

**OXFORD CAMBRIDGE AND RSA EXAMINATIONS  
A2 GCE**

**4724/01**

**MATHEMATICS  
Core Mathematics 4  
QUESTION PAPER**

**TUESDAY 16 JUNE 2015: Afternoon**

**DURATION: 1 hour 30 minutes  
plus your additional time allowance  
MODIFIED ENLARGED 24pt**

**Candidates answer on the Printed Answer Book or any suitable paper provided by the centre. The Printed Answer Book may be enlarged by the centre.**

**OCR SUPPLIED MATERIALS:**

**List of Formulae (MF1)**

**OTHER MATERIALS REQUIRED:**

**Scientific or graphical calculator**

**READ INSTRUCTIONS OVERLEAF**

## **INSTRUCTIONS TO CANDIDATES**

**Write your name, centre number and candidate number in the spaces provided on the Printed Answer Book or on the paper provided by the centre. Please write clearly and in capital letters.**

**IF YOU USE THE PRINTED ANSWER BOOK WRITE YOUR ANSWER TO EACH QUESTION IN THE SPACE PROVIDED.**

**Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).**

**Use black ink. HB pencil may be used for graphs and diagrams only.**

**Answer ALL the questions.**

**Read each question carefully. Make sure you know what you have to do before starting your answer.**

**You are permitted to use a scientific or graphical calculator in this paper.**

**Give non-exact numerical answers correct to 3 significant figures unless a different degree of accuracy is specified in the question or is clearly appropriate.**

## **INFORMATION FOR CANDIDATES**

**The number of marks is given in brackets [ ] at the end of each question or part question on the Question Paper.**

**YOU ARE REMINDED OF THE NEED FOR CLEAR PRESENTATION IN YOUR ANSWERS.**

**The total number of marks for this paper is 72.**

**Any blank pages are indicated.**

## **INSTRUCTION TO EXAMS OFFICER/INVIGILATOR**

**Do not send this Question Paper for marking; it should be retained in the centre or recycled. Please contact OCR Copyright should you wish to re-use this document.**

**BLANK PAGE**

- 1 (i) Express  $\frac{2}{3-x} + \frac{3}{1+x}$  as a single fraction in its simplest form. [2]
- (ii) Hence express  $\left(\frac{2}{3-x} + \frac{3}{1+x}\right) \times \frac{x^2 + 8x - 33}{121 - x^2}$  as a single fraction in its lowest terms. [3]
- 2 A triangle has vertices at  $A(1, 1, 3)$ ,  $B(5, 9, -5)$  and  $C(6, 5, -4)$ .  $P$  is the point on  $AB$  such that  $AP:PB = 3:1$ .
- (i) Show that  $\overrightarrow{CP}$  is perpendicular to  $\overrightarrow{AB}$ . [4]
- (ii) Find the area of the triangle  $ABC$ . [2]
- 3 The equation of a curve is  $y = e^{2x} \cos x$ . Find  $\frac{dy}{dx}$  and hence find the coordinates of any stationary points for which  $-\pi \leq x \leq \pi$ . Give your answers correct to 3 significant figures. [6]
- 4 (i) Find the first three terms in the binomial expansion of  $(8 - 9x)^{\frac{2}{3}}$  in ascending powers of  $x$ . [4]
- (ii) State the set of values of  $x$  for which this expansion is valid. [1]

- 5 By first using the substitution  $t = \sqrt{x+1}$ , find  $\int e^{2\sqrt{x+1}} dx$ . [6]
- 6 (i) Use the quotient rule to show that the derivative of  $\frac{\cos x}{\sin x}$  is  $\frac{-1}{\sin^2 x}$ . [2]
- (ii) Show that  $\int_{\frac{1}{6}\pi}^{\frac{1}{4}\pi} \frac{\sqrt{1 + \cos 2x}}{\sin x \sin 2x} dx = \frac{1}{2}(\sqrt{6} - \sqrt{2})$ . [6]
- 7 A curve has equation  $(x+y)^2 = xy^2$ . Find the gradient of the curve at the point where  $x = 1$ . [7]
- 8 In the year 2000 the population density,  $P$ , of a village was 100 people per  $\text{km}^2$ , and was increasing at the rate of 1 person per  $\text{km}^2$  per year. The rate of increase of the population density is thought to be inversely proportional to the size of the population density. The time in years after the year 2000 is denoted by  $t$ .
- (i) Write down a differential equation to model this situation, and solve it to express  $P$  in terms of  $t$ . [6]
- (ii) In 2008 the population density of the village was 108 people per  $\text{km}^2$  and in 2013 it was 128 people per  $\text{km}^2$ . Determine how well the model fits these figures. [2]

**9 Two lines have equations**

**$r = 3i + 5j - k + \lambda(2i + j + k)$  and  $r = 4i + 10j + 19k + \mu(i - j + \alpha k)$ ,  
where  $\alpha$  is a constant.**

**Find the value of  $\alpha$  in each of the following cases.**

**(i) The lines intersect at the point (7, 7, 1). [3]**

**(ii) The angle between their directions is  $60^\circ$ . [4]**

**10 (i) Express  $\frac{x+8}{x(x+2)}$  in partial fractions. [3]**

**(ii) By first using division, express  $\frac{7x^2 + 16x + 16}{x(x+2)}$   
in the form  $P + \frac{Q}{x} + \frac{R}{x+2}$ . [3]**

**A curve has parametric equations  $x = \frac{2t}{1-t}$ ,  $y = 3t + \frac{4}{t}$ .**

**(iii) Show that the cartesian equation of the curve is**

$$y = \frac{7x^2 + 16x + 16}{x(x+2)}. \quad [4]$$

**(iv) Find the area of the region bounded by the curve, the  $x$ -axis and the lines  $x = 1$  and  $x = 2$ . Give your answer in the form  $L + M\ln 2 + N\ln 3$ . [4]**
