INFO3 Exemplar work

These support materials for teachers of GCE ICT provide examples of candidates' answers to the questions set for the June 2010 examination. These answers should be read in conjunction with the *Report on the Examination* and the *Mark Scheme*, which are available on <u>e-AQA</u>. A commentary from a senior examiner accompanies each selected answer.

Further examples will be provided at the Teacher Support meetings for INFO3 which are to be held in autumn 2010.

Permission to reproduce all copyrighted material has been applied for. In some cases, efforts to contact copyright holders have been unsuccessful and AQA will be happy to rectify any omissions if notified.

MAX

Commentary

The examiners were looking for factors to be taken into account when developing a future ICT strategy. Answers that gained credit could mention six different factors (showing breadth of knowledge) or fewer factors considered in more depth showing more understanding. This candidate identified four factors, two of which were expanded.

AQA

2

Globemob's consultants suggested that the failure of previous ICT projects could have been avoided if management and end users had been involved in the development of the solutions.

Discuss the factors that can contribute to the development of a successful ICT solution. (12 marks)

There are now ICT projects that either fail or are a success A number of factors contribute tavard the and if carried at carriely the can be of the factors that can control be avoided (southbule to the development & a successful ICT. solution to the upper analytics. ma

Commentary

This candidate has discussed four relevant factors in depth and gained full marks. Alternative high scoring answers may have included more factors in less depth. Note that credit was not given for user training, as this activity is not part of the development process.

AQA

Commentary

The candidate gained full marks. External services have been described and the possible concerns listed.

QUESTION 3(b)

	1	•
3 (b)	One method of providing external ICT services is through outsourcing.	
	Describe what is meant by outsourcing.	
	Outsourcing is where an organisation will	
	get a trind party company (with specialist	
	equipment) to proform certain jobs for the	
	organization for example statemets mury	
	with the print news letters, and so wi BOD	
	get a conyouncy that specialises is	
	bulk prinking to print the news letters	
	for stabends.	
		3
	(4 marks)	12
		13

Commentary

This candidate has provided a basic description of outsourcing and an example of bulk printing. A further mark could have been given had an extended description been available, possibly including a reference to service levels.

AQA

The consultants considered Globemob's Information Security Policy to be inadequate for current and future operations.

With reference to Globernob's Information Security Policy, identify those areas which you consider to be inadequate, making suggestions for improvements that should be made. (16 marks)

Information Security Policy is in adequate ...The as there are not mentioned areas which Individual.... Internetty *is*..... re....area cloes security on the machy untion of User aneas or password Therefore realla to ensure seculty levels.. Access are another been reature Without Riels reo arcess or even delete personcu information R Nition to kale a nach necessary abus lace. does n. This Such lbure websites 225 Could Messengers are another piece of se which has not been mentioned and could cause pidde Turn over >

There is also no mention of who can use the company pailities. It may be obvious that it is for the use only but it should be mentioned. With repards to monitoring is no reerence. stem will be monitoned /s ar There is no mention of a restriction on clash drives. which would mean that employee's could possibly copy be sold on to another company, data ble interpene with data wise 13

Commentary

In general, some areas of inadequacy have been identified and valid improvement measures suggested. Only the best candidates scored highly on the question and not many gained the available 16 marks. The answer above is typical example of an answer from a better-than-average student.

AQA

QUESTION 5(a)

5 A national supermarket chain employs staff at strategic, tactical and operational levels. Examples of tasks that staff at the different levels undertake might include:

- Strategic determining the location of a new store
- Tactical managing changes in customer demand for bakery products
- Operational restocking shelves.
- Complete the table below by identifying the key characteristics of information required for strategic, tactical and operational tasks.

	Level of detail in the information required	Time-span of decision making	Purpose for which information is required
Strategic	Main Overview Information Yearly Cannual / Anancial overview Profit	Can bake a long time, takes one year to gather information. All pactors will have to be considered. Meetings with board mentioers and stored	To give the company direction. Announce Profiles. complete Company and give departments their budgets
Tactical	Shill an overview bur Conventrated (quarter) Financial overview j For once de partment	holders. Share ey; Not teo long (quarterley)	To direct operation Shaff and give Reports to Shabegic shaff
Operational	Quite detailed - (Day to Day processing) Will process Individual transactions	hotantaneous Will be told what	
			Customerand tactail (9 marks)

Commentary

This candidate clearly understood the key characteristics of information required for staff at different levels and the application of this knowledge to a supermarket situation.

U

QUESTION 5(b)

5 (b) Name and justify an appropriate training method for each of the following. The training method must be different in each case. 5 (b) (i) Strategic staff AFREN Instructor led training : Strategie Staff will need to know how to operate Important systems Such as an MLS. There is not a lot at strategic management Herefore the costs for baring on instructor will be whited will alber for strategic shaft to ask guestions (2 marks) 5 (b) (ii) Tactical staff Computer based = This will be appropriate as computer based training atoms for many sheef to be trained at once. Tachcol Shape would have be able to kain at their own pace, maning L It is plexible around them. It is cost effective against Instructor led training as the organisation does (2 marks) not have to pay for travel or instructor costs 5 (b) (iii) Operational staff On-the -Joh This will be appropriate as their jobs will Often be meaniel therefore it will not be too stressed to learn on job. The company will have to pay L for barning expenses. As employees are working as they are training, the company will be gaining money (2 marks)

Commentary

Candidate has correctly named and justified appropriate training methods. Unlike some candidates, the common mistakes of not naming appropriate training methods have been avoided.

A large organisation is about to develop a new Sales Order and Stock Control System. The Chief Executive has past experience of systems that have not operated reliably due to inadequate testing and has requested further information about the testing of large ICT systems.

Write a brief report for the Chief Executive to describe the testing necessary to ensure the reliable operation of a large ICT system. As your report is for a person who is not an ICT specialist, you must include an explanation of any technical terms used.

(18 marks)

To ensure the relieves operation of a large
10T system, a veries of bedra have to be
corried ant. Fristly a finctional took will
be convice sub, this is where all of the
buttons (function) of the new system are
tested, this will consume that all buttons
within the system work successfully and
there are no problems for example on the
stock control system, the buttons where for
that selection and printing reports are
checked and any problems are corrected
> this will ensure that the problems offer
with the producedly when it's in use in the
real werld. Prother best that should be
corried out is an operational test, this
is where all of the processes are trated
to esse that there are a programming
sources with the system, any errors found
will be shealt with for example products
would be entered into the new system and
a total price will be calculated - if there
one any errors then they will be corrected

and the test is reduce. I third best that should be carried out is a volume best, this is where - Software is written to input large mounds of data to save if the system can cope with it. For example the highest amount of recorded and sales that was recorded for the organisation will be uputted inte the new system within the same time peried to save if the System can cope , Mary ernors that arise will be dealt with A found test that should be corried out is a scalability best, this is where software is weither to input large emands of abo continuously into the new system until the parfor mance of the new System degets for arangle large numbers of sales will be put with the new stock control system with proportionale drops les processing drops. Buy problems that arise will Should be dealt with A fith Lest that should be survied only in probaty on bashing, this is where a probatype of the new system is tested is a mall area of the organization in the real world. For a ronge the protetyper. many the tested is one store of the organisation and any produms that arise will be dealt with Turn over)

15

Commentary

This answer identifies appropriate testing approaches for a large organisation, including excellent and relevant descriptions of volume and scaleability testing. However, the prototype testing has been confused with pilot testing.

Note the brief planning notes made by the candidate which have resulted in a well structured answer.

Note also how the candidate has provided good explanations for the technical terms used.

QUESTION 7 – Essay question and mark ranges used

Discuss how developments in the technologies used in entertainment and social interaction are now influencing the way in which organisations are run.

The quality of written communication will be assessed in your answer.

Mark Scheme

Low mark range

Candidate **identifies** some developments in technology but typically uses a form and style of writing that is barely appropriate for its purpose. Candidate has expressed simple ideas clearly but may be imprecise and awkward in dealing with complex or subtle concepts. Information or arguments may be of doubtful relevance or be obscurely presented. Errors in spelling, punctuation and grammar may be noticeable and intrusive to understanding, suggesting weaknesses in these areas. Text is barely legible.

Medium mark range

Candidate **describes** developments in technology and uses a form and style of writing which is sometimes appropriate for its purpose but with many deficiencies. Candidate has expressed straightforward ideas clearly, if not always fluently. Sentences and paragraphs may not always be well-connected. Information or arguments may sometimes stray from the point or may be weakly presented. There may be some errors of spelling, punctuation and grammar but not such as to cause problems in the reader's understanding and not such as to suggest a weakness in these areas. Text is legible.

Good mark range

Candidate **explains** relevant developments in technology and the meanings and arguments are clear. Candidate has in the main used a form and style of writing appropriate for its purpose, with only occasional lapses. Candidate has expressed moderately complex ideas clearly and reasonably fluently. Candidate has used well-linked sentences and paragraphs. Information or arguments are generally relevant and well structured. There may be occasional errors of spelling, punctuation and grammar. Text is legible.

High mark range

14

Candidate has **analysed the relationship** between technology developments in entertainment/social interaction with the way organisations are run. Meaning is clear. Candidate has selected and used a form and style of writing appropriate to purpose and has expressed complex ideas clearly and fluently. Sentences and paragraphs follow on from one another clearly and coherently. Specialist vocabulary has been used appropriately. There are few, if any, errors of spelling, punctuation and grammar. Text is legible.

16-20 marks

11-15 marks

6-10 marks

0-5 marks

Discuss how developments in the technologies used in entertainment and social interaction are now influencing the way in which organisations are run.

In this question you will be marked on your ability to use good English, to organise information clearly and to use specialist vocabulary where appropriate.

(20 marks)

This space is available for planning your answer, if you wish to use it.
