Candidates answer on the Question Paper

OCR Supplied Materials:
None

Other Materials Required:
None

**Wednesday 3 February 2010
Afternoon**

Duration: 1 hour 30 minutes

Candidate Forename		Candidate Surname	
--------------------	--	-------------------	--

Centre Number						Candidate Number				
---------------	--	--	--	--	--	------------------	--	--	--	--

INSTRUCTIONS TO CANDIDATES

- Write your name clearly in capital letters, your Centre Number and Candidate Number in the boxes above.
- Use black ink. Pencil may be used for graphs and diagrams only.
- Read each question carefully and make sure that you know what you have to do before starting your answer.
- Answer **all** the questions in **Section A** and **either** question 8 **or** question 9 in **Section B**.
- Do **not** write in the bar codes.
- Write your answer to each question in the space provided. Additional answer space is available on the lined pages at the back of the book. Answers on these pages must be clearly numbered.

INFORMATION FOR CANDIDATES

- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is **80**.
- This document consists of **20** pages. Any blank pages are indicated.

Section A

Your task is to answer questions about how a piece of research related to the passage below could be conducted.

Cognitive processes include memory and perception and just as our memories are likely to become distorted, we are all susceptible to mistaken perceptions. Many of us are familiar with such classic illusions as the Muller-Lyer illusion – where the line with the outgoing fins, figure (a) appears longer than the line with the ingoing fins, figure (b). In fact they are the same length.

You must choose **one** of the options **(a)–(g)**:

- (a) Are older people more susceptible to visual illusions than younger people?
- (b) Will people be less accurate in judging the length of lines in a Muller-Lyer illusion when they hear another person give a wrong judgement than if they judge alone?
- (c) Will women remember details of clothing better than males?
- (d) Can police officers remember car registration plates better than non police officers?
- (e) Do hungry people remember food related words better than people who are not hungry?
- (f) Are people living in cities more affected by the Muller-Lyer illusion than those living in rural areas?
- (g) Are people asked a leading question more likely to give a wrong answer than those not asked a leading question?

You must use an independent measures design experiment and plan to collect at least ordinal level data. It must be a practical project that could be conducted.

Answer **all** the questions in **Section A** in relation to your experimental design.

State the option **(a)–(g)** you have chosen for your practical project.

1 State the null hypothesis for your practical project.

.....

[Total: 40]

BLANK PAGE

PLEASE DO NOT WRITE ON THIS PAGE

Section B

Answer **either** question 8 **or** question 9.

EITHER

8 (a) Using your knowledge of psychology, briefly outline the cognitive approach to psychology.

.....
.....
.....
.....
.....
.....
.....
.....
.....
..... [4]

(b) Describe **two** pieces of research that use the cognitive approach to psychology.
