly helf & half a combry of quai-contat choos and war. They were, in fact,
given support in the form of experts that set up inhuby in Communist Chine,
helping then prosper. These respects were able to choose prime toutions to build
factories that boosted the economy, and had an egger workforce at their hisposal.
Mauever, Mao achieved a good doal without Soviet help. He realised that the
Soviet model was beard on induty, while he believed it was the powerts that
should build the country. The introduction of communes greatly helped the industry
to beam. Most of the populations very of life time imposed, and this was proj
Lie le Maois (docs:
Secondly, not only did the Saviets let send count expects, but they also loaned
many and let Chinese scientist and students go into R the USSE to forther their.

goels. This cally bes backed the economy as factory managed wave now Chinese boo and could better somewaise to with the suscience insted of the monoger being Somict:

On the other hand, the First Five Yoar Plan from 1952 to 1957, was parely Marin breinchild. He set togets for production in industry, which and each region was given a quala Factorica where given one too, and people land to report up the chain the results. Although 2 and of them where infibited to further plans Mar, it is true that and, some, income and other industrial goods doubled three preduction during it, with serve even tripling it.

Thirdly, the Koreen war at the start of the 1950's gove Chinese which a sneall my nudge. As soan as the CCP we energed as leaders of thing, the war between the North Koron Commonwisk and the Smith Koron constable bake out. South Rosen was aided by the USA which had also added adverge Knirshek during bath field does therfore the wanted to forther his resonge for that between the Koron ach the CCP formed a prat of mutual aid, and the polychan of a worplance inclusive sid to help the Worth People devoted there solaries into the industry, giving them messive sid to set ap feetorise and produce:

In spile of this offer two stepped have due to the failere of the Great Loop Forward, the new lenders of China sided the economy greatly they gove new freedom to industry and oprioritories, resulting in small pinche connecting that evabled people to earn some income and improve the prelity of their lives. Pediatrily imposed, as hearing a primite benefit from your our 14 incentional workers to freduce more .

This is a level 4 response. It uses contextual knowledge effectively to interrogate the source and develop reasoned inferences. It demonstrates an understanding of the values and concerns of the society from which it is drawn and makes good points about the role of propaganda and the Cultural Revolution in considering the reliability of the source.

# **Question 2**

This question prompted a number of good answers. Most achieved at least level 3 and many accessed level 4. Those candidates who achieved level 4 demonstrated good knowledge that was used effectively to address the second order concept – causation. Level 4 responses reached sound judgements on the whether the warlords or an alternative reason was responsible for the weakness of government in China in the specified period. Candidates considered the role of Yuan Shi-kai, the consequences of interference by outside powers and the growing dispute between the GMD and the Communists. The most common error in answering this question was a failure to focus on the time period set. A number of candidates looked at weaknesses during the rule of the Qing dynasty. This was not relevant to the question and therefore could not be rewarded.

Indicate which question you are answering by marking a cross in the box 🗟. If you change your mind, put a line through the box 晷 and then indicate your new question with a cross 図. This is a high level 4 response. It has good focus on causation and draws out and discusses the importance of a range of reasons in weakening China in the specified period. It has very secure knowledge. The conclusion is well focused and provides a secure judgement.

# Question 3

There were very few responses to this question. The small number who addressed this question demonstrated, in the main, secure knowledge of the development of China's economy in the years 1927-37 and were able to address the work of TV Soong in some detail.

indicate which question you are answering by marking a cross in the box 🗵. If you change your mind, put a line through the box 砮 and then indicate your new question with a cross 図. Chosen question number: Question 2 Question 3 🕅 Question 4 is accurate to a certain extend to say that the It T.Y. Soong (不子文) was responsible for the Work of development the years 1927 - 37. While Soona of China's economy in ateatly the economy there were also major contributed 10 the others. were WORK ٥ť policies that Firstly, wordings in the question must be defined. T.V. Soong was the Minister of Tingance for the Republic of China under Chiang Kaishek. "Responsible for would mean he was teason for China's economic the development and that he alone that is where credit is due. An economy would refer to tinance, banking, industry and investment onything relating も alike. T.V. Soong established the Central Bank, which allowed tor government Tinan ce monitored be...<del>hequlate.d</del> To properly. Before the Knomingdang (國民黨 ) took and managed in charge of Beijing Would power, the Waterds obtain toreign loans whethever available diat for their own andgreed. This drained China's gain and treasury and increased her debt greatly. Soong sought then change TD. this by establishing a government. hould bank that

allow for government revenue to be monitored managed properly. This would kickstart an era of an economically stable China, Hence, Soong was greatly responsible for

the development of China's economy. in the years 1927-37. Next, Soong also found ways for the government to increase its revenue while also stimulating the economy and allowing the the people to become wealthick as well He reformed the tax system to accumulate more income for the government, increasing taxes for imports and demand for consumer goods. This lead to an increase ĩn local goods since imports were more expensive, allowing Chinese businessmen to earn more profits. Furthermore China's debt as services to the people Soong sold off which greatly improved her ability to pay of debt owed to foreign powers but also allowed people who bought the debts to be wealthier as well. Hence it was Soong was responsible for the development of the Chinese economy. The Chinese Finance Development Corporation can also be credited to Soong. Looking for a way to attract foreign investment while not needing to give away political power to foreign governments as the Qing () government had did, his solution was the Corporation which allowed foreign companies to collaborate with Chinese companies and businessmen on industrial projects. It was a massive success and the growth of foreign investment in China from the years #929- 1926 - 1936 rose from 30% to 70%. Soong had managed to restore China after the tumultous foreign investors' confidence in 12 

warlord era and further strengthened the Chinese economy Thus, he must be credited for the development of the Chinare economy in the years 1927-37. However, it may be argued that there were other important people who had part in this development. Multiple policies, including the Finance Development Corporation, are not credited to him chinese alone. The F Chinese Finance Development Corporation was also spearheaded by two others - Jean Monnet and Chiang Kaishek ( A Ti To), Chiang had written to the league of Nations for assistance as he and Soong planned the operations for the Corporation. This had resulted in the economic expert Monnet's arrival in China. He was experienced in helping failing economies and upon analyzing China's situation, suggested that the Corporation invite foreign companies to come collaborate with Chinese companies. While Soong was involved in the establishment of the Chinese Finance Development Corporation, it would not be possible without the involvement and help from Chiang Kaishek and Jean Monnet. Hence, he is not solely responsible for the development of the Chinese economy in the years 1927-37. Next, it should be noted that Chiang Kaishek also created many economic policies that would impact the economy greatly. To finance the total Second world war, Chiang began to print more bankhotes. 13

This had led to inflation and many people's lives Here disrupted as they could no longer afford basic commodifies. In an attempt to fix the disaster, Chiang introduced a new ourrency based on silver to stabilize the economy. This cannot be credited to T.V. Soong as he was not involved, and thus, the development of the Chinese economy in the years 1927-37 cannot be credited to him abne. Chiang was also responsible for moving many industries and factories to Chongqing. As the Kuomingdang apprennment retreated from the advancing Japanese, they decided power plants, factories and entire industries should also follow them from Manjing to Changqing. This led to industries such as textiles moving to Changqing and further down south. The Chinese economy began less and less concentrated in the north but instead became more developed in the south since this was Chiang's decision, Soong was not responsible for this development. In conclusion, So T.V. Soong had a huge part in developing and re-establishing the Chinese ecohomy in the yeaks 1927 - 37. While he cannot be fully responsible for that, as others such as Chiang Kaishek also played a part, he contributed greatly to China stabilizing the once tumuttous economy as there left the warlord era.

This is a very effective response that achieved a high level 4. It has a very secure focus on causation and the argument is supported secure knowledge.

# **Question 4**

This was the most popular essay question on the paper and prompted answers across the levels. Most candidates had some knowledge of the Cold War and its impact on China's economy, although some candidates digressed into discussing China's involvement in Korea, for example, with limited focus on the economy which is not a focus in Paper WHIO2 1B. Some candidates devoted much time to other factors that developed the economy and lost a sharp focus on the significance of the Cold War. Most candidates addressed the relationship with the Soviet Union but fewer considered the full date range and looked at the impact on the economy of developing relations with the USA in the 1970s. The best responses were carefully planned answers that had a good grasp of the developments and were able to produce a tightly focused analysis based on significance.

Indicate which guestion you are answering by marking a cross in the box 🗷. If you change your mind, put a line through the box 😤 and then indicate your new question with a cross 🗵 Question 3 Question 4 🛛 Chosen guestion number: Question 2 The Chinese economy during the years of 1949 to 1976 were greatly impacted by the cold war between The U.S. A's capitalist ideologies and the U.S.S.R's communist ideology. China had aligned themselves with the USSR and formed the sino-soviet alliance, China had been in a bockward semi-feudal state post civil war and Mao wanted to industrialize the country. Meanwhile the USSR needed communist allys and a buffer between capitalist/western supported countries and themselves. Thus the chinese adopted the successful Russian model of the 5 year plan. Under the first " WAIF on five year plan Mao set out to two legs" meaning both industry and agriculture output would increase. The USSR sent 10,000 technical advisors and \$300 million loan which was seen as insufficient by Mao however come 1956 the end of the five year plan industrial production had increased by 18% and agriculture by 3.8%, this was seen as a success which would not have

.

occurred if the soviets weren't desperate for allies. However the cold war had a negative impact upon Chinas economy due to the proty war of korea. Under the sino-soviet treaty that gave economic aid to China one stipulation was that in the event that Japan or the U.S. attacked the other country would give military aid. When the USSR asked for Mao's aid in the korean war Mao could not refuse, 800-000 lives were last alongside Mass own son but as well the Korean war cost China \$10 billion dollars of which they could not pay as men were sent to war instead of to the factories, the annual output of steel went from 15 million tonnes to 1 million tonnes. The Korean war also affected economically affected the chinese people as they were forcefully encouraged to give their wases to "Aid Korea, Resist America", leaving many too poor to by by the limited food and with the great famine of 1958-1962 30-50 million people died, with 20,000 becoming camibals, those who died could not work and the cannibals were sent to Laogais 12

.

for 'thought reform' This stunted Chings economic development to However the great leap forward (another soviet style five year plan) greatly destroyed Chinas economy which was made worse with Krushchevs denancing of Stalin and the deterioration of the sino-soviet alliance where knot knishcher pulled advisors out and abandoned helping the Chinese with their nuclear programme, how nevertheless it was the hatred towards knushchev that ud Mao to befriend the West "the energy of opened my eveny is my friend", the U.S gove trade to the communists and accepted Mao as leader over kaister through ping-pong diplomacy Pene Duhuei broke down the bamboo curtain' and is took thing into modernization. \* which was afflicted by the teachings of Russia acrobbologist of Lysentoism The cold war provided Map with examples of what he didn't want (hing to become, he publicly criticized knushchev labelling him as a

bourgeoisie and he used such daims towar ds his own fellow leaders like Than Enlai who had had secret meetings with Krushcher. The cold war gave Mas on image of what thing would become if hedid not create change which led to the cut cultural revolution where Mao states great shads "from great chaos grows great order", it is Mao's fearful ideology of 'constant struggle' to remain non-capitalist that led to low monare in workers and decrease in economic. production. The cold war also addled Mao Zedong with the mentality that " All political power st grows from the barrel of a gun" as the two superpowers were the most militarly equipped countries and by focusing primarily on improving the military instead of infrastructure which was poor as during the civil war the CCP destroyed railways so that when they came into power only half remained, and the improper building of the Mangter bridge (garge) due to time constraints on repaying soviet loan the communist grabbed the short straw which

improvements on would only provide temporary economy. Overall the cold war negatively impacted (hinds economic development as the Korear xar dratined their resources, people, and critical the ĩn growth stages early country, which is not cold war did not bene those benefits (China - America friends bluce be experienced later in China 00 past 

This response achieved level 4. It contains some effective consideration of the Sino-Soviet alliance and its impact on the economy. It makes good points about the impact of the Korean War on the economy. It does occasionally wander into general impacts rather than keeping a sharp focus on the impact on the economy. It is occasionally imprecise in its use of knowledge.

# Paper Summary

Based on their performance on this paper, candidates are offered the following advice:

## Section A

#### Value of Source Question (1(a))

• Candidates must be more prepared to make valid inferences rather than to paraphrase the source

- Be prepared to back up inferences by adding additional contextual knowledge from beyond the source
- Move beyond stereotypical approaches to the nature/purpose and authorship of the source e.g. look at the specific stance and/or purpose of the writer
- Avoid writing about the deficiencies of the source when assessing its value to the enquiry.

## Weight of Source Question (1(b)/2(b))

- Candidates should be prepared to assess the weight of the source for an enquiry by being aware that the author is writing for a specific audience. Be aware of the values and concerns of that audience.
- In assessing weight, it is perfectly permissible to use contextual knowledge to support/challenge statements and claims made in the source
- Try to distinguish between fact and opinion by using your contextual knowledge of the period
- Knowledge should be integrated with the source evidence, to discuss the inferences drawn and their validity in the light of the contextual understanding of the period.
- In coming to a judgement about the nature/purpose of the source, take account of the weight you may be able to give to the author's evidence in the light of his or her stance and/or purpose
- In assessing weight, it is perfectly permissible to assess reliability by considering what has been perhaps deliberately omitted from the source. However, simply stating that a source is limited because it does not cover certain events or developments does not establish weight since no source can be comprehensive.

## Section B

## Essay questions

- Candidates must provide more factual details as evidence. Weaker responses lacked depth and sometimes range
- Take a few minutes to plan your answer before you begin to write your response
- Pick out three or four key themes and then provide an analysis of (for e.g.) the target significance mentioned in the question, setting its importance against other themes rather than providing a description of each
- Pay more careful attention to key phrases in the question when analysing and use them throughout the essay to prevent deviation from the central issues and concepts
- Pay careful attention to the date range in the question. Plan the answer with a focus on this range and avoid lengthy exploration of events outside of the time period set
- Try to explore links between issues to make the structure flow more logically and the arguments more integrated.
