## GCE AS MARKING SCHEME

SUMMER 2016

PHYSICS AS - Unit 2 2420U20/01

## INTRODUCTION

This marking scheme was used by WJEC for the 2016 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

## AS UNIT 2 - ELECTRICITY AND LIGHT

## MARK SCHEME

## GENERAL INSTRUCTIONS

Recording of marks
Examiners must mark in red ink.
One tick must equate to one mark (except for the extended response question).
Question totals should be written in the box at the end of the question.
Question totals should be entered onto the grid on the front cover and these should be added to give the script total for each candidate.

## Marking rules

All work should be seen to have been marked.
Marking schemes will indicate when explicit working is deemed to be a necessary part of a correct answer.
Crossed out responses not replaced should be marked.
Credit will be given for correct and relevant alternative responses which are not recorded in the mark scheme.
Extended response question
A level of response mark scheme is used. Before applying the mark scheme please read through the whole answer from start to finish. Firstly, decide which level descriptor matches best with the candidate's response: remember that you should be considering the overall quality of the response. Then decide which mark to award within the level. Award the higher mark in the level if there is a good match with both the content statements and the communication statement.

## Marking abbreviations

The following may be used in marking schemes or in the marking of scripts to indicate reasons for the marks awarded.

| cao | $=$ correct answer only |
| :--- | :--- |
| ecf | $=$ error carried forward |
| bod | $=\quad$ benefit of doubt |

bod $=$ benefit of doubt

| Question 1 |  |  | Marking details | Marks available |  |  |  | Maths | Prac |

|  |  |  | A01 | AO2 | AO3 | Total |  |  |
| 5 | (a) |  |  | Work / charge or energy / charge or energy / coulomb (1) Don't accept joules / coulomb <br> Context i.e. energy transferred [or converted] from electrical [potential] / work done.......... [between the points] not a freestanding mark (1) | 2 |  |  | 2 |  |  |
|  | (b) | (i) | 1.62 [V] or emf | 1 |  |  | 1 |  |  |
|  |  | (ii) | $\begin{aligned} & I=\frac{1.38}{1.50}[=0.92 \mathrm{~A}] \text { or by implication if answer correct to } 2 \mathrm{sf}(1) \\ & V_{r}=1.62 \mathrm{~V}-1.38 \mathrm{~V}=[0.24 \mathrm{~V}] \text { or } R+r=\frac{1.62 \mathrm{~V}}{0.92 \mathrm{~A}}=[1.76 \Omega](1) \\ & r=0.26[\Omega] \text { (1) } \end{aligned}$ |  | 3 |  | 3 | 3 |  |
|  |  | (iii) | $t=\frac{750]}{E I}$ (1) or by implication ecf <br> $t=500 \mathrm{~s}$ [503 s] (1) [590 s indicates wrong pd used so award 1 mark only] |  | 2 |  | 2 | 2 |  |
|  |  | (iv) | Total circuit resistance $=0.26 \Omega$ ecf $+0.75 \Omega$ or by implication (1) $V_{R}=1.20[\mathrm{~V}]$ (1) or $0.3 \Omega+0.75 \Omega$ gives $V_{R}=1.16$ [V] |  | 2 |  | 2 | 2 |  |
|  | (c) | (i) | $\begin{aligned} & I=\frac{6.0 \mathrm{~V}}{200 \Omega+850 \Omega)}[=5.71 \mathrm{~mA}] \text { or } V_{200}=\frac{200}{200+850} 6.0 \mathrm{~V} \text { (1) } \\ & V_{200}=1.14[\mathrm{~V}](1) V_{\text {LDR }}=4.86[\mathrm{~V}] \text { but } V_{200} \text { not given award } 1 \text { mark } \end{aligned}$ |  | 2 |  | 2 | 2 |  |
|  |  | (ii) | No credit for 'Resistance decreases' Current increases or total circuit resistance decreases or any relevant resistance ratio (e.g. $\frac{V_{200}}{V_{\text {LDR }}}$ ) stated to increase or decrease as appropriate to the ratio (1) <br> $V_{200}$ goes up, but award mark only if argument presented so that this conclusion follows (1) no ecf from (c)(i) |  | 2 |  | 2 |  |  |
|  |  |  | Question 5 total | 3 | 11 | 0 | 14 | 9 | 0 |

| Question |  |  | Marking details | Marks available |  |  |  | Maths | Prac |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | A01 | AO2 | AO3 | Total |  |  |
| 6 | (a) | (i) |  | Waves from source interfere (accept superpose) with waves reflected [from plate] (1) <br> Waves in phase or constructively interfere at [each] antinode (1) |  | 2 |  | 2 |  |  |
|  |  | (ii) | Antinodes $\frac{\lambda}{2}$ apart or $\lambda=32 \mathrm{~mm}$ (1) <br> $8 \mathrm{~mm}=1 / 4 \lambda$ or equivalent, so node at $P$ (1) <br> If correct answer and valid argument without any reference to $\lambda$ <br> award 1 mark. <br> Alternative for 1 mark only - phase change of $180^{\circ}$ on reflection therefore node at $P$ |  | 1 | 1 | 2 |  |  |
|  | (b) | (i) | In antiphase. Accept exactly, or $\pi$, or $180^{\circ}$ out of phase or half a cycle (1) don't accept phases expressed in terms of $\lambda$ <br> Longest $\lambda$ is 0.60 m [because $0.30 \mathrm{~m}=\frac{\lambda}{2}$ ] (1) <br> Second longest is 0.20 m [because $0.30 \mathrm{~m}=\frac{3 \lambda}{2}$ ] (1) | 1 | $\begin{aligned} & 1 \\ & 1 \end{aligned}$ |  | 3 |  |  |
|  |  | (ii) | $f=20[\mathrm{~Hz}] \text { or } T=0.050 \mathrm{~s} \text { if } \underline{\text { used in } v=\frac{\lambda}{T}(1), ~(1)}$ <br> If $\lambda=0.60 \mathrm{~m}$, then $v=20 \times 0.6=12\left[\mathrm{~m} \mathrm{~s}^{-1}\right]$ (1) ecf on both $\lambda$ <br> This is in range; $\lambda=0.20[\mathrm{~m}]$ is out of range (1) <br> Alternative method for last two marks <br> $10 \mathrm{~m} \mathrm{~s}^{-1}$ at 20 Hz corresponds to $\lambda=0.50 \mathrm{~m}$, and <br> $15 \mathrm{~m} \mathrm{~s}^{-1}$ at 20 Hz corresponds to $\lambda=0.75 \mathrm{~m}$ (1) <br> So $\lambda=0.60 \mathrm{~m}$ (1) ecf on (i) extending to conclusion (also rewards strategy) |  | 3 |  | 3 | 2 |  |
|  |  |  | Question 6 total | 1 | 8 | 1 | 10 | 2 | 0 |

| Question |  |  | Marking details | Marks available |  |  |  | Maths | Prac |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | AO1 | AO2 | AO3 | Total |  |  |
| 7 | (a) | (i) |  | Circuit sends current that can be varied through lamp (1) Accept series variable resistor correctly drawn, variable potential divider, or any recognisable symbol for variable (dc) power supply. <br> Ammeter and voltmeter correctly connected and shown by correct symbols (1) | 2 |  |  | 2 |  | 2 |
|  |  | (ii) | Choose 200 mA as better resolution (accept precision, accuracy) Accept 0.16 A is closer to maximum of range for that meter |  | 1 |  | 1 |  | 1 |
|  |  | (iii) | More points needed [for lower voltages] (1) accept smaller intervals or more readings pd range needs extending [beyond 2 V (to 3 V )] (1) Don't accept take evenly spaced readings or take repeat readings or equivalent |  |  | 2 | 2 |  | 2 |
|  | (b) | (i) | $5.0[\Omega]$ or $\frac{0.50}{0.10}[\Omega]$ or by implication (1) <br> $13.8[\Omega]$ or $\frac{2.00}{0.145}[\Omega]$ or by implication (1) <br> 2.8 (1) Accept correct answer expressed as a fraction <br> 14.2 [ $\Omega$ ] or 14.3 [ $\Omega$ ] are from graph mis-readings deduct 1 mark only |  | 3 |  | 3 | 3 |  |
|  |  | (ii) | Marking points <br> M1 [Free] electrons make collisions <br> M2 ......with ions or atoms or lattice (accept particles) <br> M3 Increasing the pd increases the current / drift velocity / energy of electrons <br> M4 Electrons hit ions harder or transfer more energy [or equivalent] when $I$ [or $V$ ] larger <br> M5 Increased vibration [amplitude] [of ions/atoms] <br> M6 Therefore temperature increases <br> M7 Collisions more frequent or more probable [when $T$ larger] <br> M8 Smaller current / drift velocity [for a given pd] <br> M9 Resistance increases in context |  |  |  |  |  |  |
