MARK SCHEME for the October/November 2011 question paper

MMM. HIEMEPAPERS. COM

for the guidance of teachers

8780 PHYSICAL SCIENCE

8780/02

Paper 2, maximum raw mark 30

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 2	Mark Scheme: Teachers' version	Syllabus	Paper		
		GCE AS LEVEL – October/November 2011	8780	02		
1	0.2 s, accept 0.05 to 0.5s					
				[Total: 1]		
2	greater distance AND greater mass/momentum/inertia thus less deceleration for the <u>same force</u>					
	and road) (1), balances greater mass (1) accept similar argument for smaller distance for maximum 1					
				[Total: 2]		
3	weight is the gravitational pull on an object Earth's gravitational <u>field</u> strength greater than/different from Moon's					
				[Total: 2]		
4	mean/average mass of an atom relative to 1/12 mass of a ¹² C atom					
				[Total: 2]		
5	(a) different	number of neutrons		[1]		
	(b) same nu	Imber of protons and electrons		[1]		
	(doopt ([Total: 2]		
6	(a) 1s ² 2s ² 2p	$p^{6}3s^{2}3p^{6}4s^{2}3d^{10}4p^{2}$		[1]		
	(b) <u>(70 × 24</u>	<u>.4) + (72 × 32.4) + (74 × 43.2)</u> 100		[1]		
	= 72.4			[1]		
				[Total: 3]		
7	any two from number of pr	: otons increases				
	size of atoms	s decreases		[max 0]		
	amaction per	ween nucleus/protons and <u>outer</u> electrons increases		[max 2]		

[Total: 2]

		GCE AS	LEVEL – Oct	ober/November 2011	8780	02
8	12 joule of we when each c	ork done/enerç oulomb (of cha	gy transferred Irge moves be	tween the two points)		[1] [1]
						[Total: 2]
9	not all GPE is work also do	s transferred to ne against frict	electrical ene ion	ergy o.w.t.t.e./energy transfe	erred to surrou	ndings [1] [1]
						[Total: 2]
10						[2]
				H Br H 		[2]
	CH ₃ C	CH ₂ — CH —	CH ₃	н—с—с	— Н	
		 Br				
				н — с — н		
				 H		
	Н	нн	н	Br		
					J .	
	н—С		с <u>—</u> н 		13	
	Н	H Br	Н	CH ₃		
	1-bromo(-2-)	methylpropane				[1]
	anow ∠-metr	iyi- i-bromopro	ipane			[Total: 2]
						[10tal. 0]
11	nCH ₂ =CHCH	$I_3 \rightarrow polyn$	neric structure	(CH₃ side chain)		
	one mark for	correct repeat	unit, second r	mark for correct equation		[2]
						[Total: 2]
12	(a) any post	ion to left or rig	ght of W (horiz	ontal by eye)		[1]
	<i>4</i> \					
	(b) arrow po	pinting away fro	om W parallel f	to displacement		[1]
						[Total: 2]

	Page 4		Mark Scheme: Teachers' version	Syllabus	Paper	
			GCE AS LEVEL – October/November 2011	8780	02	
13	(a)	 a) point at the same level as P AND pressure is not dependent on the tube width/only depends on density and depth 				
	(b)	point abo density o accept p	ove P AND of sea water greater than fresh water oint below P AND sea water less dense		[1]	
					[Total: 2]	
14						
	entha	lpy/	$\uparrow \frown \uparrow$			

kJ mol⁻¹ $E_{a}(F)$ $E_{a}(R)$ $H_2(g) + I_2(g)$

2HI(g) ΔH reaction progress

diagram has correct exothermic profile (+ product labelled) $E_{\rm a}$ labels are clear and correct direction of arrows ΔH correctly shown and labelled

[Total: 3]
