Unit 4766: Statistics 1

Mark Scheme for January 2012

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

Annotations

Annotation in scoris	Meaning		
✓and ×			
BOD	Benefit of doubt		
FT	Follow through		
ISW	Ignore subsequent working		
M0, M1	Method mark awarded 0, 1		
A0, A1	Accuracy mark awarded 0, 1		
B0, B1	Independent mark awarded 0, 1		
SC	Special case		
۸	Omission sign		
MR	Misread		
Highlighting			
Other abbreviations in mark scheme	Meaning		
E1	Mark for explaining		
U1	Mark for correct units		
G1	Mark for a correct feature on a graph		
M1 dep*	Method mark dependent on a previous		
	mark, indicated by *		
cao	Correct answer only		
oe	Or equivalent		
rot	Rounded or truncated		
soi	Seen or implied		
www	Without wrong working		

Subject-specific Marking Instructions

a Annotations should be used whenever appropriate during your marking.

The A, M and B annotations must be used on your standardisation scripts for responses that are not awarded either 0 or full marks. It is vital that you annotate standardisation scripts fully to show how the marks have been awarded.

For subsequent marking you must make it clear how you have arrived at the mark you have awarded.

An element of professional judgement is required in the marking of any written paper. Remember that the mark scheme is designed to assist in marking incorrect solutions. Correct solutions leading to correct answers are awarded full marks but work must not be judged on the answer alone, and answers that are given in the question, especially, must be validly obtained; key steps in the working must always be looked at and anything unfamiliar must be investigated thoroughly.

Correct but unfamiliar or unexpected methods are often signalled by a correct result following an *apparently* incorrect method. Such work must be carefully assessed. When a candidate adopts a method which does not correspond to the mark scheme, award marks according to the spirit of the basic scheme; if you are in any doubt whatsoever (especially if several marks or candidates are involved) you should contact your Team Leader.

c The following types of marks are available.

М

A suitable method has been selected and *applied* in a manner which shows that the method is essentially understood. Method marks are not usually lost for numerical errors, algebraic slips or errors in units. However, it is not usually sufficient for a candidate just to indicate an intention of using some method or just to quote a formula; the formula or idea must be applied to the specific problem in hand, eg by substituting the relevant quantities into the formula. In some cases the nature of the errors allowed for the award of an M mark may be specified.

Α

Accuracy mark, awarded for a correct answer or intermediate step correctly obtained. Accuracy marks cannot be given unless the associated Method mark is earned (or implied). Therefore M0 A1 cannot ever be awarded.

В

Mark for a correct result or statement independent of Method marks.

Ε

A given result is to be established or a result has to be explained. This usually requires more working or explanation than the establishment of an unknown result.

Unless otherwise indicated, marks once gained cannot subsequently be lost, eg wrong working following a correct form of answer is ignored. Sometimes this is reinforced in the mark scheme by the abbreviation isw. However, this would not apply to a case where a candidate passes through the correct answer as part of a wrong argument.

- When a part of a question has two or more 'method' steps, the M marks are in principle independent unless the scheme specifically says otherwise; and similarly where there are several B marks allocated. (The notation 'dep *' is used to indicate that a particular mark is dependent on an earlier, asterisked, mark in the scheme.) Of course, in practice it may happen that when a candidate has once gone wrong in a part of a question, the work from there on is worthless so that no more marks can sensibly be given. On the other hand, when two or more steps are successfully run together by the candidate, the earlier marks are implied and full credit must be given.
- e The abbreviation ft implies that the A or B mark indicated is allowed for work correctly following on from previously incorrect results. Otherwise, A and B marks are given for correct work only differences in notation are of course permitted. A (accuracy) marks are not given for answers obtained from incorrect working. When A or B marks are awarded for work at an intermediate stage of a solution, there may be various alternatives that are equally acceptable. In such cases, exactly what is acceptable will be detailed in the mark scheme rationale. If this is not the case please consult your Team Leader.

Sometimes the answer to one part of a question is used in a later part of the same question. In this case, A marks will often be 'follow through'. In such cases you must ensure that you refer back to the answer of the previous part question even if this is not shown within the image zone. You may find it easier to mark follow through questions candidate-by-candidate rather than question-by-question.

- Wrong or missing units in an answer should not lead to the loss of a mark unless the scheme specifically indicates otherwise. Candidates are expected to give numerical answers to an appropriate degree of accuracy, with 3 significant figures often being the norm. Small variations in the degree of accuracy to which an answer is given (e.g. 2 or 4 significant figures where 3 is expected) should not normally be penalised, while answers which are grossly over- or under-specified should normally result in the loss of a mark. The situation regarding any particular cases where the accuracy of the answer may be a marking issue should be detailed in the mark scheme rationale. If in doubt, contact your Team Leader.
- g Rules for replaced work

If a candidate attempts a question more than once, and indicates which attempt he/she wishes to be marked, then examiners should do as the candidate requests.

If there are two or more attempts at a question which have not been crossed out, examiners should mark what appears to be the last (complete) attempt and ignore the others.

- NB Follow these maths-specific instructions rather than those in the assessor handbook.
- For a *genuine* misreading (of numbers or symbols) which is such that the object and the difficulty of the question remain unaltered, mark according to the scheme but following through from the candidate's data. A penalty is then applied; 1 mark is generally appropriate, though this may differ for some units. This is achieved by withholding one A mark in the question.

Note that a miscopy of the candidate's own working is not a misread but an accuracy error.

G	uestion	Answer	Marks	Guidance	Additional Guidance
1	(i)	0 8 8 10 5 5 5 20 5 6 9 30 1 1 4 4 6 6 Key 20 9 represents 29 degrees Celsius	G1 G1 G1 G1 [4]	Stem (in either order) Leaves Sorted and aligned (use paper test if unsure) Key	Do not allow leaves 25,26, 29 etc Ignore commas between leaves (indep). Condone 1 error or omission Allow errors in leaves if sorted Condone missing units (Celsius) Allow stem 0, 1, 2, 3
	(ii)	Median = 27.5	B1 [1]		CAO
1	(iii)	The median since the mean is affected by the skewness of the distribution	B1 E1	For median Allow E2 for mean if supported by very convincing reason EG takes all values into account and no extreme values	Do not allow 'less affected by extremes or outliers' unless also mention (positive or negative) skewness. Condone 'bottom half more spread' or similar
2	(i)	Mean = $\frac{759.00}{60}$ = £12.65	B1	Ignore units	CAO Do not allow 759/60 as final answer but allow $12^{13}/_{20}$
		Mean = $\frac{759.00}{60}$ = £12.65 Sxx = $11736.59 - \frac{759^2}{60}$ = 2135.24 s = $\sqrt{\frac{2135.24}{59}}$ = £6.02	M1 A1 [3]	For Sxx CAO ignore units Allow more accurate answers	M1 for 11736.59 - $60 \times \text{their mean}^2$ BUT NOTE M0 if their $S_{xx} < 0$ For s ² of 36.2 (or better) allow M1A0 with or without working For RMSD of 5.97 or 5.96 (or better) allow M1A0 provided working seen For RMSD ² of 35.6 (or better) allow M1A0 provided working seen
2	(ii)	New mean = $12.65 \times 1.02 = £12.90$ New sd = $6.02 \times 1.02 = £6.14$	B1 B1 [2]	FT their mean Awrt 12.90 Allow 12.9 FT their sd	If candidate 'starts again' only award marks for CAO Deduct at most 1 mark overall in whole question for overspecification of Mean and 1mark overall for SD

(Question		Answer	Marks	Guidance	Additional Guidance
2	(iii)	N	New mean = $12.65 + 0.25 = £12.90$	B1	FT their mean Awrt 12.90	If candidate 'starts again' only award marks for CAO
		N	New sd = $£6.02$	B1 [2]	FT their sd (unless negative) Awrt 6.02	Allow sd unchanged (or similar)
3	(i)		Jimmy O.7 Jimmy O.4 Jimmy Alan O.6 Alan O.7 Jimmy Alan O.7 Jimmy O.3 Alan Alan Alan Alan Alan Alan	G1 G1 G1	Do a vertical scan and give: First column Second column Final column	All indep All probs must be correct Without extra branches in final column Ignore anything before third set Allow labels 'win' and 'lose' in place of Jimmy and Alan respectively but if no labels, no marks
3	(ii)		P(Alan wins) $= (0.4 \times 0.3 \times 0.6) + (0.6 \times 0.4 \times 0.3) + (0.6 \times 0.6) = 0.504$	M1 M1 A1 [3]	For any one 'correct' product For all three 'correct' products and no extras CAO	FT their tree for both M marks Provided correct number of terms in product(s) for both M1's
3	(iii)	F	P(Ends after 4) = $(0.4 \times 0.7) + (0.6 \times 0.6) = 0.28 + 0.36 = 0.64$	M1 A1 [2]	For both products CAO	FT their tree for M mark but not for A mark Provided two terms in each product
4	(i)	F	Because $P(T M) \neq P(T)$	E1 [1]	Or 0.8 \(\neq 0.55 \)	Or $P(T \cap M)$ (= 0.264) $\neq P(T) \times P(M)$, provided 0.264 in (ii) Or $0.264 \neq 0.55 \times 0.33$ (=0.1815) Look out for complement methods, etc
4	(ii)	F	$P(T \cap M) = P(T \mid M) \times P(M) = 0.80 \times 0.33 = 0.264$	M1 A1 [2]	For product CAO	A0 for 0.26

Que	estion	Answer	Marks	Guidance	Additional Guidance
4 (ii	ii)	0.286 0.264 0.066 0.384	G1 G1	For two labelled intersecting circles For at least 2 correct probabilities. FT their $P(T \cap M)$ For remaining probabilities. FT their $P(T \cap M)$, providing probabilities between 0 and 1	Allow labels such as P(T) etc Allow other shapes in place of circles No need for 'box' FT from 0.1815 in (ii) gives 0.3685, 0.1815, 0.1485, 0.3015
			[3]		
5 (i))	P(X=1) = P(g,b)+P(b,g)+P(b,b,g)+P(b,b,b,g)	M1	For any two correct	Must have correct ref to numbers of boys
		1 1 1 11	M1	fractions For all four correct	and girls, not just fractions With no extras
		$= \frac{1}{4} + \frac{1}{4} + \frac{1}{8} + \frac{1}{16} = \frac{11}{16}$	1,11	fractions	Accept 0.6875, not 0.688.
		OR	A1	NB Answer given	Watch for use of B(4, 0.5) $P(X \le 2) = 0.6875$
		$P(X=1) = 1 - P(X \neq 1) = 1 - (P(bbbb) + P(ggb) + P(gggb) + P(gggg))$			which gets M0M0A0.
		$=1-\left(\frac{1}{1}+\frac{1}{1}+\frac{1}{1}+\frac{1}{1}\right)=\frac{11}{1}$			
		$\frac{-1}{16} \left(\frac{1}{16} + \frac{1}{8} + \frac{1}{16} + \frac{1}{16} \right) = \frac{1}{16}$	[3]		

(Quest	ion	Answer	Marks	Guidance	Additional Guidance
5	(ii)		$E(X) = (0 \times \frac{1}{16}) + (1 \times \frac{11}{16}) + (2 \times \frac{1}{8}) + (3 \times \frac{1}{16}) + (4 \times \frac{1}{16})$	M1 A1	For Σrp (at least 3 terms correct)	Allow 22/16
			16 16 8 16 16	AI	A1 CAO	Use of $E(X-\mu)^2$ gets M1 for attempt at $(x-\mu)^2$
			$=1\frac{3}{9}=1.375$		Allow 1.38, not 1.4	should see $(-1.375)^2$, $(-0.375)^2$, $(0.625)^2$,
			$-\frac{1}{8} - \frac{1.373}{8}$			1.625^2 , 2.625^2 (if E(X) correct but FT their E(X)) (all 5 correct for M1), then M1 for
			$\mathbf{r}(\mathbf{r})$			$\Sigma p(x-\mu)^2$ (at least 3 terms correct)
			$E(X^{2}) = (0 \times \frac{1}{16}) + (1 \times \frac{11}{16}) + (4 \times \frac{1}{8}) + (9 \times \frac{1}{16}) + (16$	M1	For $\Sigma r^2 p$ (at least 3 terms	Division by 5 or other spurious value at end
			$\times \frac{1}{16}$)		correct)	gives max M1A1M1M1A0, or M1A0M1M1A0 if E(X) also divided by 5.
			16 ′			Unsupported correct answers get 5 marks.
			$=2\frac{3}{4}=2.75$			
			$\frac{2}{4}$		M1dep for – their $E(X)^2$ A1 FT their $E(X)$	Using 1.38 gets Var of 0.8456 gets A1
					provided $Var(X) > 0$	esing fibo gets var of old fed gets fif
			Var $(X) = 2\frac{3}{4} - \left(1\frac{3}{8}\right)^2 = \frac{55}{64} = 0.859$	M1	0.86, not 0.9	
			$Var(A) - 2\frac{1}{4} - (1\frac{1}{8}) - \frac{1}{64} - 0.839$	A1		
				[5]		
6	(i)	(A)	$X \sim B(20, 0.25)$	M1	For $0.25^4 \times 0.75^{16}$	With $p + q = 1$ Also for 4845×0.00003915
			$P(4 \text{ smokers}) = {20 \choose 4} \times 0.25^4 \times 0.75^{16} = 0.1897$	M1	For $\binom{20}{4} \times p^4 \times q^{16}$	Allow 0.19 or better
			(4)	A1	CAO	See tables at the website
			OR	AI	CAO	http://www.mei.org.uk/files/pdf/formula_bo ok_mf2.pdf
			Or from tables = $0.4148 - 0.2252 = 0.1896$	M2	For 0.4148 – 0.2252	0.189 gets A0
				A1	CAO	
6	(i)	(B)	$P(3 \le X \le 6) = 0.7858 - 0.0913 = 0.6945$	[3] M1	For $(P(X \le 6) =) 0.7858$	
			. (=		seen	Or $P(X=3) + P(X=4) + P(X=5) + P(X=6)$
				M1	For their 0.7858 –	= 0.1339 + 0.1897 + 0.2023 + 0.1686 =
				A1	0.0913 CAO	0.6945. M1 for three correct terms (to 2sf). Accept 0.69 or better
				[3]		$P(X \ge 3) - P(X \ge 6) = 0.9087 - 0.2142 = 0.6945$
						Gets M1 M1 A1

Additional Guidance um needed for B1 is $p =$ probability dent is a smoker. $p =$ P(student smokes) for B1 ion of p must include word
dent is a smoker. p = P(student smokes) for B1 ion of p must include word
dent is a smoker. p = P(student smokes) for B1 ion of p must include word
ility (or chance or proportion or tage or likelihood but NOT lity). bly as a separate comment. However at end of H_0 as long as it is a clear on ' p = the probability that student oker.,NOT just a sentence oility is 0.25' student is a smoker) = 0.25, H_1 : ent is a smoker) < 0.25 gets B0B1B1 p =25%, allow θ or π and ρ but not x . er allow any single symbol if $H_0 = p$ =0.25, allow H_0 : $P(X=x) = 0.25$, H_1 : < 0.25 allow H_0 : $P(X=x) = 0.25$, $P(0.25)$, $P(0.25)$, $P(0.25)$, $P(0.25)$, $P(0.25)$, allow $P(0.25$
on oke oili otucent p=: H ₀ all

C	Question		Answer	Marks	Guidance	Additional Guidance
6	(ii)	(B)	H ₁ has this form as the programme aims to reduce the	E1	Allow 'number'	E0 if H ₁ upper tail or two tailed
	` /	` ′	proportion of smokers.	[1]	Allow 'aims for a	• •
					reduction' or similar	
6	(iii)		$P(X \le 1) = 0.0243 < 5\%$	B1	For $P(X \le 1) = 0.0243$	With full correct notation.
			$P(X \le 2) = 0.0913 > 5\%$	B1	For $P(X \le 2) = 0.0913$	Penalise once for eg $P(X=1)$, $P(X=2)$
			So critical region is $\{0,1\}$	M1	For at least one	
					comparison with 5%	Allow any form of statement of CR eg $X \le$
				A1	CAO for critical region	1, $X < 2$, annotated number line, etc but not
					dep on M1 and at least	$P(X \le 1)$
					one B1	NB USE OF POINT PROBABILITIES gets
				[4]		B0B0M0A0
						If no working but correct CR, no marks
						See additional notes below the scheme for
						other possibilities
6	(iv)		3 does not lie in the critical region, so not significant,	E1 dep	For 3 not in CR or for not	Dep on correct CR, (correctly obtained)
					significant or reject H ₁	E0E0 for $P(X=3)$ not in CR
						E0E0 if wrong working after 3 not in CR
			So there is not enough evidence to reject the null hypothesis	E1 dep	For conclusion in context	Alternative scheme
			and we conclude that there is not enough evidence to suggest		Condone omission of	$P(X \le 3) = 0.2252 > 5\%$ so not sig etc. gets
			that the percentage of smokers has decreased.		'not enough evidence'	E2 for complete method but E0 otherwise.
				[2]	in this case	
7	(i)		Percentage = $\frac{40}{200} \times 100 = 20$	M1	For 40 seen or implied	
			recentage $=\frac{1}{200}\times100=20$	A1	CAO	
				[2]		
7	(ii)		Median = 5.2 kg	B1		
	` ´		Q1 = 4.2 Q3 = 5.8	B1	For Q1 or Q3	Allow 4.2 to 4.3 for Q1
			Inter-quartile range = $5.8 - 4.2 = 1.6$	B1	For IQR	Dep on both quartiles correct
				[3]		

	Questi	on	Answer	Marks	Guidance	Additional Guidance
7	(iii)		Lower limit $4.2 - (1.5 \times 1.6) = 1.8$	B1	For 1.8 ft	Any use of median ± 1.5 IQR scores B0 B0
	, ,		Upper limit $5.8 + (1.5 \times 1.6) = 8.2$	B1	For 8.2 ft	E0
			So there are one or more outliers (if any lamb weighs more	E1	Dep on their 1.8 and 8.2	E0 if say some outliers at bottom end,
			than 8.2 kg)		Allow any number of	unless lower limit > 2.0
					outliers ≤ 5	If FT leads to limits above 9.0 and below 2.0 then E0
			Should not be disregarded because:	E1	Indep Must give reason.	No marks for ± 2 or 3 IQR
			'Nothing to suggest they are not genuine items of data'			With 4.3 and 5.8 lower = 2.05 and upper
			Allow other convincing reasons such as very few so will			= 8.05
			not make much difference			In this part FT their values from (ii) if
						sensibly obtained but not from location ie
				[4]		12.5, 37.5
7	(i-1)		Median for Welsh Mountain = 3.6	D1		No marks for use of mean $\pm 2s$
'	(iv)			B1 B1		
			IQR for Welsh Mountain = 0.8 Welsh Mountain lambs have lower average weight than	E1	Must imply systems or	FT their medians
			crossbred	indep	Must imply average or CT, not just median.	FT their IQRs
			Clossoled	шиер	Allow generally lighter	Can get max B1B0E1E1 for use of
			Welsh Mountain lambs also have lower variation in weight	E1	Must imply spread or	range
			than crossbred	indep	variation, not just IQR	
					or range	
					Allow correct comment	
					on consistency	
				[4]		
7	(v)		Median unchanged	E1		
			IQR unchanged OR range or spread increased	E1	even if used IQR in (iv)	E2 for 'Both comparisons remain the
						same'
				[2]		E1 for 'the range remains smaller'

Questio	n Answer	Marks	Guidance	Additional Guidance
7 (vi)	$P(Crossbred > 3.9) = \frac{165}{200}$	B1		Allow 162 to 165 out of 200
	P(Welsh Mountain > 3.9) = $\frac{1}{4}$ P(Both > 3.9) = $\frac{165}{200} \times \frac{1}{4} = \frac{165}{800} = \frac{33}{160} = 0.206$	B1 M1	For product of their probabilities, provided one is correct CAO	Allow answers in range 0.2025 to 0.20625 with correct working
		A1 [4]		

NOTE RE OVER-SPECIFICATION OF ANSWERS

If answers are grossly over-specified, deduct the final answer mark in every case. Probabilities should also be rounded to a sensible degree of accuracy. In general final non probability answers should not be given to more than 4 significant figures. Allow probabilities given to 5 sig fig.

Additional notes re Q6 parts iii, iv:

Smallest critical region method for part (iii):

Smallest critical region that 1 could fall into has size 0.0243 gets B1,

Smallest critical region that 2 could fall has size 0.0913 gets B1, This is > 5% or above < 5% gets M1, A1 as per scheme

Use of *k* method with no probabilities quoted:

 $P(X \le k) > 5\%$ and $P(X \le k - 1) < 5\%$ followed by k = 2 gets SC1 so CR is $\{0, 1\}$ gets another SC1 dep on first SC1

Use of *k* method with one probability quoted:

 $Mark\ as\ per\ scheme-max\ B0B1M1A1$

Two tailed test with H_1 : $p \neq 0.25$

Gets SC2 for fully correct FT with working as follows $P(X \le 1) = 0.0243 < 0.025$ and $P(X \ge 10) = 0.0139 > 0.025$ B1 CR is $\{0,1, 10, 11, ..., 20\}$ (iv) Final 2 marks Max M1A1.

Two tailed test done but with correct H_1 : p < 0.25

- (ii) gets max B1B1B1E1
- (iii) if compare with 5% ignore work on upper tail and mark lower tail as per scheme but if include upper tail in CR then A0 if compare with 2.5% no marks B0B0M0A0
- (iv) Final 2 marks can get M1A1 if correct CR, or SC2 if they start again, provided that they compare with 5%, not 2.5%.

Lower or upper tailed test with H_1 : p>0.25 and 6(ii)B wrong way around

- (ii) gets max B1B1B0E0
- (iii) no marks B0B0M0A0
- (iv) Final 2 marks get M0A0

Lower tailed test with H_1 : p>0.25 and 6(ii)B right way around

- (ii) gets max B1B1B0E0, note E0, not E1
- (iii) and (iv) Mark as per scheme, so full marks possible

Line diagram method for (iii)

No marks unless some 0.0243 shown on diagram, then B1 for squiggly line between 1 and 2 or on 1, B1 dep for arrow pointing to left, M1 0.0243 seen on diagram from squiggly line or from 1, A1 for CR written down in words/symbols. If 0.0243 and 0.0913 both seen and no other marks earned give B1.

(iv) M1A1 as per scheme

Bar chart method for (iii)

No marks unless 0.0243 shown on diagram, then B1 for line clearly on boundary between 1 and 2 or within 1 block, B1*dep* for arrow pointing to left, M1 0.0243 seen on diagram from boundary line or from 1, A1 for CR written down in words/ symbols. **If 0.0243 and 0.0913 both seen and no other marks earned give B1.**

(iv) M1A1 as per scheme.
