GCE 2004 November Series

Mark Scheme

Mathematics and Statistics B *MBD1*

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available from:

Key to Mark Scheme

M	mark is for	method
m	mark is dependent on one or more M marks and is for	method
A	mark is dependent on M or m mark and is for	accuracy
В	mark is independent of M or m marks and is for	method and accuracy
E	mark is for	explanation
√or ft		follow through from previous
		incorrect result
cao		correct answer only
cso		correct solution only
awfw		anything which falls within
awrt		anything which rounds to
acf		any correct form
ag		answer given
sc		special case
oe		or equivalent
sf		significant figure(s)
dp		decimal place(s)
A2,1		2 or 1 (or 0) accuracy marks
–x ee		deduct x marks for each error
PI		possibly implied
sca		substantially correct approach
		, ,,,

Abbreviations used in Marking

MC –x	deducted x marks for mis-copy
MR -x	deducted x marks for mis-read
isw	ignored subsequent working
bod	gave benefit of doubt
wr	work replaced by candidate
fb	formulae book

Application of Mark Scheme

Correct answer without working	mark as in scheme
Incorrect answer without working	zero marks unless specified otherwise

Award method and accuracy marks as appropriate to an alternative solution using a correct method or partially correct method.

Mathematics and Statistics B Discrete 1 MBD1 November 2004

Question Number and Part	Solution	Marks	Total	Comments
1(a)(i)	A: 0			
1(u)(1)	B: 15, 12	M1		
	C: 25, 19	A1		Three final labels
	D: 4	A1		Remaining finals
	E: 7 Shortest	A1		Temporary labels
	F: 8 length = 18	B1	5	For 18
	G: 22, 18			
(ii)	Trace back to ADBG	M1 A1	2	
(b)	AD, DF,	M1 A1		
(6)	DE, FB,	A1		
	BG, BC	A1		
	Total 34 miles	B1	5	
(c)	$A \qquad \stackrel{B}{\longleftarrow} C$			
	D	B1		(omission of labels tolerated)
		Di		(omission of facets tolerated)
	\int_{E} \int_{F} G			
	$F \longrightarrow G$			
	A to G = 4 + 4 + 7 + 6 = 21	B1	2	
(4)(i)	From (a) (an afrach) the only noth 1 to C			
(d)(i)	From (a) (or afresh) the only path A to G of length less than 20 is ADBG	B1	1	
	of length less than 20 is ADDO	Di	1	
(ii)	Need BC to reach C in less than 20.	M1		
	Then cheapest links to E and F are DE	A1		
	and <i>DF</i> .	A1	3	
	Total		18	
2	$\begin{array}{cccccccccccccccccccccccccccccccccccc$	341 4 1		For invalidation
	$\begin{bmatrix} 0 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 1 & 0 & 0 \end{bmatrix}$	M1 A1		For implication
	$\begin{bmatrix} 0 & 1 & 1 & 1 & 0 & 0 \\ 1 & 0 & 0 & 0 & 1 & 0 \end{bmatrix}$	M1 A1		
	$\begin{bmatrix} 1 & 0 & 0 & 0 & 1 & 0 \\ 1 & 1 & 1 & 0 & 0 & 0 \end{bmatrix}$	IVII AI		
	contradiction	A1	5	
	contradiction	711	J	
	Total		5	
3(a)		M1		6/0/10/12
		A1		6/8/10/12
	5 10 8	A1	4	6/9/12
	10 \	A1	4	5
	12			
(b)	8 (degree 3)	M1 A1	2	
	Total		6	

MBD1 (cont)

Question	Solution	Marks	Total	Comments
Number and Part				
4(a)				
.(u)	A, B, D	B1	1	
(1.)				
(b)	(4 5) (8 9)	M1 A1		Forward pass
	00 33 78 1313	M1 A1	4	Backward pass
	666			
(c)	Critical path: BFHL	B1√	2	ft sensible answers
	Minimum completion: 13 days	B1√	2	ft sensible answers
(d)	D J			
	B F H L	M1 A1		For dealing with critical activities
	E K	M1 A1	4	For the rest
(e)(i)	So 9 workers are needed for this schedule.	M1 A1 A1	3	
(ii)	Total days = $97 > 7 \times 13$, so 7 workers not enough.	M1 A1	2	
(iii)	Delay G by 2 days	B1 B1	2	
	Total		18	

MBD1 (cont)

Question	Solution	Marks	Total	Comments
Number				
and Part				
5(a)	0 out of last OR \Rightarrow 0/0 into it, so $\mathbf{c} = 0$.	M1		
	The second AND gate has a 1 going in			
	and a 0 out, so the other input is 0.	A1		
	So first AND gate has an output of 0.			
	Hence the values giving 0 output are	A1		
	a b c			
	0 0 0	A1		
	0 1 0	A1	5	
	1 0 0			
(b)	To be equivalent to (a) the circuit must	M1		
	give an output of 1 when we have			
	$(\mathbf{a} \wedge \mathbf{b}) \vee \mathbf{c}$:	A1		
	a —			
	$b \longrightarrow$	M1		
))			
	c —	A1	4	
	Total		9	
6(a)	x Xtravim give $3x$ mg of vitamin A			
	y Yeasty give y mg of vitamin A			
	Therefore we need $3x + y \ge 15$.	B1		
	Similarly B \Rightarrow $x + 4y \ge 20$.	B1		
	and $C \Rightarrow x + y \ge 11$	B1	3	
4.				
(b)	15			
	15	D1 ^		
		B1√		0
	II Faccible	B1√		One per line
	reasible	B1√		(ft)
	region	D1	4	Compet marion mandred
		B1	4	Correct region marked
	5			
	5 11 20			
()(')				
(c)(i)	Vertices of feasible region are	M1		
	(0, 15), (2, 9), (8, 3) and (20, 0)	A1		(or use a cost line)
	Cost of $2x + 5y$ is minimised at $(8, 3)$ so	A1		
	he should take 8 Xtravim and 3 Yeasty	B1	4	
(;;)	each day.	3.41		
(ii)	The minimum cost is attained at two	M1		
	vertices, one with y-coordinate 0.	A1		
	So the cost line must be parallel to the line	N # 1		
	from $(8, 3)$ to $(20, 0)$ (i.e. $x + 4y$).	M1		
	So the Xtravim tablets cost one quarter of	A 1	4	
	the Yeasty; i.e. 1.25 p each.	A1	4 15	
	Total		15
