Health

Chile

Vaccinations Required

	Special Precautions
Diphtheria	Sometimes
Hepatitis A	Yes
Malaria	No
Rabies	Sometimes
Tetanus	Yes
Typhoid	Sometimes
Yellow Fever	No

Regulations can change at short notice. Please take medical advice in the case of doubt. Where 'Sometimes' appears in the table above, precautions may be required, depending on the season and region visited.

Food and Drink

Standards of hygiene are generally reasonable in Chile and should not cause visitors any undue concern.

Other Risks

Vaccinations against tuberculosis and hepatitis B are sometimes recommended. When travelling to rural parts of Chile, care should be taken to avoid the Hanta virus, a potentially fatal condition that is spread by rodents. In particular, make sure rustic cabins are well aired out and free from any sign of rodents.

Health Care

Health insurance is essential. Emergency services can be dialled free (tel: (2) 131 for an ambulance), but for medical emergencies, private services may deliver more modern equipment and a faster response. *Clínicas* (private hospitals) can be contacted directly in the case of a medical emergency.
