OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

1	$[a =]2c^2 - b$ www o.e.	3	M1 for each of 3 complete correct steps, ft from previous error if equivalent difficulty
2	$5x - 3 < 2x + 10$ $3x < 13$ $x < \frac{13}{3}$ o.e.	M1 M1 M1	condone '=' used for first two Ms M0 for just $5x - 3 < 2(x + 5)$ or $-13 < -3x$ or ft or ft; isw further simplification of $13/3$ ; M0 for just $x < 4.3$
3 (i)	(4, 0)	1	allow $y = 0, x = 4$ bod B1 for $x = 4$ but do not isw: 0 for (0, 4) seen 0 for (4, 0) and (0, 10) both given (choice) unless (4, 0) clearly identified as the $x$ -axis intercept
3 (ii)	$5x + 2(5 - x) = 20$ o.e.  (10/3, 5/3) www isw	M1  A2	for subst or for multn to make coeffs same and appropriate addn/subtn; condone one error  or A1 for $x = 10/3$ and A1 for $y = 5/3$ o.e. isw; condone 3.33 or better and 1.67 or better  A1 for (3.3, 1.7)
4 (i)	translation by $\begin{pmatrix} -4 \\ 0 \end{pmatrix}$ or 4 [units] to left	B1  B1	0 for shift/move  or 4 units in negative $x$ direction o.e.
4 (ii)	sketch of parabola right way up and with minimum on negative $y$ -axis  min at (0, -4) and graph through -2 and 2 on $x$ -axis	B1  B1	mark intent for both marks  must be labelled or shown nearby
5 (i)	$\frac{1}{12}$ or $\pm \frac{1}{12}$	2	M1 for $\frac{1}{144^{\frac{1}{2}}}$ o.e. or for $\sqrt{144} = 12$ soi
5 (ii)	denominator = 18  numerator = $5 - \sqrt{7} + 4(5 + \sqrt{7})$  = $25 + 3\sqrt{7}$ as final answer	B1  M1  A1	B0 if 36 after addition  for M1, allow in separate fractions  allow B3 for $\frac{25 + 3\sqrt{7}}{18}$ as final answer  www

$x$	$\sin x + \frac{2}{3}x$	
2.278855	<	2.2788625
2.278865	>	2.2788627

hence result is correct to 5 dp

## Specification Aggregation Results

Overall threshold marks in UMS (ie after conversion of raw marks to uniform marks)

	<b>Maximum Mark</b>	<b>A</b>	<b>B</b>	<b>C</b>	<b>D</b>	<b>E</b>	<b>U</b>
<b>7895-7898</b>	600	480	420	360	300	240	0
<b>3895-3898</b>	300	240	210	180	150	120	0

The cumulative percentage of candidates awarded each grade was as follows:

	<b>A</b>	<b>B</b>	<b>C</b>	<b>D</b>	<b>E</b>	<b>U</b>	<b>Total Number of Candidates</b>
<b>7895</b>	27.9	61.3	84.3	95.7	98.7	100	395
<b>7896</b>	54.3	62.9	88.6	100	100	100	35
<b>7897</b>							0
<b>7898</b>							0
<b>3895</b>	27.1	54.1	74.2	88.2	97.3	100	947
<b>3896</b>	41.3	67.5	86.3	95	100	100	80
