SECTION A

Read the source material and answer ALL the questions in this section.

SOURCE A

Research into inequalities and digital forms of communication offers two very different views. One view suggests that digital forms of communication offer a solution to inequalities, as disadvantaged groups have greater access to resources through the internet. The second view suggests that digital forms of communication have created greater inequalities, as a digital class divide has emerged. This suggests that those who are already privileged have both the access and skills to take advantage of educational and networking opportunities, whilst the lower social classes are excluded from these opportunities.

SOURCE B

Sociologists often suggest that disadvantaged groups do not benefit from digital forms of communication as they lack the economic resources to pay for internet access and digital devices. Yet across the world there has been a growth in social protest movements, where the disadvantaged have successfully used digital forms of communication. Disadvantaged groups have been able to spread information to promote their cause, mobilise people and organise protests. However, whether digital forms of communication have the power to change the world is questionable, as privileged groups control and manipulate them.

- 2 With reference to the source(s) and your wider sociological knowledge, evaluate the view that developments in digital forms of communication have benefitted the social protest movements of the disadvantaged. [10]**
